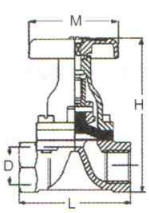
When ordering butterfly valves, please specify the following information:

1) Type of Butterfly: Wafer, Lug, Mono, Double Flanged, or High Performance.
2) Nominal Size: Millimeters or Inches.
3) Face to Face: Reference the charts above.
4) Flange Drilling: Reference the chart above.
5) Actuation: Manual lock lever and manual worm gear. For pneumatic, electric and hydraulic actuators, include specifications.
6) Manufacturer: Manufacturer and model number is helpful in cases where dimensions are not provided, and essential when ordering replacement parts (seat rings, discs, etc.···).
7) Material: Specify the required materials for the body, disc, and Seat.
   - Body: Cast Iron, Ductile Iron, Cast Steel, Stainless, Steel, or Bronze.
   - Disc: Ductile Iron, Stainless Steel, Aluminium/Bronze, or Coated.
   - Seat: EPDM, NBR, Viton, Neoprene, or Teflon (PTFE).
8) Medium: Oil, Gas, Water, etc.···
9) Working Temperature: Degrees Celsius or Fahrenheit.



DIN Diaphragm Valves

Diaphragm Valves (DIN)

Bronze, BSP Female Threaded Weir Type

Válvulas de diafragma (DIN), Bronce, rosca hembra BSP
ダイヤフラムバルブ（DIN）青銅、BSP 雌ネジ切り
隔膜阀（DIN）青铜，英制内螺纹

Weir type bronze diaphragm valve, BSP female threaded ends acc. to DIN 259, rising stem and handwheel.

Application :
In cold and warm water circuits for both tap water and central heating systems. As main valve in water and gas pipelines and in various industrial applications. The valve is KIWA type approved.

Pressure and Temperature Range

Diaphragm	EPDM	Neoprene (CR)
Max. Operating Pressure	10 bar	10 bar
Max. Temperature	120°C	60°C

Material Specification

Component	Material	EN and/or (DIN)
Body	Bronze	CuSn5Zn5Pb5-C (G CuSn5ZnPb (Rg 5))
Bonnet	Brass	CuZn40Pb2
Stem	Brass	CuZn40Pb2
Handwheel	Steel

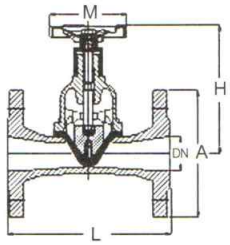
Diaphragm Valves (DIN)

Cast iron, Flanged Ends
Full Bore, Pressure Rating PN 10

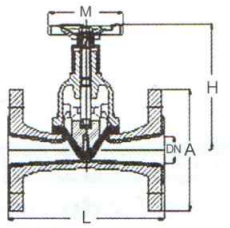
Válvulas de diafragma (DIN), Hierro fundido, extremos con bridas
ダイヤフラムバルブ（DIN）鋳鉄製、フランジ形
隔膜阀（DIN）铸铁，法兰端



Full bore cast iron diaphragm valve, lined and unlined body. Flanged ends DIN PN 16. Position indicator with integrated stem protector and rising handwheel.

Application: Cold and hot water, portable water, air, oil, abrasive and aggressive media.

Suitability for application is partly depending on selected diaphragm and/or lining material.



No Lining

Hard Rubber Lining

Pressure and Temperature Range

DIN Pressure Reducing Valves

Pressure Reducing Valves

Gunmetal & Stainless Steel with Flange Connection

Válvulas reductoras de presión , Bronce de cañón y acero inoxidable con conexión de brida

フランジ式砲金＆ステンレス鋼減圧弁

炮铜和不锈钢，带法兰连接 减压阀

Marine Type Approvals held for these valves:

- DNV
- American Bureau of Shipping
- Russian Maritime Register of Shipping
- Lloyds Register EMEA
- Bureau Veritas,
- Registro Italiano Navale

Pressure reducer with flange connection made of gunmetal with balanced single seat valve and built-in dirt trap for the protection of domestic water supply systems and commercial and industrial plants against an excess supply pressure. Pressure reducers are used, if within a piping system despite of varying pressures on the inlet side a certain pressure must not be exceeded on the outlet side. The pressure can be adjusted via a non-rising valve stem. Flange connection according to DIN EN 1092-3. Pressure reducer equipped with pressure gauge ports; gauge connection G 1/4".

Available three models with

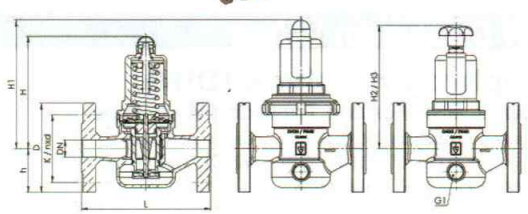
- EPDM (ethylene propylene diene) seal suitable for water, neutral and non-sticking liquids, compressed air and neutral gases.
- FKM (Fluorocarbon) seal suitable for non-neutral media i.e. oils, fuels, oil-laden compressed air, etc..

- Low pressure: 682/482mGFO-LP EPDM and FKM
- Standard pressure: 682/482mGFO-SP EPDM and FKM
- High pressure: 682/482mGFO-HP EPDM and FKM

Mesh sizes: DN15 to DN32 = 0.6 mm
DN40 and DN80 = 0.75 mm (682)
DN40 and DN100 = 0.75 mm (482)

Seats for 682:
DN15 to DN50 made of gunmetal/stainless steel
DN65 to DN100 made of stainless steel

All models also available in **Stainless Steel**: series **482**.



How to order: CODE

Pressure Reducing Valves

Gunmetal & Stainless Steel with Threaded Connections

Válvulas Reductoras de Presión, Bronce de cañón y acero inoxidable con conexión roscada

ネジ式砲金・ステンレス鋼減圧弁

减压阀 ， 炮铜和不锈钢，带螺纹连接

Marine Type Approvals held for these valves:

- DNV
- American Bureau of Shipping
- Russian Maritime Register of Shipping
- Lloyd´s Register EMEA
- Bureau Veritas,
- Registro Italiano Navale

Pressure reducer with threaded connections made of gunmetal with balanced single seat valve and built-in dirt trap. Spring made of steel with anti-rust protection, and strainer made of stainless steel. Fabric reinforced diaphragm made of high-quality, heat-resistant moulded elastomer. Body with G 1/4" connection for pressure gauge on both sides. Adjustment by means of non-rising spindle.

Standard thread: BSPTm. Also available in female BSP-P and female NPT for sizes up to 1" (PLEASE CLEARLY INDICATE IN THE ORDER: "f/f", "BSPTm/BSPTm", or "NPTf/NPTf")

Available three models with

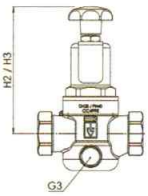
- EPDM (ethylene propylene diene, seals and diaphragm suitable for water, neutral and, non-sticking liquids, compressed air and neutral gases.
- FKM (Fluorocarbon) seals and diaphragm suitable for non-neutral media i.e. oils, fuels, oil-laden compressed air, etc.

- Low pressure 681/481mGFO-LP EPDM and FKM
- Standard pressure 681/481mGFO-SP EPDM and FKM
- High pressure 681/481mGFO-HP EPDM and FKM

Mesh sizes: DN15 to DN32 = 0.6 mm
DN40 and DN50 = 0.75 mm

Inlet pressure: up to 40 bar
Outlet pressure: 0.5 - 15 bar

All models also available in **Stainless Steel**: series **481**.



How to order: CODE

Pressure Reducing Valves

Gunmetal & Stainless Steel with Threaded Connection

Válvulas Reductoras de Presión, Gunmetal con conexión roscada

ネジ式砲金减压弁　减压阀，炮铜色，带螺纹连接

Marine Type Approvals held for these valves:

- DNV
- Bureau Veritas,
- Lloyd's Register EMEA
- Russian Maritime Register of Shipping

Balanced single seat pressure reducing valves with threaded connections made of gunmetal/ stainless steel.
Either with Fabric reinforced diaphragm made of high-quality, heat-resistant moulded elastomer or with piston. Body with pressure gauge connection G1/4" on both sides of body.

Available in various versions:

- Version code: **mXXXSM**:
  with elastomere moulded diaphragm and seal made of FKM or EPDM
  max. inlet pressure: 60 bar, outlet pressure: 0.5 to 15 bar.

- Version code: **kXXXSK / kXXXHK**:
  with piston made of brass and seals made of FKM or EPDM
  kXXXSK: max. inlet pressure: 60 bar, outlet pressure: 5 to 30 bar
  kXXXHK: max. inlet pressure: 60 bar, outlet pressure:10 to 50 bar

- Version code: **xGSXX**:
  for compressed air and gases with secondary venting (for non-neutral, poisonous gases only in combination with ducted exhaust)

- Version code: **xGFOXX**:
  for liquids & gases (without secondary venting)

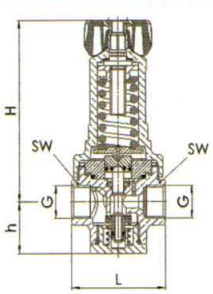
Also available in **Stainless Steel:** series **484**.

How to order: CODE

Pressure Reducing Valve (DIN), with threaded connection, Gunmetal, Version with diaphragm or piston – depending on pressure rating (mXXXSM, kXXXSK or kXXXHK), Version for which kind of medium (xGSXX or xGFOXX), SIZE DIN

Example code:
684mGSSM-20-f/f-20/20 FKM
series 684 **mXXXSM**: **diaphragm**
xGSXX: **with secondary venting**
20-f/f-20/20: size DN**20** with female BSP-P threads
FKM: seals and diaphragm made of FKM

Series 684:



Component	Material	DIN EN	ASME
Body	Gunmetal	CC499K	CC499K
Internal Parts	Brass	CW617N	CW617N
Spring	Spring steel with anti-rust protection	1.1200	ASTM A228

DN8 to DN25

DN40 & DN50

Model 684mGSSM

with elastomer moulded diaphragm and seals for gases & compressed air **with secondary venting**.

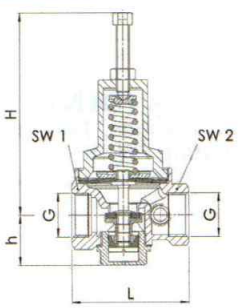
Pressure Reducing Valves

Gunmetal with Female Connections

Válvulas Reductoras de Presión, Bronce de cañón con conexiones hembra
ソケット式砲金減圧弁　　减压阀，炮铜色，内螺纹连接



Marine Type Approvals held for these valves:
- DNV
- American Bureau of Shipping
- Russian Maritime Register of Shipping
- Lloyd's Register EMEA
- Bureau Veritas

Pressure reducer with female connections made of gunmetal with balanced single seat valve for use in shipbuilding and offshore plants. Suitable for compressed air and neutral gases. Body with G 1/4" connection for pressure gauge on both sides.

Largest reduction ratio: 10:1

Component	Material	DIN EN	ASME
Body, Insert	Gunmetal	CC499K	CC499K
Outlet body	Gunmetal	CC499K	CC499K
Internal parts	Brass	CW617N	CW617N
Spring	Spring steel	1.1200	ASTM A228

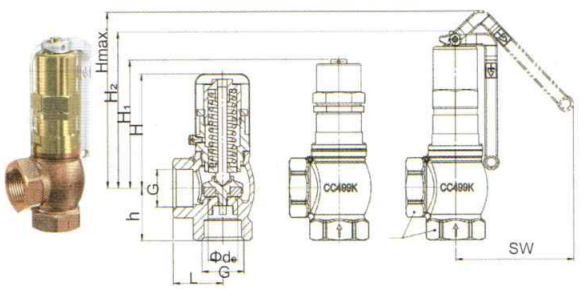
Pressure Relief Valves

Gunmetal with threaded connections

Válvulas de alivio de presión, Gunmetal con conexiones roscadas
砲金・減圧安全弁
泄压阀，炮铜材质，螺纹连接

Marine Type Approvals held for these valves:
- DNV
- American Bureau of Shipping
- Russian Maritime Register of Shipping
- Lloyd's Register EMEA
- Bureau Veritas



Pressure relief valve for the protection of pressure tanks, systems for neutral / non-neutral vapours, gases and liquids, steam boilers and steam plants.

Available models:
- 628 sGFL with lifting lever
- 628 tGFO gastight version without lifting lever

Available seals:
- NBR
- FKM
- PTFE

Series 628 (Gunmetal):

Component	Material	DIN EN	ASTM/AISI

DIN Ball Valves

Ball Valves (DIN)

Bronze, BSP Female Threaded Ends
Pressure Rating PN40

Bronce, extremos roscados hembra BSP
DIN 型青銅 BSP 雌ネジボールバルブ　　青铜，BSP 内螺纹端头

Two piece, full bore, bronze body ball valve with hard chromed brass ball and PTFE seat. BSPP female threaded ends.

Pressure and Temperature Range: PN40, -10°C/+120°C

Material Specification

Component	Material	EN and/or (DIN)
Body	Copper Alloy	CC491K
Ball	Brass	CW617N
Seat	Plastic	PTFE
Stem	Brass	CW614N
Lever	DN8-65	AISI304
Lever	DN80	Galvanized steel

Ball Valves (DIN)

Stainless Steel, BSP Female Threaded Ends, Full Bore

Válvulas de bola (DIN), Acero inoxidable, extremos roscados, hembra BSP Paso total
ボールバルブ（DIN）ステンレス鋼、BSP 雌ネジフルボア
球阀（DIN）不锈钢，BSP 内螺纹端全孔

Two-piece ball valve with full bore, stainless steel body, stainless steel ball and PTFE seat, BSP or NPT female thread connection. Actuated by means of a lockable lever with PVC sleeve.

Applications:
Corrosive fluid, Fuel oil, Lubricating oil, Flammable hydraulic oil, Cargo oil, Non-flammable hydraulic fluid, Boiler feedwater, Condensate, Sea water, Water.

Pressure and Temperature Range: 69 bar, -20°C to +170°C

Ball Valves (DIN)

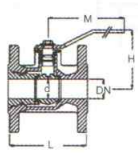
Cast Iron, DIN Flanges, 2-way, Full Bore Pressure Rating PN 16

Válvulas de bola (DIN), Hierro fundido, bridas DIN, 2 vías, paso total
ボールバルブ（DIN）鋳鉄、DIN フランジ、2 方向、フルボア
球阀（DIN）铸铁，DIN 法兰，2 通，全孔



Ball valve with full bore, floating ball and flange connection rated DIN PN 16. Actuated by lever. Also available with a pneumatic or electric actuator. This type of ball valve is generally used in heating, air conditioning and industrial systems for water and gases up to a maximum of 16 bar (PN 16 version).

Pressure and Temperature Range

Overflow Valves

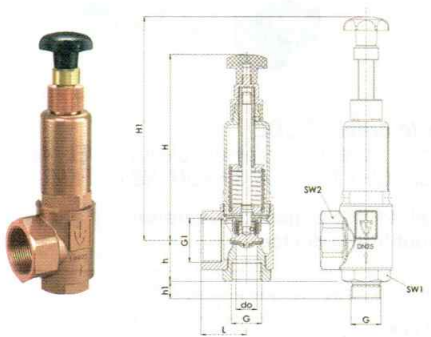
Gunmetal & Stainless Steel with Stainless Steel Spring

Válvulas de rebose , Bronce de cañón y acero inoxidable con muelle de acero inoxidable
砲金ステンレス製オーバーフロー弁
溢流阀 、炮铜和不锈钢材质，带不锈钢弹簧

Marine Type Approvals held for these valves:
- DNV
- Lloyd's Register EMEA
- American Bureau of Shipping
- Bureau Veritas
- Russian Maritime Register of Shipping
- Resistro Italiano Navale

Angular shaped spring loaded overflow valves made of gunmetal with stainless steel spring – externally adjustable. Suitable for the protection of pumps against overloading in closed circuits for neutral / non neutral, non-sticking liquids and for the control of systems under pressure for neutral / non-neutral gases and vapours and – depending on the sealing material – also for steam. with bellows without lifting device.

Available models:
- **853 bGFO**
  with bellows, for gases and liquids
  without lifting device



Available seals :
- **NBR**
- **EPDM**
- **FKM**
- **PTFE**
- **FFKM**

Valves can be delivered unset within a pressure range or set and sealed at the factory.

Series also available in **Stainless Steel**: Series **453**.

Overflow Valves

Gunmetal & Stainless Steel

Válvulas de rebose de bronce industrial y acero inoxidable
砲金/ステンレス製オーバーフロー弁
炮铜/不锈钢制 溢流阀

Marine Type Approvals held for these valves:
- DNV
- Lloyd's Register EMEA
- American Bureau of Shipping
- Bureau Veritas
- Russian Maritime Register of Shipping
- Resistro Italiano Navale

Overflow and pressure control valves made of gunmetal and spring made of Spring steel with anti-rust protection with threaded connections. For protection of pumps against overloading in closed circuits for neutral, non-neutral, non-sticking liquids and for control of systems under pressure for air, neutral / non-neutral gases and vapours.

Standard thread: BSPTm. Also available in female BSP-P for sizes up to 1" (PLEASE CLEARLY INDICATE IN THE ORDER:"f/f" or "BSPTm/BSPTm").

Valves can be delivered unset within a pressure range or set and sealed at the factory (against surcharge).

Set pressure: 0.5 – 10 bar

Ranges of adjustment: 0.5 – 2 bar
1.5 – 6 bar
5.5 – 10 bar

Available seals : EPDM, FKM

Also available in **Stainless Steel**: **series 430**.

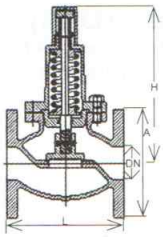
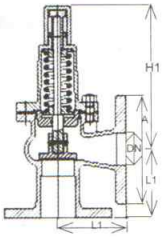
Overflow Valves (DIN)



Bronze, DIN Flanges, Globe Type Straight and Angle Pattern

Válvulas de Seguridad de Alivio (según DIN)
DIN型青銅安全レリーフ弁　DIN型安全溢流阀



Bronze overflow valves are primarily applied in the maritime segment for pressure regulation in liquid systems. Suitable for salt and fresh water, oil, steam and air.

Remark: This valve may also be used as a safety valve aboard ships. In connection with the PED guidelines, this is not permitted for installations on land, if the set pressure is >0.5 bar.

DIN型鋳鋼フランジ式安全弁　　安全阀（DIN）铸钢，DIN法兰

Full lift Safety Valves are mainly applied to vapours (including steam) and gases. Suitable for liquids in large volumes.
Type of Approval: TUV-SV,,, -576 D/G/F, PED, ASME NB, BV, DNV, GL, LROS and RINA.

Material Specification

Component	Material	EN and/or (DIN)
Body	Cast steel	GP240GH +N (GS-C25)
Seat	Stainless steel	X2CrNiMo17-12-2 (G-X2CrNiMo 18 10)
Disc	Stainless steel	X39CrMo17-1 (X35CrMo17)
Stem	Stainless steel	X20Cr13
Spring	Spring steel	
Bonnet	Ductile cast iron	GJS-400-15 (GGG-40)

Temperature Range (DIN EN): -85/+45°C*

*Above 200°C, provided with heat-resistant spring and above 400°C also provided with SS bolts and nuts for the bonnet.

Flange:
Inlet flange (on the bottom) – according to DIN PN40
Outlet flange (on the side) – according to DIN PN16

How to order: CODE

Safety valve (DIN), cast steel, spring-loaded, DIN flanged ends, pressure rating PN 40/16 SIZE DN

Unit Per Pc.

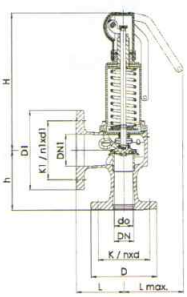
Safety Valves



Gunmetal with Stainless Steel Spring

Válvulas de seguridad , Bronce de cañón con muelle de acero inoxidable
砲金安全弁
安全阀 、炮铜色，带不锈钢弹簧

Angular shaped spring-loaded safety valves use for the protection of thermostatically protected closed-circuit water heating systems with flow temperatures of up to 120°C for all static heights or rated output above 350 kW according to TRD 721, DIN 4751 and DIN EN 12828. Should the thermostatic limiting and control unit fail, the safety valve has to blow-off the total heating output of the boiler as hot water and steam. As these valves are completely made of metal they can also be installed at high environmental or radiation temperatures.

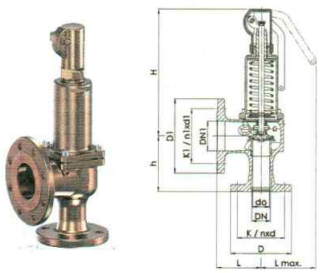
Safety Valves

Gunmetal with Stainless Steel Spring

Válvulas de seguridad , Bronce de cañón con muelle de acero inoxidable
砲金安全弁
安全阀 ， 炮铜色，带不锈钢弹簧



Angular shaped spring-loaded safety valves made of gunmetal with stainless steel spring. Internal parts are made of stainless steel. Suitable for the protection of pressure tanks and systems for neutral / non-neutral vapours, gases and liquids, steam boilers and steam plants, bulk transport vehicles for liquid, granular and dusty goods[1]. Available four versions; Model 852 tGFO gastight without lifting device, Model 852 tGFL gastight with lifting lever, Model 852 bGFO with bellows and without lifting device and Model 852 bGFL with bellows and with lifting lever .

Model 852 tGFO/tGFL:
Sealed cap prevents unauthorized changing of set pressure.

Model 852 bGFO/bGFL:
Set pressure is protected by seal. Spring and sliding parts are protected by bellows.

Diaphragm Safety Valves

Red Brass

Válvula de Seguridad de Diafragma Latón Rojo
丹銅ダイヤフラム安全弁　紅銅隔膜式安全阀

Angular shape, spring loaded diaphragm safety valve made of Gunmetal. Seal cap prevents unauthorized changing of set pressure. Twist-type lifting mechanism. Installed diaphragm prevents medium from entering the spring chamber. Suitable for protecting closed-circuit water heating systems from -10°C to +95°C.

Component	Material	DIN EN	ASM
Inlet Body	Gunmetal	CC499K	CC499K
Outlet Body	Gunmetal	CC499K	CC499K
Internal Parts	Brass	CW617N	CW617N
Spring	Spring steel with anti-rust protection	1.1200	ASTM A228

Unit Per Pc.

Safety Valves

Gunmetal & Stainless Steel with Stainless Steel Spring

Válvulas de seguridad, Bronce de cañón y acero inoxidable con muelle de acero inoxidable
砲金ステンレス製安全弁
安全阀 炮铜和不锈钢材质、带不锈钢弹簧

Marine Type Approvals held for these valves:
- DNV
- Lloyd's Register EMEA
- American Bureau of Shipping
- Bureau Veritas
- Russian Maritime Register of Shipping

Angular shaped spring loaded safety valves made of gunmetal/stainless steel with stainless steel spring. Sealing cap prevents unauthorized changing of set pressure. Suitable for the protection of pressure-vessels/-systems for neutral / non-neutral vapours, gases and liquids, steam boilers and steam plants, stationary silos and bulk transport vehicles for liquid, granular and powdery goods.

Available models:
- 851 sGK with twist-type lifting mechanism
- 851 sGL with lifting lever
- 851bGFK with bellows and twist-type lifting mechanism
- 851bGFL with bellows and lifting lever

Available seals:
- NBR
- EPDM
- FKM
- PTFE
- PTFE + carbon (standard from 25 bar)
- FFKM
- metal-to-metal sealing

All models are also available in **Stainless Steel**: series **451**.

Safety Valves

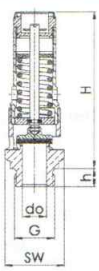
Brass & Stainless Steel with Stainless Steel Spring

Válvulas de seguridad de latón y acero inoxidable con resorte de acero inoxidable

真鍮・ステンレス安全弁　黄铜不锈钢安全阀（带不锈钢弹簧）

Atmospheric discharge safety valves made of brass with stainless steel spring. Suitable for the protection of pressure tanks and systems for air and other neutral, non-poisonous and non-flammable gases which can be freely discharge into the environment. with twist-type lifting mechanism.

Available models:
- 810sGK: Available in 1/4" up to 2"



Also available in **Stainless Steel**: series **410**. (Up to 1")

Series 810 (Brass):

- 810sGK FKM with FKM seal (0.2 – 25 bar)
- 810sGK PTFE with PTFE seal (0.2 - 50 bar)

Component	Material	DIN EN	ASME
Body	Brass	CW617N	CW617N
Internal Parts	Brass	CW617N	CW617N
Spring	Stainless steel	1.4568	631

810sGK FKM with FKM seal (0.2 – 25 bar)

Unit Per Pc.

Safety Valves

Brass & Stainless Steel with Stainless Steel Spring

Válvulas de seguridad de latón y acero inoxidable con resorte de acero inoxidable

真鍮・ステンレス安全弁　黄铜不锈钢安全阀（带不锈钢弹簧）

Marine Type Approvals held for these valves:
- DNV
- Lloyd's Register EMEA
- American Bureau of Shipping
- Bureau Veritas
- Russian Maritime Register of Shipping
- Resistro Italiano Navale

Atmospheric discharge safety valves made of brass (or Stainless Steel) with stainless steel spring. Suitable for the protection of pressure tanks and systems for air and other neutral, non-poisonous and non-flammable gases which can be freely discharge into the environment. With twist-type lifting mechanism.

Available models:
- 812/412 sGK

Available seals:
- NBR
- FKM
- EPDM
- PTFE

Available in 1/2" up to 2".

All models are also available in **Stainless Steel**: Series **412**.

Safety Valves

Gunmetal & Stainless Steel with Stainless Steel Spring

Válvulas de seguridad, Bronce de cañón y acero inoxidable con muelle de acero inoxidable

砲金・ステンレス製安全弁

安全阀　炮铜和不锈钢材质，带不锈钢弹簧

Marine Type Approvals held for these valves:

- DNV
- Lloyd's Register EMEA
- American Bureau of Shipping
- Bureau Veritas
- Russian Maritime Register of Shipping
- Resistro Italiano Navale

Angular shaped spring loaded safety valves made of gunmetal with stainless steel spring and inlet body. Sealing cap prevents unauthorized changing of set pressure. Suitable for the protection of pressure tanks and systems for neutral /non-neutral vapours, gases and liquids, steam boilers and steam plants.

Available models:

- 861sGK non-gastight version with twist-type lifting mechanism
- 861sGL non-gastight version with lifting lever
- 861tGO gastight for gases without lifting device
- 861tFO gastight for liquids without lifting device
- 861tGFO gastight for gases and liquids without lifting device

Available seals:

- PTFE up to 25 bar
- PTFE + carbon from 25.1 bar up to 50 bar

All models are also available in **Stainless Steel:** series **461**.

Safety Valves

Spheroidal Graphite Cast Iron
Angle type with flange connections

Válvulas de seguridad, Fundición de grafito esferoidal
Tipo de ángulo con conexiones de brida
ダクタイル鋳鉄フランジ式安全弁
安全阀、球墨铸铁、带法兰连接的角型

Marine Type Approvals held for these valves:

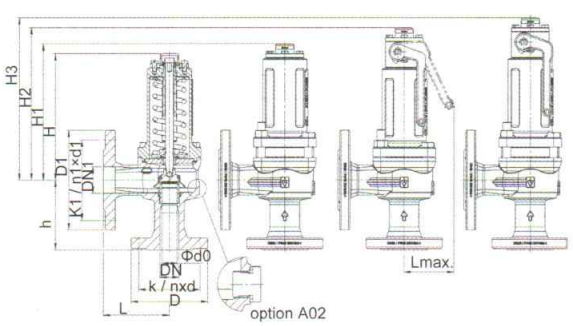
- DNV
- Lloyd's Register EMEA
- American Bureau of Shipping
- Bureau Veritas
- Russian Maritime Register of Shipping

Full-lift safety valve for the protection of pressure tanks and systems for neutral / non-neutral vapours and gases, steam plants and silo containers for liquid, granular and dusty materials[1].

Maintenance-friendly construction, single trim for gases, vapours and liquids, replaceable seat, easily detachable cone-stroke ring connection, freely rotatable spindle-taper connection, extensive range of spare parts, and vertical and horizontal installation position possible. Flanges according to DIN EN 1092-2 standard.

[1]Only for version with bellows and gas-tight spring housing

Available models:



- 355 sGL with lifting lever
- 355 sGO without lifting lever
- 355 bGFL with bellows and lifting lever
- 355 bGFO with bellows, without lifting lever
- 355 tGFL gastight with lifting lever
- 355 tGFO gastight without lifting lever
- 355 tbGFL gastight with bellows and lifting lever
- 355 tbGFO gastight with bellows, without lifting lever

Available seals:

- MD (Metal-to-metal sealing)
- EPDM
- FKM
- FFKM
- PTFE
- PTFE + carbon

American National Standard Institute (ANSI) for Marine Services

The following tables are a cross comparison from JIS (Japan Industrial Standard) to ANSI (American National Standard Institute), and from ANSI to JIS for your reference purpose. The tables are classified according to similar material, working pressure and general design. However, as you understand, the basic specification of material, dimensions and flanges are essentially different between JIS standard and ANSI standard.
We are not held responsible for any possible accident or damage caused by using these tables.

Comparison List - JIS to equivalent design ANSI Valves

Globe Valves

Material & W.P.	Type	JIS No.	Size	CODE	ANSI Model	CODE	Class	Size

ANSI Globe Valves

Globe Valves (ANSI)

Bronze, NPT Female Threaded, Union Bonnet Metal Seated

Válvula de Globo de Bronce (según ANSI)
ANSI型青銅玉形弁　ANSI 型青铜球形阀

Globe valves with union bonnet, SS disc and hardened seat, renewable disc and seat, straight pattern, NPT female threaded connection according to ANSI B1.20.1, inside screwed stem and rising handwheel.
Application: Water, oil, air, gas, saturated steam etc.

Pressure and Temperature Range

	0/65°C	287°C
1/2" - 2"	27.5 bar	13.7 bar
	200 lbs SWP at 550° F and 400 lbs WOG at 150° F (non-shock)	

Material Specification

Component	Material	US
Body	Bronze	ASTM B61
Bonnet	Bronze	ASTM B61
Bonnet Nut	Bronze	ASTM B61
Disc	Stainless steel	AISI 420
Stem	Bronze	ASTM B61
Seat (Hardened)	Stainless steel	AISI 420
Gland Packing	Graphite	
Handwheel	Cast iron

Globe Valves (ANSI)

Cast Steel, ASME Flanges, 150 lbs and 300 lbs

Válvula de Globo de Acero a Carbono (según ANSI)
ANSI型鑄鋼玉形弁　ANSI型碳钢球形阀

Cast steel globe valves with stainless steel trim, pressure rating 150 lbs and 300 lbs, straight pattern, flanged end acc. to ASME B16.5 ("raised face – smooth finish"), outside screw & yoke, rising handwheel. On request, supplied including EN 10204 3.1.B material and test certificate.

Application: Steam, water, oil, vapours and gases.

Pressure and Temperature Range

	ASTM A216 WCB						
	-29/38°C	93°C	149°C	204°C	260°C	316°C	343°C

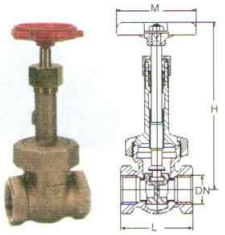
ANSI Gate Valves



Gate Valves (ANSI)

Bronze, NPT Female Threaded Ends, Union Bonnet Pressure Rating 200 lbs

Válvulas de compuerta (ANSI), Bronce, Extremos roscados hembra NPT, Bonete de unión
ANSI 型青銅仕切弁
闸阀（ANSI）、青铜、NPT 内螺纹端、联合阀帽

Bronze gate valves with union bonnet, solid bronze wedge, stainless steel seat, NPT female threaded ends acc. to ANSI B1.20.1, inside screwed stem and rising stem and rising handwheel, complies with requirements of MSS SP-80 type 2.

Application: water, oil, air, gas, saturated steam etc.

Pressure and Temperature Range

	0/20°C	197°C
1/4" - 3"	27.5 bar	13.7 bar
	200 lbs SWP and 400 lbs WOG (non-shock)	

Material Specification

Component	Material	US
Body	Bronze	ASTM B61
Bonnet Nut	Bronze	ASTM B61
Stem	Bronze	ASTM B61
Wedge	Bronze	ASTM B61
Seats (Body)	Stainless steel	AISI 410

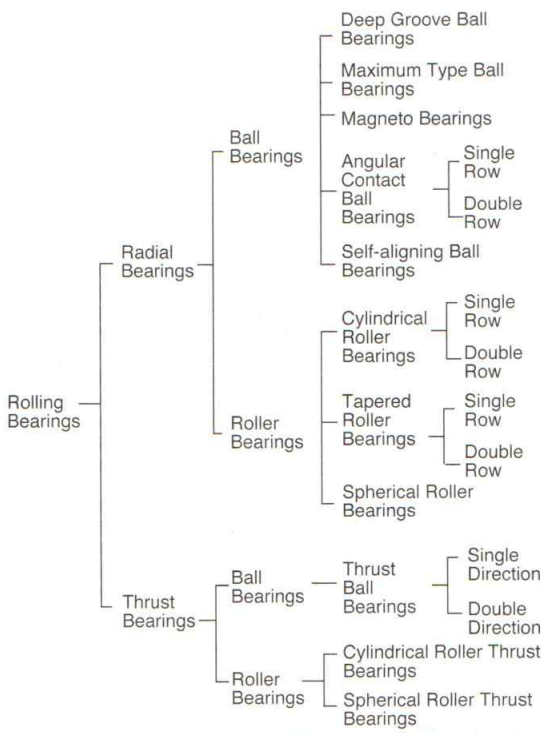
Bearings

Rodamientos　ベアリング　軸承



The necessary information for ordering a certain bearing type is almost always located on the bearing itself in the form of a bearing number. The bearings themselves may only have a basic number on the inner or outer ring but the outer cover or shield of the bearing will usually show the complete bearing number.

If there are several numbers marked on the bearing or the numbers have been worn out and are hard to read, the following numbers and sizes will help you in ordering the proper bearing. The bearing numbers can also be insightful as to what bearings can be used in the place of others in a situation where there are no spares. For example, double shield bearings can be used instead of single shield, or single shield bearings can be used instead of no shield, and snap ring bearings can be substituted for non snap ring bearings.

By showing the bearing numbers as well as prefixes and suffixes, the correct bearing size and construction may be obtained without sending the bearing ashore for identification or waiting until a vendor can board the ship.

Bearings should be kept in their original packing for easy identification and stored in a clean, dry place. If dirt gets mixed in with the workings of the bearings, the life of the bearings will be shortened. Therefore, only clean lubricants should be used with the bearings.

Tables for the Classification of All Bearings

Main Manufacturer's Suffix Table

Manufacturers	Manufacturers Abbreviation	One-side Metal Shielded	Two-side Metal Shielded	With Snap Ring Groove	With Groove & Snap Ring	One-side Rubber Sealed	Two-side Rubber Sealed

Single Row Deep Groove Radial Ball Bearings

Rodamientos Rígidos de Bolas

深みぞ玉軸受　开式单列深槽滚珠轴承

These are the most widely used ball bearing types which incorporate deep, uninterrupted raceways making the bearing suitable for radial loads or a combination of radial and thrust loads in either direction. The simple symmetrical design of these bearings makes them easy to refine to super-precision tolerance for operations at high speed.

Suffixes for Bearings

NO SUFFIX	Open type
Z	One-side metal shielded
ZZ	Two-side metal shielded
N	With snap ring groove
NR	With groove & snap ring
ZNR	One-side metal shielded with snap ring
LU or RS	One-side rubber sealed
LLU or 2RS.....	Two-side rubber sealed
C3	Radial clearance larger than normal
M	Machined brass cage, ball riding
N	Circular groove for snap ring
RSR.....	One seal
T	Moulded snap type cage of glass-fibre reinforced polyamide
ZR.....	One shield
ZRN	One shield•circular groove for snap ring
2RSR.....	Two seals
2ZR.....	Two shields
2ZRN	Two shields•circular groove for snap ring

Single Row Angular Contact Ball Bearings

Rodamientos de Bolas con Contacto Angular

単列アンギュラ型玉軸受　単列向心推力滚珠轴承

The raceways of these bearings have a high shoulder on one side and a very low shoulder on the other side and the inner and outer raceways are assembled opposite to each other so that the bearings are primarily designated to carry thrust load in one direction. This construction permits use of the optimum number and size of balls for maximum load capacity. Since these bearings will carry thrust load in one direction only, they are usually mounted in a pair opposed to each other and the axial clearance is adjusted by shims, threaded members, or preloading springs. The standard contact angle is 30° and bearings made to 40° contact angle have the suffix "B".

Double Row Self-Aligning Ball Bearings

Auto-Alineamiento, Doble Fila/Rodamientos de bolas a Rótula

複列自動調心型玉軸受　双排自动定心滚珠轴承

This design of bearing utilizes two rows of balls with the inner ring having two deep groove raceways while the outer ring has a single continuous spherical raceway. This permits the inner and outer rings to be misaligned relative to each other through a comparatively large angle without imposing moment loads upon the balls. This bearing is frequently used when the inner ring is to be mounted upon an adapter sleeve or when conditions in the machine make it difficult to assure accurate alignment of the inner and outer rings. The boundary dimensions of 1200 and 1300 series are identical with those of 6200 and 6300 single row deep groove bearings. Due to the small contact angle, the thrust capacity of these bearings is limited.

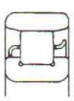
Cylindrical Roller Bearings



Rodamientos de Rodillos Cilíndricos

円筒コロ軸受　圆柱滚珠轴承

The rollers of these bearings are essentially cylindrical in shape providing modified line contact with the cylindrical inner and outer rings raceways. The rollers are accurately guided by ground ribs on either the inner ring or the outer ring, thus making these bearings suitable for heavy radial loads and high speed operation. For best results, these bearings should be accurately aligned. The cylindrical shape of the rollers allows the inner ring to have considerable axial movement relative to the outer ring except for the bearings with the prefix "NH". This feature is valuable in accommodating thermal expansion in applications where both the inner and outer ring must be press-fitted. Since the inner and outer rings can be separated from each other, the assembly of equipment is frequently facilitated.

Tapered Roller Bearings

Rodaentos de Ridukkis Cónicos

円スイコロ軸受　锥体滚柱轴承

This design utilizes conical rollers and raceways arranged so that all elements of the roller & raceway cones meet at a common apex on the axis of rotation. The roller is guided by contact between the large end of the roller and a rib on the inner rings. This construction provides high capacity for radial loads & single direction thrust loads. The bearings are usually mounted in pairs with axial adjustment to provide proper running clearance within the bearings. Being separable, the inner and outer rings may be mounted individually. For heavy thrust loads the type 30300D with large contact angle is preferable.

Spherical Roller Bearings

Rodamientos de Rodillos a Rótula

球面コロ軸受　鼓形滚柱轴承

In this design, two rows of rollers operate in separate raceways ground into the inner ring with a guide rib to guide the rollers. The outer ring has a single spherical raceway, thus allowing the inner ring and rollers to freely compensate for angular errors due to inaccurate machine components or due to elastic deflection of the shaft or housing under loads. As a result of the line contact, a large number of rollers, and the substantial contact angle, these bearings have large radial and thrust load capacity. They are suitable for heavy shock and impact loads.

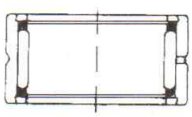
Needle Roller Bearings

Rodamientos de Agujas



ニードルベアリング　无内圈滚针轴承

The needle like small diameter rollers of these bearings are cylindrical in shape and can be fitted to spindles where you do not want a large outside mount as in roller bearings. When ordering, specify the INSIDE and OUTSIDE DIAMETER, the THICKNESS and whether the bearing should be WITH or WITHOUT inner rings.

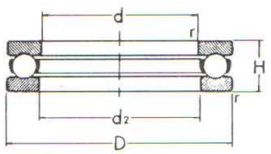
Thrust Ball Bearings

Rodamientos Aiales de Bolas



スラスト玉軸受　平座単向止推滚珠軸承

Thrust ball bearings are composed of washer-like bearing rings with raceway grooves for the balls. The ring attached to the shaft is called the inner ring or shaft washer while that attached to the housing is called the outer ring or housing washer. In double direction thrust ball bearings, there are three rings with the central one being fixed to the shaft. Single direction and double direction thrust ball bearings can support thrust loads in one or both directions respectively. There are also thrust ball bearings with an aligning seat washer beneath the outer ring in order to compensate for shaft misalignment or mounting errors. Pressed-steel cages are usually used in the smaller bearings and machined cages are generally used in the larger ones.

1. Lamps

Introduction for Ordering Lamps

Due to the wide variety of lamps available and in order to assist the purchase of lamps required for each individual purpose, below listed are standard illustrations of designations for bulbs, filaments and bases. Each lamp/bulb can be either specified under its full name or abbreviation.

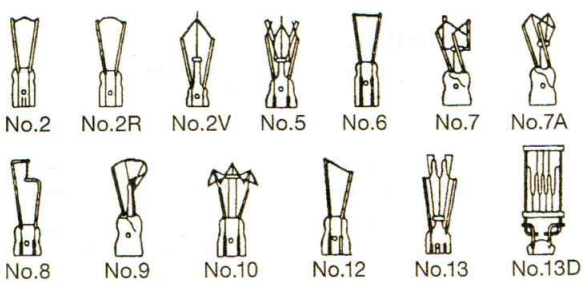
A. Bulb Designations

Bulbs are available in the shapes shown below and each shape is designed for a particular purpose. Soft glass is normally used but hard glass is used for high wattages and outdoor applications. In order to increase the effective illumination the insides of the bulbs receive various coatings, including reflecting aluminium mirrors. Coloured bulbs are also available for special applications.

Type	Name	Abbreviation	Application
	Ordinary Shape	A	General household factory or ships illumination.
	Ball Tubular Shape	BT	Used for mercury or high sodium lamp.
	Flame Shape	C	Ornamental, Decrative Lighting
	Globe (ball) Shape	G	Ornamental, Decrative Lighting
	Pear Shaped Straight Neck	PS	Used for illuminations requiring 80 Watt and more.
	Parabolic Shape	PAR	Outdoor Spot or Flood Lighting
	Reflextion Shape	R	Deck Flood Light etc.
	Straight Shape	S	Low Watt Illumination
	Tubular Shape	T	General Household Factory or Ships Low Watt Illumination
	Tubular (Fluorescent) Shape	T	Fluorescent Lighting

B. Lamp Base Designations

A wide range of bases are provided for above lamps. In addition to the screw bases used for most incandescent lamps, there are also bayonet, pin, lug and other bases. Fluorescent lamps use single-pin, bipin and double-contact recessed bases.



Edison Screw Size Table

Size	Base				Socket			
	O.D.d		Valley d_1		Valley D		I.D. D_1	
	Mini	Maxi	Mini	Maxi	Mini	Maxi	Mini	Maxi
E10	9.31	9.53	8.29	8.51	9.59	9.74	8.57	8.72
E12	11.60	11.81	10.33	10.54	11.94	12.09	10.67	10.82
E14	13.61	13.89	12.01	12.29	13.97	14.16	12.37	12.56
E17	16.28	16.53	14.91	15.16	16.68	16.83	15.31	15.46
E26	26.04	26.34	24.36	24.66	26.45	26.75	24.77	25.07
E27	26.15	26.45	23.96	24.26	26.55	26.85	24.36	24.66
E39	39.05	39.50	36.55	37.00	39.61	40.06	37.07	37.52
E40	39.05	39.50	35.45	35.90	39.60	40.05	36.00	36.45

Caution !

1. E-39 based lamp can not screw into an E-40 socket while an E-40 based lamp can screw into an E-39 socket. Please see the table above and compare figures of E-39 and E-40. (d1 of E-39 is larger than that of E-40.)
2. E-26, E-27 based lamp can screw into an E-26, E-27 socket alternatively. Can be presumed to be the same size.

C. Filament Designations

Frosted Lamps

Vibration Service Medium Screw Base

Lámparas Mate, Base de Bayoneta de Doble Contacto Servicio de Vibración

艷消耐振電球（ねじ込み式） 亚光防震灯泡（螺口式）

Inside frosted, medium screw base, "Vibration service" lamps for ships use. When ordering, specify the voltage and the number of watts required from the lamps listed below.

How to order: CODE

Lamp, frosted, vibration service, E-26, VOLTAGE, WATTAGE

Unit Per Pc.

LED Lamps

Lámparas LED　L E D電球　LED 灯泡

More cost effective innovative lamp compared to conventional incandescent lamps or fluorescent lamps. LED (Light-Emitting Diodes) lamps keep lighting lifespan for several times longer and significantly more efficient than conventional incandescent lamps. Also, it consumes less energy about 90% than conventional incandescent lamps and effects to reduce of carbon dioxide.

Unit Per Pc.

LED Panel Indicating Lights

Luces indicadoras de panel LED

LED パネル表示ライト　LED 面板显示灯

Using a LED lighting structure increases the safety of operations, and the panel indicator lights are armed with valuable reflector optics to illuminate and intensify visibility. LED light will eliminate the downtime necessary for repairs or replacements

as it does not require as much maintenance as other lighting options. Simple push-in installation mounts in any thickness material. Available in five colors: white, red, green, yellow and blue.

Fitting φ22mm, 24V AC/DC

Unit Per Pc.

4. Sodium Lamps / Halogen Lamps

High Pressure Sodium Lamps

Lámparas de Sodio Alta Presión

高圧ナトリウムランプ　球管形高圧钠灯

A high pressure sodium lamp which gives superior colour rendition characteristics, has a rated life of 24,000 hours, a 2100°K colour temperature factor and a very high lumen output almost twice that of comparable mercury vapour lamps. For use with a high pressure sodium lamp ballast.

BT-Bulb	BT-F-Bulb	T-Bulb	R-Bulb

High Pressure Sodium Lamp Ballasts

Reactancias para Lámparas de Sodio Alta Presión

高圧ナトリウム安定器　高压钠蒸汽灯镇流器

These ballasts incorporate a high-voltage pulse generator for starting the lamp. The pulse generation does not effect the lamp during arcing. An emergency thermostat is built in to cut off the power automatically in the event of any fault. As a wide range of products with respective specifications are available, when ordering, please specify the following details.

Guide of How to order

CODE	**79 12 21**
Name	Sodium lamp ballast
Lamp Type	BT
Input Voltage	100 V
Lamp Wattage	700 W
Lamp Ampere	7.9 amp.
Frequency	50/60 Hz
Lamp Dimension	150 mm diam x 375 mm L
Lamp Base	E-39
Etc	If any

Electronic Superimposed Ignitors

for HS Lamps 400 W

Arrancadores de superposición electrónicos

電子多層イグナイター　电子叠加点火器

A standard version compact shape for high pressure sodium lamps (HS).

Phasing of the ignition voltage: 60–90 °el and 240–270 °el.
Max. permitted casing temperature: 105 °C.
Fastening: male nipple with pre-assembled washer and nut.
For luminaires of protection class I and II.
For luminaires of protection class I (140594, 147707).

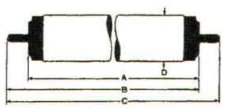
Single Pin End Fluorescent Lamps

Lámparas Fluorescentes de Conector Simple
シングルピン蛍光ランプ　単栓端日光灯

Fluorescent lamps of 20W or 40W for starter less ignition, to be operated by means of special explosion-proof ballasts on A.C. mains; the lamps are designed specifically for application in areas where an explosion hazard exists. "TL"X instant-start lamps, stabilized by special ballasts, are provided with an internal ignition strip connected to one of the electrodes. Since the electrodes are not pre-heated, only one electrical contact is required at each lamp-end. To exclude all possible sparking effects during ignition, the caps and, in particular, the long, thick lamp-pins are constructed so as to ensure maximum contact with the appropriate lamp holders.



Application

In "flameproof" and "increased safety" luminaries designed in accordance with IEC 79/1, 79/7, EN 50018 and 50019, VDE 170/171 and similar specifications, both for indoor and outdoor applications :

Germicidal Lamps

Lámparas Germicidas　殺菌灯　杀菌灯

Specially designed low voltage mercury vapour lamps which radiate ultraviolet rays of 250 - 260 mm. This short wave ray is a very effective bactericide for medical and sanitary purposes, such as the germicide of food stuff in the refrigerator, table ware, cooking utensils in the galley, and barber tools, room air, etc.

This lamp comes in the same type and sizes as common fluorescent tube lamps and can be used within the same fixture.

5 sizes are available. Specify when ordering.

Uit Per Pc.

CODE	Model	Wattage	Size mm Φ	Size mm L	Cap	Glow Starter
79 14 91	GL- 4	4	15.5	134.5	G 5	FG7P (7E)

Caution!

Do not stare directly at the lamp when it is on as GERMICIDAL rays are injurious to the eyes. Wear ordinary safety goggles.

Starters for Fluorescent Lamps

Cebadores para Lámparas Fluorescentes　蛍光ランプスターター　启辉器

Each fluorescent lamp requires a starter for the purpose of preheating before lighting. When ordering, specify type "E" or "P" as well as the wattage of the lamps.

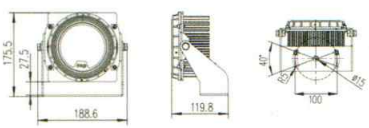
LED Floodlights - IP 66

Proyectores LED IP66 LED 投光器 IP66 LED 泛光灯 IP66

The versatile floodlight made of marine grade aluminum alloy with powder coating and comes with 4mm tempered glass front cover. Reliable AC driver on board to enhance service life. Rapid heat-dispensing design prolongs lamp life and optimizes lumen output. Long service life of 100,000 hours @ 50°C. JIS and IEC safety and EMC compliance. Ingress Protection: 66. Interchangeable modules. Wide or Narrow beam angle available. Triac dimming compatible (220-240VAC & 100V-120VAC only).



Application: Decks, Marinas, Docks, Ports, Warehouses. ABS and IEC60533 certified. Additional optional SUS316 Stainless steel protection guard for 1 module series.

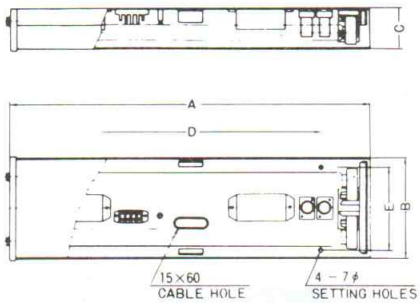
Marine Non-Watertight Fluorescent Ceiling Lights

Luminaria Fluorescente no Estanca
船用萤光天井灯（非防水）　船用天花板日光灯（无防水）



(Ref. JIS F 8436-1983)

Mainly used for lighting living quarters in ships at an ambient temperature of 40°C or less. Made of a steel plate with melamine resin baked finish and milky white acrylic diffuser. Glow starting with high or low power factor ballast. One, two and three lamp types, as well as surface and recessed types are available.

When ordering, please specify the voltage and frequency required.

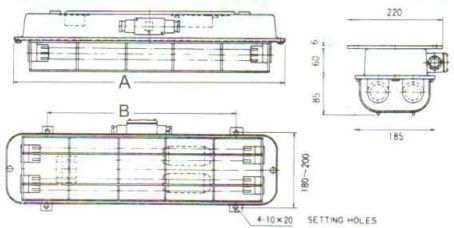
Marine Watertight Fluorescent Ceiling Lights



Luminaria Fluorescente Estanca

船用蛍光天井灯（防水） 船用天花板日光灯（防水）

(Ref. JIS F8437-1983)

Mainly used for the lighting of machinery room, galleys, bath rooms, outdoor passageways, in ships at an ambient temperature of 45°C or less. When ordering, please specify the voltage and frequency required.

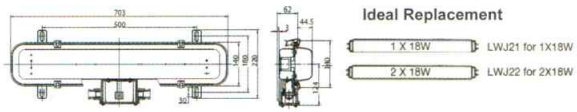
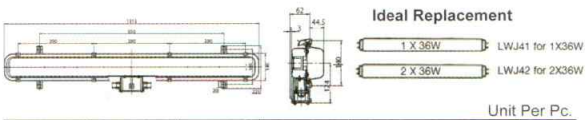
LED Watertight Luminaires



Luminarias estancas LED　LED 防水照明器具　LED 防水灯具

LWJ Series (JIS Type)

Triac dimming compatible, with specially designed polycarbonate diffuser to optimize LED light transmission. Including built-in high thermal efficient linear module that allows for operation at ambient temperature of up to 45ºC without compromising long service life of 50,000 hours L70 @ 45ºC. JIS and IEC safety and EMC compliance. ABS and IEC60533 certified. Surface Mounted. Diffuser material: Poly Carbonate, Housing Material: SUS316 Stainless Steel or Zinc coated steel, Power coated green. Flexible wiring, Heat resistant up to 105°C. Protection Class: IP56.



2FT 10W or 20W Type

Flameproof Fluorescent Ceiling Lights

Luminaria Fluorescente Resistente a la Llama

防爆萤光天井燈　防爆式天花板日光灯

Composed of a flameproof lamp holder unit, an increased safety body and an explosion proof ballast for use in hazardous areas. Meets the requirement of the IEC standards, IP65. The body and socket are made of corrosion-proof aluminium alloy and the bolts are made of stainless steel for corrosion-proof and weather-proof.

IP Rating Chart

The IP (International Protection, or Ingress Protection) Code consists of the letters IP followed by two digits, as defined in international standard IEC 60529.
The first digit indicates the level of protection that the enclosure provides against access to hazardous parts (e.g., electrical conductors, moving parts) and the ingress of solid foreign objects.

First Digit: Solid

Level	Object size protected against	Effective against
0	Not protected	No protection against contact and ingress of objects.
1	>50 mm	Any large surface of the body, such as the back of the hand, but no protection against deliberate contact with a body part.
2	>12.5 mm	Fingers or similar objects.
3	>2.5 mm	Tools, thick wires, etc.
4	>1 mm	Most wires, screws, etc.
5	Dust protected	Ingress of dust is not entirely prevented, but it must not enter in sufficient quantity to interfere with the satisfactory operation of the equipment; complete protection against contact.
6	Dust tight	No ingress of dust; complete protection against contact.

The second digit indicates the protection of the equipment inside the enclosure against harmful ingress of water.

Second Digit: Liquid

Level	Object size protected against	Effective against
0	Not protected	-
1	Dripping water	Dripping water (vertically falling drops) shall have no harmful effect.
2	Dripping water when tilted up to 15°	Vertically dripping water shall have no harmful effect when the enclosure is tilted at an angle up to 15° from its normal position.
3	Spraying water	Water falling as a spray at any angle up to 60° from the vertical shall have no harmful effect.
4	Splashing water	Water splashing against the enclosure from any direction shall have no harmful effect.
5	Water jets	Water projected by a nozzle (6.3mm) against enclosure from any direction shall have no harmful effects.
6	Powerful water jets	Water projected in powerful jets (12.5mm nozzle) against the enclosure from any direction shall have no harmful effects.
7	Immersion up to 1 m	Ingress of water in harmful quantity shall not be possible when the enclosure is immersed in water under defined conditions of pressure and time (up to 1 m of submersion).
8	Immersion beyond 1 m	The equipment is suitable for continuous immersion in water under conditions which shall be specified by the manufacturer. Normally, this will mean that the equipment is hermetically sealed. However, with certain types of equipment, it can mean that water can enter but only in such a manner that it produces no harmful effects.

LED Aisle Lights

Luces LED para pasillos　LED 通路灯　LED 通道灯

A long life, minimize the waste cost for replacement of fluorescent lamp, also respond to Restricting the use of Hazardous Substance (RoHS). Thin-design and a self-powered ceiling, suitable for aisle light. Material: Metal frame – Aluminium, Rest frame: Polycarbonate. Operating temperature: -30 to +50°C.

Explosion Proof LED Bulkhead Lights

Luces de mamparo LED antideflagrantes

防爆 LED 壁付灯　防爆 LED 壁灯

Standard

Emergency

A compact, versatile, and robust light ideal for safely illuminating walkways, steps and entrances within hazardous areas. ATEX, IECEx and UKEX certified for safe use in Zones 1/21, all models in the range feature Wolf's patented DLO (Directional Linear Optics) technology, which means the beam can be directed exactly where needed, with no light overspill or wasted lumens, and there's no glare - even when installed at eye level.

The Emergency LED Bulkhead has all the features and benefits of the standard Bulkhead range, with the additional safety of an emergency back-up should power fail in the Hazardous Area. Different emergency mode durations are available and selectable on board by the installer.

Explosion Proof LED Linear Lights

Luces lineales LED antideflagrantes
防爆 LED リニアライト　防爆 LED 线性灯

Standard

Emergency

ATEX, IECEx and UKEX certified for safe use in Zones 1 and 21 potentially explosive atmospheres. Ideal for illuminating hazardous area walkways, corridors, and long and large open areas, all products are IP66/67 rated, tough, reliable, and ideal for indoor or outdoor use in new installations and for replacing existing fluorescent or LED installations for improved performance and lower energy consumption. Available with Forward Facing Array LEDs or Directional Linear Optics LEDs for low glare.

The Emergency linear has all the features and benefits of the standard range with the additional safety of an emergency back-up should power fail in the Hazardous Area. Different emergency mode durations are available and selectable on board by the installer. Available with Forward Facing Array LEDs or Directional Linear Optics LEDs for low glare.

Watertight Type Passage Lights

Luces para Pasillo Tipo Estanco　船用防水型通路燈　通道灯

(Ref. JIS F8441)

Watertight passage lights using incandescent lamps of 40 watts or less at 110V or less as a light source, mainly applied for weather decks aboard in a place of ambient temperature 40°C or less.

Specification

Material	1. Body Cast Iron 2. Guard Cast Iron 3. Globe Glass 4. Gasket Synthetic Rubber 5. Gasket Synthetic Rubber 6. Screw Brass
Size mm	Overall Length 250 mm Overall Width 170 mm Overall Depth 130 mm
Voltage	110 V
Wattage	40 W

79 21 01	Passage light, watertight, with guard, E-26 × 40W	Pc.
79 21 02	Passage light, watertight, without guard, E-26 × 40W	Pc.

Flexible LED Chart Table Light

Lámpara LED flexible de sobremesa
LED チャートテーブルライト　灵活的 LED 图表台灯

Made of an Anodized aluminum body, the 53cm flexible gooseneck light features CREE XP-G LED light source. 3-step dimming. Push-pull focusing lens. Long LED Lifespan of 60,000 hours at L70. USB Type-C power input. Vibration resistant. JIS and IEC safety and EMC compliance. Ingress Protection: 20. Application: Bridges and Cabins Weight: 0.216 kg. Available equipped type with red diffuser.

79 21 22	Flexible LED chart table light, 100-240V AC, 2W 6,500 K, 200 lm	Pc.

Universal Table Lights

Luces Universales para Mesa　卓上燈　万向桌灯

Designed for lighting study areas. Lighter and easy to handle due to spring suspension. Can be fitted on a desk or wall by simply exchanging bases.

Available in incandescent lamp and fluorescent lamp types. FL type of 220V requires a special ballast.

LED Downlights

Luces LED descendentes　LED ダウンライト　LED 筒灯

DL Series Swint Downlight

Made of marine grade aluminium alloy with powder coating, and polycarbonate diffuser. Built-in with integrated driver for ease of installation, and vibration-resistant. Energy savings of up to 86% compared to 50W halogen. Superior heat sink designed to enhance the service life. Long service life of 50,000 hours L70 @ 40°C. JIS and IEC safety and EMC compliance. ABS and IEC60533 certified. Application: Cabins, Passageways, Galleys, Meeting rooms. Protection Class: IP44 in conjunction with ceiling. Note: Replace whole unit when light is not working.

Ideal Replacement: DL7A2S (7W) for CFL 50W

Unit Per Pc.

CODE	**79 21 31**
Model	LDAS074KA22W
Main Voltage	220 – 240V AC
Power	7W
CCT	4,000K
Beam Angle	105°
System Lumen	566 lm
Dimensions	Dia 97 × H 40.5 mm
Weight	0.2 kg

DL Series Downlight

Made of marine grade aluminium alloy with powder coating, comes with polycarbonate diffuser. Triac dimming compatible (220-240 VAC only). Designed with reliable AC driver on board to enhance the service life. Vibration-resistant. Energy savings of up to 60% compared to compact fluorescent system. Long service life of 50,000 hours L70 @ 40°C. JIS and IEC safety and EMC compliance. ABS and IEC60533 certified. Application: Cabins, Passageways, Galleys, Meeting rooms. Protection Class: IP44 in conjunction with ceiling.

*Note: Replace whole unit when light is not working.

Ideal Replacement:
DLA12040 (12W) for 18W CFL
DLA15040 (15W) for 26W CFL

Unit Per Pc.

Watertight Fluorescent Hand Lamps *(Line Lights)*

Lámparas Manuales Fluorescentes (Luces de Linea)
作業用防水蛍光灯　防水工作日光灯

This polycarbonate cylindrical type fluorescent hand lamp with built in ballast has the following advantages:

1. This line light will not break easily if it is hit or dropped.
2. It is waterproof.
3. If the fluorescent lamp is broken inside, this line light is not liable to ignite.
4. Since pieces of broken glass will not scatter, it will not cause damage to any apparatus.
5. This line light is cold-proof so that it can be used in any cold place.

Rechargeable Safety Hand Lamp Zone 0, 1, 2

Lámparas de mano recargables conformes a la normativa ATEX
充電式 ATEX 規則適合ハンドランプ　符合 ATEX 标准的可充电手灯

Intrinsically Safe Hand Lamp is ATEX Directive certified for safe use in hazardous locations in zones 0, 1 & 2 and zones 20, 21&22. Suitable for use in offshore oil and gas, marine vessels, refinery and petrochemical industries. Compatible Charger input voltage AC 90-260V,50/60Hz

Unit Per Pc.

Safety Torches

Compliant with ATEX Directive, Zone 1, 2

Normativa ATEX para lámparas de seguridad
ATEX 規則適合安全灯　符合 ATEX 标准的安全灯

The ATEX safety torch is a reliable, simple and cost-effective portable torch. Available with a straight or right-angle body, and Vacuum or Xenon bulbs, it's CE marked to the ATEX directive and IECEx certified for safe use.

The Wolf ATEX torch range is sealed dust tight and protected from water immersion, with a certified IP67 enclosure.

Personal Issue Safety Torches

Linterna de Seguridad Personal　小型防爆トーチ　小型安全手電筒

Mini and Micro torches are tough, reliable and compact enough to easily store in your pocket. Using the latest LED light source technology, light output is highly impressive, with the new M-70 Mini torch achieving up to 107 lumens (at source) from its 2 X AAA batteries. ATEX and IECEx certified for safe use in potentially explosive gas, vapour, mist or dust atmospheres where a T4 or T5 temperature class permits, all models are approved to Group I for use in mining applications.

Rechargeable Batteries

Pilas Recargables 充電式乾電池 充电式干电池

Rechargeable batteries can be brought back to life hundreds of times and are completely sealed and free from leakage. They have good temperature characteristics and superior voltage regulation at either high or low discharge currents. They are the same size as ordinary dry cells but can be employed at a minimum cost and maximum convenience for a wide variety of uses. Necessary recharging time is 14 – 16 hours.

Maintenance-free Sealed Wet Cell Batteries

Baterías (Acumuladores Sellados) de Mantenimiento Libre
メンテナンスフリー蓄電池　不需维护的密封蓄电池

Needs no maintenance through its life. Each cell is sealed and filled with gelled electrolyte. 24 hours required for battery charging prior to delivery because the batteries are kept uncharged in stock.

How to order: CODE

Battery, maintenance-free, wet cell, 12 volt, AMPERE/5 hours, SIZE

Lead-Acid Marine Batteries

Baterías Marina de Ácido-Plomo　船用鉛蓄電池　船用铅蓄电池

Used on board as an electric source for communication, illumination, emergency equipment, automation, etc.

It is constructed so that it will function even when tilted at a 40° incline because the electrolytes will not spill out.

Unit Per Pc.

11. Plugs & Receptacles

Watertight Plugs & Receptacles

Conformed to IEC 309-1 and 309-2

Enchufe y Caja de Contacto (Conforme a IEC 309-1 y 309-2)
IEC 基準適合型防水プラグ・レセプタクル
IEC 标准防水电源插头

Designed to meet IEC (International Electrotechnical Commission) standards and colour coding system. The configurations for plugs and receptacles are single-rated which assures proper mating of devices with the same voltage and amperage. So it is impossible to couple a plug and receptacle of different voltage and/or amperage ratings to avoid causing damage to the equipment or even personal injury. The receptacles with Interlock device eliminate the possibility of making or breaking the circuit under load or making a haphazard connection.

Rated Voltage : 500V
Rated Current : 16/20A
Protection Degree : IP56

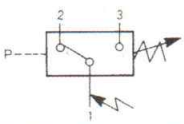
79 Electrical Equipment

Pressure Switches

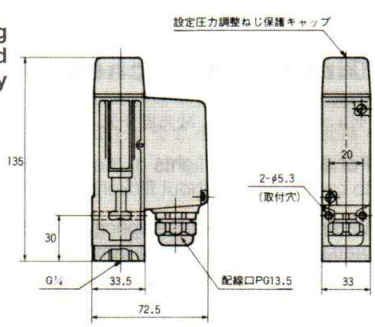


Presostatos 圧力スイッチ 压力开关

For opening or closing circuit at a set point within the adjusting range, operated by increasing or decreasing pressure. There are models actuated by diaphragm, piston, etc. The most common models are described below for your reference. Please ask for further information and brochures of various manufacturers and models available from local suppliers when required.

Diaphragm Actuated

For neutral gaseous and liquid fluids. Switching pressure range 0.02 ... 30 bar.

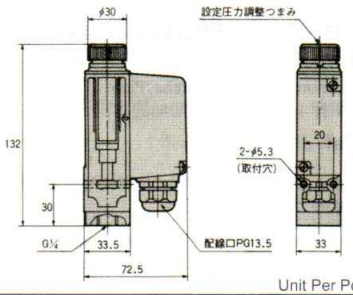


Switching function:
Microswitch SPDT
Terminals 1-3: Contacts close on rising pressure
Terminals 1-2: Contacts open on rising pressure

- Pressure switches for air, gas, water, hydraulic oil, lubricating oil, light fuel oil.
- Working viscosity up to 1,000 mm^2/s.

Small size and preferred for pressure monitoring. Sealed design permits setting of differential switching points during operation without tools. Approved by shipping authorities, including, Bureau Veritas (BV), Det Norske Veritas (DNV), Lloyd's Register of Shipping (LR), Polski Rejestr Statkow (PRS), USSR Register of Shipping (USSR), etc..

Repeatability	±2%
Switch Element	Microswitch
Protection Class	IP64
Ambient Temperature	-10 to + 80°C
Fluid Temperature	0 to +80°C
Max. Temperature at Switching Element	+80°C
Mounting Position	Optional



Setting of switching point by allen head screw protected by plastic cover

Unit Per Pc.

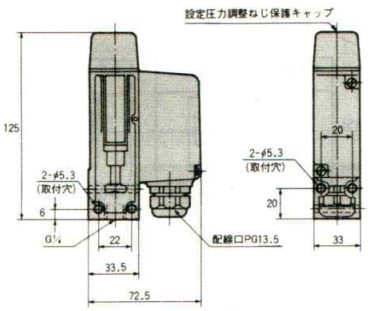
Piston Actuated

For neutral gaseous and liquid fluids. Switching pressure range 0.02 ... 30 bar. With soft seal, no leakage.

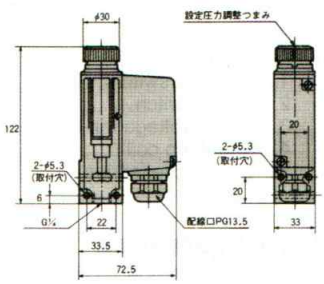


Switching function:
Microswitch SPDT
Terminals 1-3: Contacts close on rising pressure
Terminals 1-2: Contacts open on rising pressure

- For oil-treated compressed air, hydraulic oil and other fluids with good antifriction properties (state kind of fluid).
- Working viscosity up to 1,000 mm^2/s.

Small design and provided with scale for easy adjustment of switching points even during operation. Design with glydring seal for application in temperatures below 0 °C. Approved by shipping authorities, including Bureau Veritas (BV), Det Norske Veritas (DNV), Lloyd's Register of Shipping (LR), Polski Rejestr Statkow (PRS), USSR Register of Shipping (USSR), etc..

Repeatability	±2%
Switching Element	Microswitch
Protection Class	IP 54
Ambient Temperature	0 to +80°C (Grooved ring seal) -20 to 80°C (Glydring seal)
Fluid Temperature	0 to 80°C
Max. Temperature at Switching Element	+80°C
Mounting Position	Urgent



Switching pressure difference not adjustable. Setting of switching point by screw with hex. recessed hole protected by plastic cover.

Unit Per Pc.

Circuit Breakers

Interruptores automáticos　サーキットブレーカー　断路器

Used for the protection of circuits and electrical equipment. Capable of starting or halting current automatically to avoid damage to equipment due to circuit overload or short circuits.
Circuit breakers are mainly classified and selected according to rated current and rated breaking capacity of the circuit and where it is used.
The following matters should be specified when ordering circuit breakers.

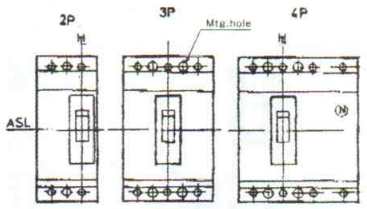
1. **Manufacturer name and model number.**
   With this information the rated breaking capacity of the circuit can be found.
2. **No. of poles:**
   a) 2 pole (Usually used with branched circuits)
   b) 3 pole (Usually used for marine circuits)
   c) 4 pole (Usually used in industrial plants)
3. **Frame size:**
   ex. 30A, 50A, 100A, 225A, 400A, 600A.
   If the type or model number is understood, this information will not be necessary.
4. **Rated current (Trip current)**
   This current value is usually smaller than the frame size.

ex. Frame size	Rated current
30A	10A, 15A, 20A, 30A
50A	10A ~ 50A
60A	10A ~ 60A
100A	10A ~ 100A

If the breaker is only instantaneous trip type, the value of the instantaneous trip current should be specified.

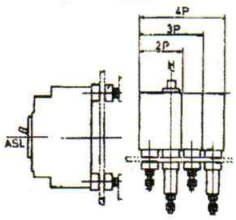
5. Method of mounting

a) Front connected type (FC)
- Cable or busbars are connected directly to the terminal or breaker from the front side and the breaker is fitted directly to the rear iron frame.
- This type is seldom used for marine use. This type may only be used with a branch circuit and is not usually used in Main Switchboards.
- Normally used for industrial purposes.



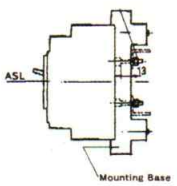
b) Rear-connected type (RC)
- Cable or busbars are connected directly to the rear terminal or the breaker on the rear side. This type cannot be fitted directly to the front side because the breaker is fitted directly to the rear iron frame.
- This type is seldom used for marine use but is still used more often than the Front - connected type.

c) Plug in type (PM)
Cable or busbars are connected to the mounting base of the breaker, not directly to the breaker. In this way, the breaker itself can be removed from the mounting base without disconnecting the cable or busbars. This type is therefore most used for marine purposes.



6. Accessories

Accessories are sometime fitted to the breaker depending on the systems and functions of the equipment they are used in.



1. Auxiliary switch (Ax. Sw.)
Auxiliary switch opens or closes corresponding to the opening or closing of the circuit breaker. If the auxiliary switch is fitted in the breaker, the following information is required when ordering.
   a. One normal open contact
   b. One normal closed contact
   c. One normal and closed common contact
   d. Two normal open contacts
   e. Two normal closed contacts
   f. Two normal and closed common contacts
2. Alarm switch (Al, Sw.)
Alarm switch opens or closes when the breaker trips.
If the alarm switch is fitted to the breaker, the following-information is required when ordering.
   a. one normal open contact
   b. one normal closed contact
   c. others (Please specify how many open or closed contacts there are)
3. Under voltage trip coil
When the circuit voltage to the breaker is insufficient, the breaker trips automatically.
If the under voltage trip coil is fitted to the breaker, information about the voltage and frequency to the coil itself is needed:
AC or DC_____V, _____ Hz.
4. Shunt trip coil
The breaker trips by means of energizing the voltage to the shunt coil.
If the shunt coil is fitted to the breaker, information about the voltage and frequency to the coil itself is needed:
AC or DC_____V, _____ Hz.
5. Other accessories
Accessories other than those listed above in lines 1~4 are sometimes fitted to the breaker. In such cases information about the name and type/model no. of the accessories is required when ordering.

Front-connected

Rear-connected

Plug-in

How to order: 79 - 31 - 61

Circuit Breaker with the following information:

1) Type of model number TO-100BA
2) No. of poles ..... 3 pole
3) Frame size 100A
4) Rated current 75A
5) Method of mounting ..... plug in type
Please specify whether the mounting base is necessary, or not.
6) Accessories
   1. Auxiliary switch .....one normal open
   2. Alarm switch ..... NIL
   3. Under voltage trip coil .....necessary AC440V, 60Hz
   4. Shunt trip coil..... NIL
   5. Other accessories ..... NIL

Transformers

Transformadores 変圧器 变压器

Two Way

Transformadores de dos vías 両用型変圧器 双向变压器

A compact, high efficiency 2-way volt converter. Appropriate for use with electrical house appliances.

How to order: CODE

Explosion Proof Sounders & Beacons

Sirenas y balizas antideflagrantes

防爆型サウンダー＆ビーコン　船用多级测深仪

Sounders and beacons for use in potentially explosive atmospheres and very harsh environmental conditions. Typical applications are Oil and Gas, On-shore and Offshore, Chemical, Petrochemical, Refineries & Marine locations etc. The unit incorporates a 3 or 4 stage alarm option with 60 tones to choose from which includes four tones that can be recorded or customized by the installer. All tones can be pre-set during installation.

Beacons have a choice of two types of light source: either Xenon (strobe) with multiple flash rate and power ratings or an LED array with three status type indication options and two power ratings.

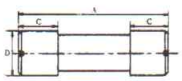
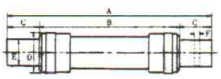
Cello-Lite Cartridge Fuses

Type NC & Type NB



Fusibles de Cartucho Cello-Lite - Tipo NC y Tipo NB



NC.NB 型セロライトヒューズ　密闭型保险丝

Totally enclosed cartridge type fuse with a large breaking capacity. Excellent current limiting characteristics with no danger of explosion or flaming at breaking. Economical because the fusing element unit is replaceable. These types are approved by N.K., Lloyd, BV, ABS, and G. Lloyd.

Cello-Lite Cartridge Fuses

Type UC & Type UB

Fusibles de Cartucho Cello-Lite - Tipo UC y Tipo UB
UC・UB 型セロライトヒューズ　UC 及 UB 型匣式保险丝

Cartridge type non-renewable fuse with high breaking capacity and current-limiting.

Complies with the specification of JIS C 8314 for particular requirements for low-voltage cartridge fuses, and duly approved by Nippon Kaiji Kyokai (NK), The Lloyd's Register (LR), American Bureau of Shipping (ABS), and Bureau Veritas (BV). Due to totally enclosed non-renewable construction, it insures safe operation, not allowing any flame or gas to burst at the moment of interruption.

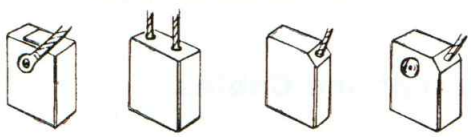
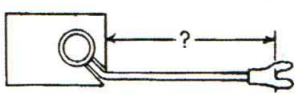
Carbon Brushes

Escobillas de Carbón　カーボンブラシ　碳刷



When ordering, Carbon Brushes be sure to give the style as shown with the following information. Length, width, and thickness are shown as A, B, C in the illustration.



Kind of terminal and size

Kind of wire material and how it is fixed.

Length of shunt

How to order: 79 - 40 - 96

Carbon brush, size, kind of terminal, wire material, how it is fixed, shunt length (pc.)

17. Cables

Welding Cables

Butyle Rubber Sheathed

1,000V or less – single conductor

Cables para Soldadura　溶接用電線　电焊电缆

Welding cable for general use. Cloth or paper wrapped wire sealed in rubber sheath.

Unit Per Mtr.

CODE	mm²	Strand O.D. mm	Cable O.D. mm	Cable Construction mm	Kg Per mtr

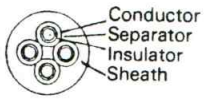
Rubber Cabtyre Cables



Natural Rubber Sheathed

600V or less – 1 to 4 conductors

Cables Eléctrico Bupreno　ゴムキャブタイヤケーブル　橡胶电缆

Designed for electric tools and lighting fixtures. Natural rubber sheath encloses each conductor. Conductors completed with natural rubber sheath as a final seal. Fixed length is 200 mtrs/coil.

Halogen-free Covered Cables

Cable Libre de Halógeno　ハロゲンフリーケーブル　無卤電缆

The remarkably improved fire safety and environmental friendly cables for the ship, not emitting toxic burning fumes or thick smoke owing to Halogen-free insulation cover. Halogen-free refrers to the absence of Halogens, such as Chlorine and Fluorine, and they don't emit any harmful Hydraulic Chloride

gas while existing PVC (Polyvinyl Chlorine) dose. In addition to above attractive features, the Halogen-free covered cable reduces cable weight and size to a minimum and still maintain quality, enabling easy installation. The Halogen-free range of cables are frame-retardant (IEC 60332-3).

The following designations are used for insulation materials and sheathing materials, and all materials are halogen-free; Insulation: XLPE stands for Cross-linked Polyethylene compound, and it has excellent mechanical and electrical characteristics. Sheathing: The designation SHF1 stands for Thermoplastic compound, and this material is Halogen-free, highly flame-retardant and has low smoke emission.

The listed cables are for fixed installation on all areas and on open deck in ships. However, if the cable is exposed to direct sun light protective covering or cable with black outer sheath is recommended.

Unarmoured Power and Control Cable 0.6/1 kV HF-CXO

Design	IEC 60092-353, design
1. Conductor - Standard copper conductor	IEC 60228. class 2
2.Insulation - XLPE plastic	IEC 60092-351
3.Bedding - Separator tape	-
4.Sheath - Polyolefine plastic, SHF1 - Standard colour Black	IEC 60092-359

Main Characteristics

Rated Voltage	0.6/1 kV (1.2 kV)
Max. Conductor Temperature	+90°C
Flame-retardant	IEC 60332-1-22 Category A
Halogen-free	IEC 60754 series
Smoke Emission	IEC 61034 series
Min. Recommended Installation Temperature	-15°C
Lowest Operation Temperature	-40°C
Approvals	ABS / BV / CCS / DNV / KRS / LRS / NK / RINA

Armoured Power and Control Cable 0.6/1 kV HF-CXOSA

Design	IEC 60092-353, design
1. Conductor - Standard copper conductor	IEC 60228. class 2, class 5
2. Insulation - XLPE plastic	IEC 60092-351
3. Bedding - Separator Filler tape	-
4. Armour - Copper wire braid, - coverage > 90%	IEC 60092-350
5. Sheath - Polyolefine plastic, SHF1 - Standard colour Black	IEC 60092-359

Main Characteristics

Rated Voltage	0.6/1 kV (1.2 kV)
Max. Conductor Temperature	+90°C
Flame-retardant	IEC 60332-3-22
Halogen-free	IEC 60754 series
Smoke Emission	IEC 61034 series
Min. Recommended Installation Temperature	-15°C
Lowest Operation Temperature	-40°C
Approvals	ABS / BV / CCS / DNV / KRS / LRS / NK / RINA

Unit Per Mtr.

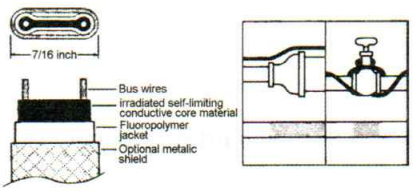
When ordering, please specify the name, capacity, type, number of the core and size of the nominal sectional area.



How to order: 79 - 43 - 80
Polychloroprene sheathed EP rubber insulated flexible power cable, type x core x sectional area

Self Limiting Parallel Circuit Heaters Auto-Trace

Calentadores Circuitos Paralelos con Limitación Propia Auto-Trace
自己制御型ヒーター　自控式加热器

Auto-Trace is the electrical parallel circuit heat-tracing system. This unique technology enables the heater to vary its power output in response to sensed temperature at every point along its entire circuit. As the temperature increases, Auto-Trace automatically decreases its heat output, and vice versa. In this way, the heater continually compensates for temperature fluctuations that can lead to system failure with conventional heat tracing methods.

Has the following system features:

1. Full range of heaters for a variety of applications.
2. Complete selection of component and control system.
3. Parallel circuitry for cut-to-length convenience at the jobsite.
4. Flexibility for easy field installation.
5. Self-regulation protects against over-heating at any wattage, even when the heater is overlapped.

From among various types, the most common circuit heaters are listed below.

BTV	Electrical heat-tracing for frost protection without steam cleaning. Used for frost protection of pipes and vessels. Also, used for process temperature maintenance up to 65°C.
QTVR	Electrical heat-tracing for process temperature maintenance applications up to 110°C which are not subject to steam cleaning. Used for process temperature maintenance of pipes and vessels. Also, used for frost protection of large pipes and for applications requiring medium temperature exposure capability.
KTV	Electrical heat-tracing for process temperature maintenance applications up to 150°C which may be subject to steam cleaning. Used for process temperature maintenance of pipes and vessels. Also, used for frost protection of large pipes and for applications requiring high temperature exposure capability.

These circuit heaters are sold by meter, various spare parts are available as extra accessories. For further information, please write for or ask your supplier for catalogues.

CR denotes Modified polyolefin outer jacket.

Extension Cord Reels

Prolongadores de Cables　延長コードリール　延长线轮

Portable reels which are suitable for use in a work place which is separated from an electrical power source. Available for use with cord lengths from 20 mtrs to 50 mtrs. Contains built in outlets that provide power connections for tools and equipment.

When ordering, please specify the required cord length, voltage, ampere, type of plug and receptacle currently in use so that reel can be used properly with your equipment.

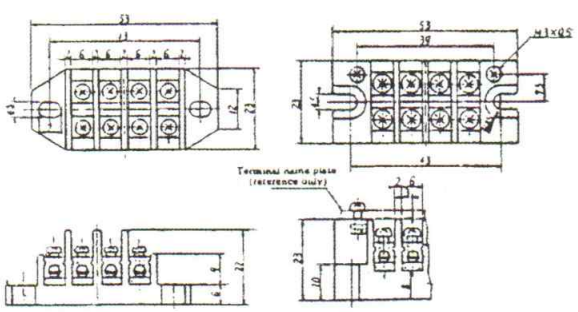
Terminal Boards for Marine Use



Electric Solderless Connecting Terminals

Cuadro (Placa) de Bornes　船用端子盤　船用接线端板

(Ref. JIS F 8812)

For connecting cables of electric appliances of a rated voltage of 250 V or less. Made of phenol resin. Available in O and S type boards. The O type denotes terminal boards without name plates and the S type denotes terminals with name plates.

Type O　　Type S

19. Solders

Quick Rechargeable Soldering Irons

Soldadores Eléctrico Recargables
充電式コードレス半田ゴテ　快充电式电烙铁

A cordless portable soldering iron heated by a nickel cadmium 2.5V rechargeable battery. About 200 soldering jobs can be performed at one time in one hour of quick charging. Separate battery charger operates charging automatically when the iron is placed on it. The pilot lamp of the iron helps when working in dark places. A set includes a charger and two fine tips (No. 7545, No. 7577). For further information, please write or ask for a catalogue.

Resin Cored Soldering Wire

Hilo Estaño para Soldar　やに入り糸半田　樹脂心焊丝

Ready for use soldering wire with resin core. 450 grm spooled.

79 51 70	Soldering wire resin coped, 450 grm	Spl.

Soldering Bars

Barras Estaño-Plomo para Soldar　棒半田　焊棒

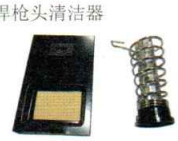
For general soldering work. Contains 50 percent tin and lead.

79 51 72	Soldering bar	Kgs.

Soldering Paste

Pasta para Soldar　半田ペースト　焊膏

Paste flux for all metals except aluminium. Takes the place of acid in all soldering jobs. Supplied in 50 grm tins.



79 51 74	Soldering paste 50 grm	Tin

Soldering Iron Tip Cleaners

Limpiador Portasoldador　こて先クリーナー　焊枪头清洁器

For removing oxide and cleaning soldering iron tips. Size : 110 x 75 x 25 mm.

79 51 76	Tip cleaner for soldering iron	Pc.

Desoldering Guns

(Solder Suckers)

Desoldador con Bomba　半田吸取器　去焊枪

Hand operated high power suction cleaner ideal for electronic printed circuit board repairing. Overall length 215 mm. Inside diameter of the nozzle is 3 mm.

Desoldering Gun

Spare Nozzle

79 51 78	Desoldering gun vacuum suction type	Pc.
79 51 79	Spare nozzle for desoldering gun	Pc.

20. Electrical Insulation Materials

Ebonite Solid Bars

Barras Maciza de Ebonita　エボナイト棒　硬橡胶棒

Standard length is one meter.

Heat Release Silicone Rubber Sheet

Hoja de caucho de silicona de liberación de calor
熱放射シリコンシート　热辐射硅片

An adhesive silicone rubber sheet to release heat from heat-generating devices such as control panels or other electrical devices efficiently without power consumption. Suitable for electronic substrates that cannot use heat sink, just put it on electrical systems to prevent overheating. It helps not only saving electricity consumption but also improving the usage environment and extending its operation life. It is made with 3 layers (heat releasing lamia, aluminum lamia, heat conduction lamia) and available in 3 colours (white, black, ivory).

Specification and Characteristic

Material	Silicon Rubber
Purposes	Control Panel, Server, etc.
Thickness	30 µm (heat releasing lamina) 30 µm (aluminum lamina) 30 µm (heat conduction lamina)
Heat Emissivity	0.85<
Thermal Conductivity	0.7 (W/m·K)

Unit Per Sht.

CODE	Colour	Size
79 54 69	Black	200 × 300 mm
70		300 × 1,000 mm
79 54 79	White	200 × 300 mm

79 54 89	Ivory	200 × 300 mm
90		300 × 1,000 mm

Heat Shrink Plastic Tubing

Tuberías de plástico de encogimiento por calentamiento
ヒートシュリンクチューブ　热收缩套管

Used to insulate wires, or to bundle them together, providing abrasion resistance and environmental protection for stranded and solid wire conductors, connections, joints and terminals in electrical work. Shrink tubing will shrink one half of its nominal diameter, and less than 7% of its length, when heated.

Please specify colour of tubing, with nominal size, finish length, material of tubing.

Tubing, heat shrink, plastic, NOMINAL SIZE, FINISH LENGTH, COLOUR (mtr)

Insulation Putty

(Neoseal)

Masilla Dieléctrica　絶縁パテ　绝缘油泥

An insulation sealing compound called "Neoseal". This is a common solution for sealing cable entrances through walls or floors...terminal boxes. Furnished in 1 kg pkt.

79 55 01	Putty insultion 1 kg	Pkt.

Electric Contact Restorer

Restaurador Contacto Eléctrico　接点復活剤　电接点还原剂

Used for electrical machinery. Cleans contact points with a protective oil film and immediately restores long-lasting, good contact. (Do not apply to relay contacts.) Contains no CFC's (Chlorofluorocarbons).

Unit Per Tin

CODE	**79 55 05**	**79 55 06**
grm	157	250

Electric Contact Relay Cleaners

Limpiadores Contacto Eléctrico "Contact Cleaner"
リレークリーナー　电气接点清洁剂

Cleaner for relay contacts. Simply spray it on contact points. It dissolves and removes film and dirt, to ensure reliable contact. Does not affect metals or resin. Contains no CFC's (Chlorofluorocarbons).

Unit Per Tin

CODE	**79 55 10**	**79 55 11**
grm	100	260

Electrical Industry Formula

Fórmula de Industrial Eléctrico Limpiador
"CRC" 2-26 フォーミュラ　电气工业配方

Prevents malfunction due to the deteriorating effects of moisture and corrosion; extends operational life and reduces down-time and maintenance. Displaces moisture, lubricates and penetrates. Restores and maintains the resistivity of insulating material and improves the conductivity of contacts, commutators, etc. 16 oz aerosols.

45 05 91	Electrical industry formula CRC 2-26, 16 oz tin	Tin

Insulation Varnishes

Barnices Aislantes　絶縁ニス　绝缘漆

For general use with insulation or electrical apparatus. Red and clear types available. Furnished in 300 cc spray tins or 4 ltr liquid cans.

How to order: CODE

Insulation varnish, COLOUR, CONTENTS

CODE	Colour	Contents	Unit
79 55 21	Clear	Spray, 300 cc	Tin
79 55 22		Liquid, 4 ltr	Can

Reflex Horn Speakers

Altavoces reflex de bocina
リフレックスホーンスピーカー　反射式号角扬声器

Aluminium alloy made loud speakers for fixed installation. Its external speaker component finished with powder coating ensure the unit's weatherproof capability. Large input type speakers as well as spark proof speakers not listed here are also available if required.

79 57 11　79 57 12　79 57 13　79 57 14

Unit Per Pc.

Solar-powered Digital Multi Testers

Multimetros Digitales, de Energía Solar
ソーラー式デジタルテスター　太阳能数字式多用途表

Pocket type and high performance, magnesium dioxide lithium secondary battery powered with amorphous solar battery to store solar energy.

Basic Futures:
3-3/4 digits 4,000 count / 0.7% best accuracy / Range hold / Auto power off (15 min.) / Low power ohm (input voltage 0.4V) at continuity range / Power saving design.

Specifications

Model	PS8a	
Type	Solor powered	
DCV	400m/4/40/400/500V	±(0.7%+3)
ACV	4/40/400/500V	±(2.3%+5)
Resistance	400/4k/40k/400k/4M/40MΩ	±(2.0%+5)
Continuity	Buzzer sounds at less than 10-120Ω	Open voltage 0.4V
Bandwidth	40 - 400 Hz	
Power Source	Amorphous solar battery + manganese dioxide lithium secondary battery	
Size mm	H115 × W57 × D18	
Weight grm	85	

Name of Mfr.: Sanwa Electric Instrument Co.,Ltd.

79 57 69	Digital multi tester, solar powered model PS8A	Pc.

Digital Multimeter

Multímetro digital
デジタルマルチメーター　数字万用表

Pocketable high performance digital multimeter that has accurate electrical measurements plus temperature, frequency and duty cycle. Also easy to use with gloves.

Basic Futures:
Ideal for Industrial / Commercial applications
600 V Cat III safety rating.
6,000 count white LED backlit display Over-voltage indicator
Diode test, data hod, Auto Power Off

Unit Per Set

CODE	79 57 70
Model	DMM2100
AC Voltage	750 V, accuracy ± (1.0%+3)
DC Voltage	1,000 V, accuracy± (0.5%+3)
AC/DC Current	0.1µA to 20A, accuracy ± (1.2%+3)
Resistance	0.1Ω to 60MΩ, accuracy, ± (1.5%+3)
Capacitance	0.001nF to 9.999mF, accuracy ± (5.0%+5)
Frequency	0.01Hz to 9.99MHz, accuracy ± (0.1%+2)
Duty Cycle	1% to 99%, accuracy ± (0.1%+2)
Temperature	20 to 1,000 °C, accuracy ± (2.5%+5)
Diode Test / Continuity	Yes
Battery	1.5V AA Battery x 2
Size / Weight	180 x 90 x 45 mm / 319 grm

Name of Mfr.: Acision

Insulation Testers

Medidor Aislamiento　絶縁抵抗計　电阻表

AC 0 – 600V

A solid state insulation tester. Constructed for the purpose of testing the insulation of household electrical appliances.

How to order: CODE

Insulation tester, AC 0 – 600V, TYPE with MANUFACTURER'S NAME & MODEL

Unit Per Set

CODE	79 57 71	79 57 72
Model	PDM509S	DM509S
Insulation Resistance	500V / 100MΩ	500V / 1,000MΩ
	0.05 - 0.1 - 50 -100MΩ	0.5 - 1 - 500 -1,000MΩ
ACV	0 - 600V	
DCV	0 - 60V	
Power Source	Alkaline battery 6LR61 (9V) x 1	
Size mm	H144 x W99 x D43	
Weight grm	310	
Name of Mfr.	Sanwa Electric Instrument Co., Ltd.	

Unit Per Set

CODE	79 57 74	79 57 75
Model	1503	1507
Insulation Test Range	0.1 - 2,000MΩ	0.01MΩ- 10GΩ
Insulation Test Voltage	500V / 1,000V	50V / 100V / 250V / 500V / 1,000V
ACV	0.1 - 600V	
DCV	0.1 - 600V	
Standards	ANSI/ISA 82.02.01 (61010-1) 2004, CAN/CSA-C22.2 No.61010-1-04, and IEC/EN 61010-1 2nd Edition	
Over Voltage Category	Category IV 600V	
Power Source	Alkaline battery LR6 (1.5V) x 4	
Size mm	H203 x W100 x D50	
Weight grm	550	
Name of Mfr.	Fluke (U.K.) Ltd.	

AC 2 – 600V

An all-transistor insulation resistance tester featuring simple push-button, operation. It has a voltmeter scale for measuring AC voltage in addition to insulation resistance. This portable instrument is used for insulation resistance measurement of electrical machines and devices, control and switching equipment, power line and cable wiring, as well as other applications.

How to order: CODE

Insulation tester, AC 2 – 600V/ohm rated with MANUFACTURER'S NAME & MODEL

Unit Per Set

CODE	79 57 76
Model	MY600
V/Ω Rated	50V/ 100MΩ 100V/ 200MΩ 125V/ 250MΩ 250V/ 500MΩ 500V/2,000MΩ 1,000V/4,000MΩ
Effective Measuring Range	0.1 – 4,000MΩ
ACV	2 - 600 V
DCV	2 - 600 V
Resistance	0-4,000Ω
Standards	EN61557 part1, 2, 4 and 10 EN61010 part 1
Over voltage category	CAT III 600V, CAT II 1,000V
Power Source	Alkaline battery LR6(1.5V) x 4
Size	156 x 97 x 46 mm
Weight	Approx. 490 grm
Name of Mfr.	Yokogawa Test & Measurement Corporation

Digital Type Insulation Testers

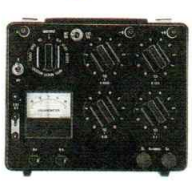
Medidor Aislamiento Digital　デジタル式絶縁抵抗計　数字式电阻表

Digital type insulation resistance tester.

Basic features:
Hot-line state (30V minimum) detection / large volt mark with the buzzer sound / Automatic data hold function / Bar graph just like analog meter / Large display with backlight.

How to order: CODE

Insulation tester, digital type, TYPE, VOLT/Ohm rated with MANUFACTURER'S NAME & MODEL



Unit Per Set

CODE	79 57 81
Model	MG500
MΩ	4M/40M/400M/4,000M ±(3%+4)
Test Voltage	500/250/125V
ACV/DCV	600V (AC/DC automatic detection) ±(3%+2)
Ω	4,000Ω (Buzzer and alarm indicator) ±(3%+3)
Ω	40Ω±(3%+10)
Battery	R6 × 6
Size mm	H170 × W142 × D57
Weight grm	600
Accessories	Test lead, Strap, Instruction manual

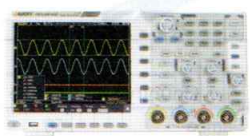
Name of Mfr.: Sanwa Electric Instrument Co.,Ltd.

Portable Wheatstone Bridges

Puente Portátil (Wheaststone) de Resistencias
ホイートストンブリッヂ 直流精密抵抗測定器
精密直流电阻测定器

Portable Wheatstone Bridge is convenient for use for general resistance measurement from 1Ω to 10Ω with 4 digit accuracy. The built-in galvanometer has taut-band suspension, minimizing the effects of shock.

Since the power source is self-contained, operation is easy and simple. The instrument can be used for field tests, maintenance, and other resistance type measurements.



Specification

Measuring Range	1Ω to 10 Mohm in four digit reading
Minim. Division	0.001Ω
Accuracy	±0.1% 100Ω ~ 100 KΩ ±0.3% 10Ω ~ 1 MΩ ±0.6% 1Ω ~ 10 MΩ
Galvanometer Sensitivity	0.9 μA/div.
Power Source	3 × 1.5V R20 (UM-1) Dry Cell
Size	H182 × W226 × D128 mm
Weight	2 kg

79 58 01	Wheatstone bridge, portable 1Ω to 10MΩ	Set

Oscilloscopes

Osciloscopios　オシロスコープ　示波器

An oscilloscope is an electro precision test instrument for detailed observation of the desired portion of complex waveforms. Wide range of models from different manufacturers. An outline of the basic specifications to determine the types of the oscilloscope is listed below. Before ordering, please write for, or ask for a catalogue for further information.

1. Frequency band area : _____MHz
2. Sensitivity : _____mV/div. (1 div. = 10 mm)
3. Power source currency : Alternating current, or Direct current
4. Power source voltage : _____volt
5. Frequency : _____Hz (50 or 60)

How to order: 79 - 58 - 10

Oscilloscope, with further information as
(1) Frequency band area,
(2) Sensitivity,
(3) AC or DC,
(4) Power source voltage,
(5) Frequency, etc.

23. Ultrasonic Parts Cleaners

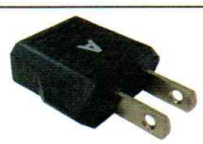
Ultrasonic Cleaning Equipment

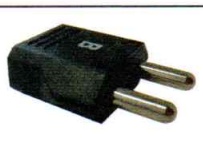
Equipos de limpieza por ultrasonidos
超音波洗浄機　超声波清洁设备

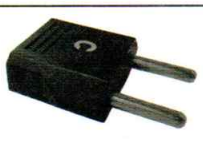
It is difficult to remove for the dirt that builds up on cleaning equipment of a complicated design with manual labor.

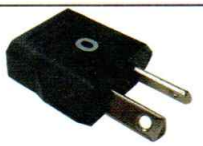
This product removes the dirt clogging the metal filter by ultrasonic effect neatly quickly.

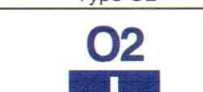
- The use of ultrasonic power is higher than conventional products therefore It cleans in a shorter time.
- The wave is uniform and prevents cleaning irregularities.
- The cleaning time can be set for various degrees of cleaning.
- There is a removable cleaning basket that makes cleaning easy.
- Its design has a protective lid and other safety devices.











Unit Per Set

CODE	79 58 21	79 58 22
Power supply	AC 110 V, 50/60 Hz	AC 220V, 50/60 Hz
Ultrasonic power	480 W	
Power consumption	650 W	
Heater power	300 W	
Tank capacity	22 Ltr	
Cleaning time	Max. 20 minutes (1 minute increments)	
Operating environment temperature range	10–35 °C	
Material	Main body: Stainless steel SUS304 Tank: Stainless steel SUS304 Pipes, valves: Stainless steel SUS304 Panel: Polypropylene	
Ultrasonic frequency	38 kHz BLT self-oscillation	
Equipment dimensions	W568 × D365 × H284 mm	
Tank dimension	W498 × D295 × H150 mm	
Equipment weight	18 kg	

Note: This product is not designed for protection against explosion.

Comparison Table of Packing Products

Tabla comparativa de Empaquetaduras

パッキング製品の比較表　密封制品厂商一览

Products from a few manufacturers are listed below for your reference. If there is some question as to what types of products are most suitable for the working conditions, please ask for further information or brochures from the local manufacturer when ordering.

In the table below, the products for each manufacturer are listed vertically according to the working conditions which are listed in the left hand column.

When ordering: Packing

1. Specify the name of the machine to be applied:Stern tube.
2. Specify the type of fluid to be applied: Sea water.
3. Specify the type of material : Non asbestos.
4. Select CODE: 81 13 02.
5. Select a manufacturer from the columns to the below: Beldam Crossley.
6. List the type number of the packing from the manufacturer: Pilotpack 5080.
7. Specify the size and length in meter per box: 3.0 mm × 15 mtr per box.

All Graphite Ribbon Packings

for Valves

Empaquetadura de Cinta de Grafito para Válvulas
ピラーフォイルリボンパッキン
石墨带状阀用盘根

Performance:
Temperature
-200°C to 400°C

Pillar No. 6650

For high temperature & high pressure valves

Construction & Features:
Free-size packing of a tape shape made by corrugating both sides of all graphite sheet. It can be wound and formed in the stuffing boxes of any size of valve.

Applications:
For water, steam, oils, oil gas, solvents, heat transfer oil, LNG, strong acids and strong alkalis.

Ramie Fiber Braided Gland Packings

for Stern Tube

Empaquetadura de prensaestopas de fibra de ramio trenzada para bocinas
船尾管用ラミー繊維グランドパッキング
船舶尾管用苎麻纤维编织填料

Pillar No.426F

Structure and Features:
A gland packing made of braided hemp fibers impregnated with PTFE dispersion and white grease as lubricant.

Applications:
Ideal choice for sealing stern tube (low pressure sea water) and rubber stock. 426F can also be used for sealing rotating equipments and reciprocating equipments.

Performance:

Temperature	to 80°C
Pressure	to 0.6 MPaG (6.5 kgf/cm²)
Velocity	to 10 m/s
PV	to 3.4 MPaG · m/s (35 kgf/cm² · m/s)

Carbon Fiber Packings

Empaque de fibra de carbono　炭素繊維パッキン　碳纤维盘根

Pillar No. 6527L

A packing consisting of carbon fiber woven in interlocking braids and processed with a special lubricant.

Feature:
Excellent in heat resistance and chemical resistance and ideal for pumps and agitators

Applications:
Water, hot water, oil, solvent, strong acid, strong alkali, pumps, mixers

Performance: PH 0 to 14

Temp.	350°C
Pressure	1.6 MPa {16kgf/cm²}
Velocity	10 m/s
PV	value 9.8 MPa·m/s {100 kgf/cm²·m/s}

Carbonized Synthetic Fiber Braided Versatile Gland Packings

for Rotating & Reciprocating Equipments and Valves

Envases de glándulas versátiles trenzados de fibra sintética carbonizada

万能炭化繊維グランドパッキン　万能碳化纤维编织填料

Pillar No. 6501L

An original gland packing made of braided carbonized synthetic fibers impregnated with micro PTFE dispersion and treated with lubricating oil to achieve superior, well-balanced performance in lubricity, flexibility and strength.

Feature:

Become a standard gland packing for the standard pumps due to its high performance such as low abrasion of the stem.

Applications:

Its versatile and high performance has made this gland packing a popular choice for use with many types of rotating equipments as well as reciprocating valves. It is also great for use with stern tubes and rudder stocks.

Performance:

Temperature	to 200°C (Over 80°C, external cooling required)
Pressure	to 1.0 MPaG (10 kgf/cm²)
Velocity	to 20 m/s
PV	to 9.8 MPaG · m/s (100 kgf/cm² · m/s).

Carbonized Fiber Braided Versatile Gland Packings

for Rotating & Reciprocating Equipments and Valves

Empaquetadura versátil trenzada de fibra carbonizada

炭化繊維パッキン　碳化纤维盘根

Pillar No. 6521L

A packing made of carbonized fiber which is impregnated with the PTFE resin liquid and interlocking braided into square and then impregnated with a special lubricant after.

Feature:

A sister product of Style 6501L, has further been improved in its pressure-proof property and has characteristics that its sealing property is less influenced by pressure fluctuation of pump and it is stable when used for a large-sized shaft.

Applications:

Water, hot water, oil, solvent, weak acid, weak alkali, pumps, mixers, sterntubes.

Performance:

Temperature	pH 2 to 12 200°C
Pressure	1.2 MPa {12.5 kgf/cm²}
Velocity	20 m/s
PV value	9.8 MPa·m/s {100 kgf/cm²·m/s}

PTFE Fiber Braided Gland Packings

Empaquetaduras de prensaestopas trenzadas de fibra de PTFE

PTFE 繊維編組グランドパッキン　PTFE 纤维编织盘根

Pillar No. 4505L

Structure & Features:

A Square-braided packing consisting of PTFE (Polytetrafluoroethylene resin) fiber impregnated with PTFE dispersion and lubricant. It has good so solvent and chemical resistance.

Applications:

Solvents, strong acid, strong alkali, pumps, valves, mixers.

Performance:

pH	0 to 14
Temperature	-100 to 260°C (Over 80°C, external cooling required)
Pressure	to 1.0 MPaG (10 kgf/cm²). (in pumps) to 10.3 MPagG(106 kgf/cm²).(in valves)
Velocity	to 10 m/s
PV	to 4.9 MPaG · m/s (50 kgf/cm² · m/s)

Pillarfoil Braided Packings

Mark III Combi for High Temperature & Pressure Valves

Empaquetadura Trenzada Pillarfoil

ピラーフォイル編組パッキン　柱形箔编织盘根

Pillar No.6710CH

A Pillarfoil packing braid over braid, reinforced by NCF600 wire. Suitable used for adapter packings to combine with Pillar style 6616CH. When ordering, please specify outer dia size, inner dia size and height of the packing due to make to order.

Performance:

Temperature	-200 to 600°C (Maximum temperature in oxidizing atmosphere : 450°C)
Pressure	77.6 MPa {791 kgf/cm²} (ASME class 4500)

Application:
Water, Steam, Oil, Heat transfer oil, Solvent, Gas, Acid, Alkali, High pressure valves, Heat transfer oil valves, High pressure gas valves.

How to order: 81 - 04 - 16
Pillarfoil braided packing, Mark III Combi, Pillar style 6710CH, OUTER DIA, INNER DIA, HEIGHT in mm

Pillarfoil Packings
for High Pressure & High Temperature & Pressure Valves

Empaquetaduras de Pilar para válvulas de alta presión y alta temperatura y presión
高圧・高温・高圧バルブ用ピラーフォイル成型パッキン
用于高压和高温高压阀门 柱式盘根

Pillar No.6616CH

This is pure graphite wire mesh inserted, one cut type, high performance packing. Use style 6616CH in combination with style 6710CH.

Performance:

Temperature	-200 to 600° (Maximum temperature in oxidizing atmosphere : 450°C)
Pressure	77.6 MPa {791 kgf/cm²} Class 4500

Application:
High pressure & High temperature valves, LNG valves

How to order: 81 - 04 - 17
Pillarfoil packing, Pillar No. 6616CH, OUTER DIA, INNER DIA, HEIGHT in mm

High-Intensity Aramid Fiber Braided Gland Packings
for Slurry Pump

Empaquetadura de prensaestopas de fibra de aramida trenzada de alta intensidad para bombas de mezcla
高強度アラミド繊維グランドパッキン 高强度芳纶纤维编织填料

Pillar No. 4526L

Structure:
A braided packing made of highly resistant aramid fibers treated with PTFE dispersion and lubricant.

Feature:
The packing stay flexible thanks to the original interlocked braiding technology.

Applications:
An ideal choice for applications that require packings made of strong fibers, such as slurry pumps.

Performance:

Temperature	to 260°C (Over 80°C, external cooling required)
Pressure	to 1.6 MPaG (16 kgf/cm²)(in pump) to 10.3 MPaG(106 kgf/cm²)(in valve)
Velocity	to 16 m/s
PV	to 14.7 MPaG · m/s (150 kgf/cm² · m/s)

Aramid Fiber Braided White Gland Packings
for Rotating Equipment

Empaquetadura de prensaestopas blanca de fibra de aramida trenzada para equipo giratorio
回転機器用アラミド繊維ホワイトパッキン
旋转设备用芳纶纤维白色编织填料

Pillar No. 4536WL

Structure:
A white gland packing made of aramid-fiber-covered yarn. It is treated with special lubricant and PTFE to ensure good lubricity.

Feature: It has outstanding flexibility and sealing properties.

Applications:
For rotating equipments that require white packings.

Performance:

Temperature	to 260°C (Over 80°C, external cooling required)
Pressure	to 1.0 MPaG (10 kgf/cm²)
Velocity	to 10 m/s
PV	to 6.5 MPaG · m/s (150 kgf/cm² · m/s)

Particular-processed PTFE Fiber Braided Gland Packings
for Chemical Pumps

Empaquetadura de prensaestopas de fibra de PTFE trenzada tratada con partículas para bombas de productos químicos
特殊加工 PTFE 繊維グランドパッキン 特殊加工 PTFE 纤维编织填料

Pillar No. 4527L

Structure:
A packing consisting of the PTFE fiber, and containing highly pure graphite and a special lubricant woven into interlocked braids.

Features:
Achieved high sealing performance and chemical resistance by the flexibility obtained from interlocked braiding technology.

Applications:
Recommended for use with chemical transfer pumps.

Performance :

pH	0 to 14
Temperature	-100°C to 260°C (Over 80°C, external cooling required)
Pressure	to 1.2 MPaG (12.5 kgf/cm²)
Velocity	to 20 m/s

Non-Asbestos Braided Packings

for Low-Torque Adjusting Valves

Empaquetadura Trenzada sin Amianto de Fibra de Carbón y Teflón para Válvulas de Bajo Par-torsión
ノンアスベスト 編組パッキン調整弁用
用于低扭矩调节阀 无石棉编织填料

Pillar No. 4519

PTFE fiber covers the inner core which is made of spun carbon fiber threads. This packing is a combination of the excellent features of PTFE in chemical resistance and the heat resistance and elasticity of carbon fiber. The low friction surface of this fiber makes it suitable particularly for adjusting valves in which smooth revolution of the valve rod is especially important.

Performance:

pH	0 to 14
Temperature	260°C
Pressure	Class 600
Fluid	Oil solvent, acid, alkali.

Applications: For valves, control valves.

Braided Gland Packings

for High Temp. Pump

Empaquetadura de prensaestopas trenzada para bombas de alta temperatura
高温ポンプ用グランドパッキン　高温泵用编织填料

Pillar No. 6733

Structure:
A gland packing made of braided aramid-fibre-reinforced braided expanded graphite yarn.

Features and Applications:
Treated with highly thermally resistant lubricant and is great for use with high-temperature high-pressure pumps, such as boiler feed pumps and boiler circulation pumps.

Performance:

Temperature	to 350°C
Pressure	to 2.0 MPaG (20 kgf/cm²)
Velocity	to 20 m/s
PV	to 19.6 MPaG · m/s (200 kgf/cm²· m/s)

Braided Gland Packings

for High Temperature and High Pressure Valves

Empaquetadura de prensaestopas trenzada para válvulas de alta temperatura y alta presión
高温・高圧バルブ用グランドパッキン　高温高压阀用编织填料

Pillar No. 6711

Structure:
A graphite packing made of braided expanded graphite yarn reinforced with NCF600 wire with its surface being coated with graphite powder.

Features:
Can be used without top and bottom adaptor packing.

Application:
It is suitable for high-temperature and high pressure valves.

Performance :

Temperature	-200 to 600°C (at oxygen atmosphere limited to 450°C)
Pressure	to 25.9 MPaG (264 kgf/cm²) (Class 1500)

Pilotpack 76 Packings

for Sea and Fresh Water

Empaquetadura para Agua Salada y Agua Dulce
海水・淡水用パイロットパック 76 パッキング
用于海水和淡水 Pilotpack 76 包装

Beldam Pilotpack 76

Plaited from high grade flax blended with other natural fibres carefully selected to provide a high wet strength when in contact with sea water thereby ensuring a long packing life. Each strand is throughly impregnated with a special water resistant mica lubricant before plaiting.

Performance:

Max. Temperature	120°C
Pressure	70 bar
pH	5 - 9
Speed	8 m/s

Applications:
Reciprocating, rotary and static, Stern glands and in smaller sizes general purpose water packing.

How to order: CODE

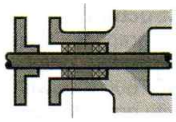
All-purpose Grand Packings

Threebond No.5910

Empaquetadura Multi-usos,　万能グランドパッキン　万用盘更

Preformed in triangle shape for easy installation and can be fitted into any size or any shape of stuffing box due to self expansion performance by built-in air bubbles.



Performance :

Temperature	-200 to 300°C
Pressure	1,400 kg/cm²
Fluid	Oxalic acid, Alkali, Alcohol, Organic solvent

No.5910

Applications:
Chemical pumps, Turbine pumps, Vertical pumps, Plunger pumps, Centrifugal pumps, Reciprocating pumps, Gate valves, Globe valves, Air valves, Solenoid valves

Old Grand Packing

81 07 15	Grand packing, all-purpose Threebond No.5910, 1 kg/box	Box

Tank Lid Packings

Pilot Lidpack 3800

Empaquetadura para tapa de tanque Pilot
タンクリッドパッキン　液货舱盖填料

Constructions:
Specially developed to seal marine cargo tank lids. The PTFE outer cover gives complete protection to the packing and is abrasion resistant. The unique core construction enables the packing to be welded together to form an endless seal, thus preventing the chance of any leakage at the joint.

Performance:

Max. Temperature	100°C
Pressure	1 Bar
pH	1 to 14.

Applications:
For static cargo or chemical tanks, and acids, alkalis, oils, solvents, chemicals and edible products.
In coils or cut to size upon request. Also available in square or rectangular sections as required.

Unit Per Mtr.

81 07 30	Tank lid packing, Pilot Lidpack 3800, endless welded ring, SECTIONAL SIZE, INNER DIAM, OUTER DIAM	Pc.

Tankatite 440

Constructed from a resilient elastomeric core spirally wrapped with P.T.F.E. tape for added chemical protection. The core is then surrounded with successive braided jackets of inert polypropylene which is wrapped with further layers of P.T.F.E. tape and finally enclosed in braid of P.T.F.E. yarns. Tankatite 440 provides a reliable seal for tank lids, main hatches, and cleaning covers on tankers carrying all known bulk liquid cargoes in all IMO classes.

It will protect the cargo from sea-water ingress and prevent any environmental contamination by the cargo itself.

Tankatite 440 meets U.S. Coast Guard requirements for tank lid sealing of hazardous cargoes and is pressure tight beyond Lloyds and Det Norske Veritas (DNV) test criteria. Any reasonable length can be supplied in square or rectangular from 12.5 mm upwards, or can be supplied in factory produced endless ring form to exactly fit the tank lid recess.

Non-Asbestos Universal Packings

Pilotpack 5080

Empaquetadura sin Amianto Universal
ノンアスベスト・ユニバーサルパッキン　非石棉统一填料

A firm compression packing of the crossplait type designed for effective sealing over a wide scope of static or dynamic applications. The packing is a composite of two base fibres that provide good heat dissipation, abrasion resistance, with the ability to withstand high pressures. The packing also possesses a surface lubricant for initial bedding-in purposes that aids longer term performance.

Performance:

Max. Temperature	300
Pressure	Up to 350 bar
pH	1 - 14
Speed	Up to 25 m/s-1

Applications:
Pumps and valves, Condensates, Dilute acids and alkalis, Oils, Solvents, Abrasive Media, Steam and water.

Pillarfoil Braided Packings (Mark VII)

for manhole Cover

Empaquetaduras trenzadas Pillarfoil

ピラーフォイル編組パッキン　柱形箔编织盘根

Pillar No. 6114-M

This is made of flexible graphite yarn reinforced by organic fiber and braided. This flexible graphite material is pretreated on its surface to obtain low torque properties as well as sealability.

Performance:

Temperature 400°C

Fluid Hot air, exhaust gas, dust.

Applications: For manhole packing

How to order: 81 - 13 - 45

Pillarfoil braided packing, (Mark VII), Pillar No. 6114-M, SIZE mm x LENGTH mtr

Low Friction Type Braided Gland Packings

for High Temperature & High Pressure Valve

Empaquetadura de prensaestopas trenzada de baja fricción para válvulas de alta temperatura y alta presión

低トルクタイプ高温・高圧バルブ用グランドパッキン

低转矩型高温高压阀用编织填料

Pillar No. 6315CH

Structure:

A gland packing made of braided expanded graphite yarn reinforced with stainless wire.

Features:

Its surface is coated with lubricant and graphite powder to minimize the sliding resistance of the valve stem.

Applications:

Suitable for use with high-temperature and pressure valves.

Performance:

Temperature -200 to 600°C
(at oxygen atmosphere limited to 450°C)

Pressure to 25.9 MPaG (264 kgf/cm²)

Grafan Fibre & Inconel Wire Packings

Vulcan VR31

Empaquetadura de fibra Grafan y alambre Inconel

インコネルワイヤー補強グラファン繊維パッキン

Grafan 纤维铬镍铁合金填料

Braided packings constructed from 100% Grafan yarns to form truly exceptional capability and performance. It is additional reinforced with inconel wire to create the packing for high temperature, high pressure valves. Can be merely cut to length and spiraled into the gland. Extreme condition, long life and zero leakage packing for all uses up to high temperature, high pressure, high speed applications on pumps, valves, mixers, agitators, expansion joints, ball valve seats and other static seals. It is designed for use in static applications only. Against all acids, alkalis and solvents (except very strong oxidizers), gases, feed water and superheated, or saturated, steam.

Service Capability

Pressure rating: 360 Bar	Rotary speed: 1 m/s
Temperature: -200 + 3,000 deg.C (Inert ATM)	
Temperature: -200 + 600 deg.C (In air)

PTFE Graphite Fibre Packings

Vulcan VP2

Guarnición de fibra de grafito PTFE

PTFE 黒鉛繊維パッキン　PTFE 碳纤维保护套

Manufactured from 100% Vulcan type G1 fibre. This newly developed outstanding yarn is very similar in material construction to the original GORE GFO fibre and has been manufactured to optimise performance at an improved cost. They will increase service life whilst minimizing wear and gland adjustments, against nearly all media in static, rotary and reciprocating uses.

Service Capability

Non-Asbestos Gland Packings

Carbon Fiber Based

Empaquetadura de casquillo sin amianto con base de fibra de carbono

炭素繊維系グランドパッキン　碳纤维密封填料

For Water & Oil Pumps
Valqua® No. 6201

Coil packing made of carbonized fabric yarn, processed with PTFE dispersion and lubricating oil, then braided into a square cross-section and finished with PTFE, fine graphite and lubricating oil.

Features:
· Serviceable for relatively versatile fluids.
· Allows permissible PV value and shaft speed limit.
· Reduced shaft wear due to packing.

Temperature	Pressure	pH	Speed

For General Use Valves & Reciprocating Motion Machines
Valqua® No. 6232

Coil packing made of carbon fiber yarns, processed with PTFE dispersion and lubricating oil, then braided into a square-cross section and finished with PTFE, fine graphite and lubricating oil.

Features:
- Good compatibility with shafts means excellent sealing property even at low tightening pressures.
- Suitable for almost all fluids except for strong oxidizing fluids.

軸密封压盖填料 PTFE 纤维基

For Corrosive Fluid Valves
VALQUA® No. 7233

Coil packing made of PTFE fiber yarns, processed with PTFE dispersion, then braided into a square cross-section.

Features:
- Made of 100% PTFE, and therefore resistant to almost all fluids. Best suited for chemical use valve shaft seals for handling corrosive fluids.
- When low torque or gas sealing properties are required, use the following products which are treated with lubricating oil:
- No. 7233 (O) for general gas-based fluids.
- No. 7233 (SO) for low-temperature use of inflammable gas and liquefied gas.
- No. 7233 (FO) for gas susceptible to burning, such as oxygen and ozone.
- Compliant with the Food Sanitation Law, and the Regulations concerning Food & Additives.

Special Fiber Based

A base de Fibras Especiales
特殊繊維系グランドパッキン　特殊纤维

For Low & Medium Shaft Speed Pumps and Rotary Equipment
Valqua® No. 8132

Coil packing made of blended yarn of aramid fibers and of artificial inorganic fibers treated with PTFE dispersion, braided into a square cross section, and then finished soft with PTFE dispersion and lubricating oil.

Features:
- Flexible and compatible with shafts.
- Being white, can be used for fluid applications where black should be avoided.
- Can be used as shaft seals of pumps for handling water-based and oil-based fluids as well as weak acid and weak alkaline fluids.
- Also used as shaft seals for rotating machines where contamination is undesirable, such as mixers and agitators.

Note(1) For manufacturing reasons, rectangular products with a cross section of 3 mm x 5 mm are available.

Flexible Graphite Based

Base de grafito flexible　膨張黒鉛系グランドパッキン　柔性石墨基

For General Use Valves
Valqua® No. VFT-22

Coil packing made of expanded graphite yarn clad with PTFE film, and braided into a square cross-section, that is, gland packing that makes use of the features of each material.

Features:
- Excellent in sealing property and durability with expanded graphite as the major material.
- Low stem friction as the surface is clad with PTFE.

Temperature	Pressure	pH
300°C / 572°F	10.3 MPa	0 to 14

Unit Per Box

CODE	Size (mm)	Length (m)	CODE	Size (mm)	Length (m)

28	11				

For High Temperature & High Pressure Valves
Valqua® No. VFX-15

A coil packing made of expanded graphite yarns reinforced with metal wire, braided into a square cross-section treated with lubricant oil.

Features:
- Can be used individually as a stem seal.
- Higher cost performance than existing graphite packing.

Temperature	Pressure	pH
650 (400)(1)°C / 1,202 (752)°F	25.9 MPa	0 to 14

Note(1) Temperature limit in air.

Comparison Table of Gaskets

Products from a few manufacturers are listed below for your reference. If there is some question as to what types of products are most suitable for the condition of use, please ask for further information or brochures from the local manufacturer when ordering.

In the table, the products for each manufacturer are listed vertically according to the working conditions which are listed in the left hand column.

When ordering: Gasket

1. Select the purpose: All purpose.
2. Specify the name of the machine to be applied: Pump, valve, etc
3. Specify the type of material: Non-asbestos.
4. Select the CODE: 81 11 00.
5. Select a manufacturer from (one of) the columns to the right: Beldam Crossley.
6. List the type number of the gasket from the manufacturer: Pilotseal 178.
7. Specify the thickness and size (Width × Length) in mm. 1.0 mm × 1,500 × 1,500 mm.

Comparison Table of Non-Asbestos Gaskets

Graphite Joint Sheet Gaskets

Plancha gratificada para juntas
黒鉛ジョイントシートガスケット　石墨结合垫片

Pillar No. 5650

A joint sheet gasket made of graphite black lead and aramid fiber bound with a rubber binder.

Feature:
1. Highly thermally resistant.
2. High mechanical strength.
3. Non-adhesive to flange surfaces.
4. Great workability.

Applications:
Gaskets for pipe flanges, maintenance hatches, and valve bonnets. Especially suitable for use with pipes that carry saturated vapors.

Performance:
Temperature −100 to 260°C
Pressure up to 5.2 MPaG (ASME Class 300)

Unit Per Sht.

CODE	Thick mm	Size mm	CODE	Thick mm	Size mm
81 11 24	0.5	1,500 × 1,500	**81 11 26**	1.0	1,500 × 2,000

			29	3.0	

Expanded Graphite Joint Sheet Gaskets

Plancha para juntas de estanqueidad de grafito expandido
膨張黒鉛ジョイントシートガスケット　膨胀石墨密封垫圈

Pillar No. 5600

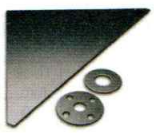
Structure:
A joint sheet gasket made of expanded graphite, inorganic-fiber and aramid fiber bound with a rubber binder.

Feature:
1. Very flexible.

2. Highly thermally resistant.
3. Great gas-sealing performance.
4. Roll-upable for compact storage.

Applications:
Gaskets for pipe flanges, maintenance hatches, and valve bonnets. Especially suitable for use with pipes that carry saturated vapors.

Performance:
Temperature -50 to 260°C
Pressure up to 4.0 MPaG



Unit Per Sht.

Tear Resistant Type Graphite Sheet Gaskets
for High Temperature Sheet Gasket

Plancha gratificada resistente a desgarros para planchas de altas temperaturas
金属箔入り膨張黒鉛シートガスケット
含金属箔的抗撕裂型膨胀石墨垫片

Pillar No. 6633

Structure:
An expanded graphite sheet gasket reinforced with stainless steel foil to protect against tearing and improve ease of handling.

Features:
1. Extremely thermally resistant.
2. Tear resistant.
3. Easily cut with a knife or scissors.
4. Highly chemically resistant.

Applications:
Suitable for use with pipe flanges and other types of applications that require gaskets with thermal resistance and anti-chemical properties.

Performance:
Temperature -200 to 400°C
Pressure up to 5.2 MPaG

Unit Per Sht.

CODE	Thick mm	Size mm	CODE	Thick mm	Size mm
81 10 25	0.5		**81 10 27**	1.5

26	1.0		**29**	3.0	

Joint Sheet Gaskets
(Common Used)

Plancha para juntas (uso común)
汎用ジョイントシート　通用结合垫片

Pillar No. 5611

Structure:
A joint sheet gasket made of inorganic fiber and aramid fiber bound with a rubber binder.

Features:
1. High mechanical strength.
2. Superior fit with flange surfaces that ensures high sealing performance.
3. Great workability.

Applications:
Gasket for pipe flanges, maintenance hatches, and valve bonnets. Especially suitable for use with pipes that carry room-temperature water or oil.

Performance:
Temperature −50 to 120°C
Pressure up to 3.3 MPaG

Unit Per Sht.

CODE	Thick mm	Size mm	CODE	Thick mm	Size mm

Vegetable Fiber Oil-Proof Joint Sheets

Plancha de Fibra Vegetal Resistente al Aceite para Juntas
植物繊維耐油ジョイントシート　蔬菜纤维制防油结合垫片

Construction & Features:
Made of chemically treated vegetable fiber. For packing against gasoline, oil, water, and lubricating oil.

Performance:
Temperature 100°C
Pressure 1.0 MPa (10 kgf/cm²)

Applications:
Gasket for oil pumps, crank cases, transmission covers, gasoline pumps, oil drums, etc.

Unit Per Sht.

CODE	Thick mm	Size mm	CODE	Thick mm	Size mm

83	0.6		**88**	3.0	

Fiber Joint Sheets

Plancha de Fibra para Juntas　繊維ジョイントシート　纤维接缝板

Construction & Features:
A red paper packing sheet which is chemically neutralized from cotton fiber and treated with zinc chloride solvents.

Applications:
Flange packing for water and oil service or electrical insulation.

Unit Per Sht.

CODE	Thick mm	Size mm	CODE	Thick mm	Size mm
81 10 91	0.35		**81 10 95**	1.6

93	0.8		**97**	3.2	
94	1.0				

Cortex Joint Sheets

Plancha Goma-Corcho para Juntas　コルクシート　皮质接缝片

Construction & Features:
Made of cork skin and mixed with oil resistant rubber by rolling and curing.

Applications:
Pipe flange packing for tank covers, etc.

Unit Per Sht.

CODE	Thick mm	Size mm	CODE	Thick mm	Size mm
81 11 01	1.0		**81 11 03**	2.0

Synthetic Rubber Joint Sheets

Planchas para juntas de caucho sintético
合成ゴム製ジョイントシート　合成橡胶接缝板

Construction & Features:
Made from natural oil-resistant rubber mixed into sheet form.

Applications:
For pipe flanges servicing petroleum solvent for heavy or light oil and for animal or vegetable oils.

Unit Per Mtr.

CODE	Thick mm	Sheet Size mm	CODE	Thick mm	Sheet Size mm
81 11 31	1.0		81 11 37	6.0

81 11 36	5.0	1,000 × 1,000	81 11 42	20.0	1,000 × 1,000

Viton Rubber Sheets

Hojas de caucho Viton　バイトンゴムシート　氟橡胶板

Viton sheeting, known as fluoroelastomer or FKM, is highly appreciated for the most demanding industrial applications as it has the highest resistance to hydrocarbons, acids, alkalis and even oxidants, and its mechanical properties remain intact at temperatures of up to 200°C.

- Tensile strength : 6 - 8 MPA
- Elongation: 300%
- High temperature: 200°C
- Hardness 75+/15 Shore A

Applications:
Industrial maintenance (oils / high temperature) / Sealing

Unit Per Mtr.

CODE	Thickness × Width mm	Temperature	Shore Hardness	Article No.
81 11 43	1 × 1,000			RP630010
44	1.5 × 1,000			RP630015
45	2 × 1,000	200°C	75°	RP630020
46	3 × 1,000			RP630030

81 11 48	5 × 1,000	200°C	75°	RP630050
49	6 × 1,000			RP630060

Cotton Insertion Rubber Joint Sheets

Planchas de caucho para juntas de inserción de algodón
綿入りゴムジョイントシート　棉质插入式橡胶接缝片

Construction:
Cotton inserted natural rubber sheet.

Applications:
For the same use as a natural rubber sheet.

Unit Per Mtr.

CODE	Thick mm	Sheet Size mm	CODE	Thick mm	Sheet Size mm
81 11 51	1.5	1,000 × 1,000	81 11 53	3.0	1,000 × 1,000
52	2.0				

Canvas Inserted Rubber Joint Sheets

Planchas para juntas de goma insertadas en lona
キャンバス入りゴム製ジョイントシート　帆布嵌缝橡胶板

Construction & Features:
Made of quality, strong canvas inserted onto rubber sheet in the same way as cotton insertions but this construction is more durable.

Unit Per Mtr.

CODE	Thick mm	Sheet Size mm	CODE	Thick mm	Sheet Size mm
81 11 61	1.0		81 11 64	3.0	
62	1.5	1,000 ×1,000	65	4.0	1,000 × 1,000
63	2.0		66	5.0	

Leather Sheets

Sábanas de cuero　レザーシート　皮革床单

Suitable for a wide variety of applications.

Unit Per Mtr.

CODE	Thick mm	Sheet Size mm	CODE	Thick mm	Sheet Size mm
81 11 71	1.0		81 11 75	4.0	
72	1.5	300 × 300	76	5.0	300 × 300
73	2.0		77	6.0	
74	3.0		78	8.0	

Felt Sheet Packings

Planchas Fieltro　フェルトシート　毛毡片填料

Made from pressed white sheep hair shaped into sheet form. Used for filling or stopping oil because of its high absorbency to oil.

How to order: CODE
Felt sheet packing, WIDTH x LENGTH, THICKNESS mm

Unit Per Sht.

Non-Asbestos Mica Jointing Sheets

Pilotseal Jointing (201)

Plancha de fibra de mica sin amianto para juntas
ノンアスベスト・マイカジョイントシート　无石棉云母结合垫片

Non-asbestos jointing material for use in the sealing of hot, dry gases.

Performance:

Max. Temperature	900°C
Max. Pressure	20 bar
Tensile Strength	20 MPa
Density	1.72 g/cm³

Applications :
For use in refractory underlays, metal foundries, exhaust manifolds and as thermal insulation and sealing gasket within a wide range of industries.

Unit Per Sht.

CODE	Thick mm	Size mm	CODE	Thick mm	Size mm
81 12 63	0.5	1,250 × 1,250	81 12 66	1.5	1,250 × 1,250
64	1.0		67	2.0	
65	1.3		68	3.0	

Pilot Non-Asbestos Jointing Pilotseal 172

for Steam, Water, Oils, Gases, Dilute Acids and Alkalis

Juntas Pilotseal 172 sin amianto para vapor, agua, aceites, gases y acido y álcali diluidos
ノンアスベスト ジョイントパイロットシール 172
Pilotseal 172 无石棉结合垫片

High quality compressed jointing manufactured from heat resistant fibre and polymer.

The anti-stick graphite silver finish facilities easy gasket removal and flange cleaning.

Performance:

Max. Temperature	475°C
Max. Pressure	13.8 N/mm² (2,000 psi)
Tensile Strength	10.3 N/mm² (1,500 psi)
Density	1.4 gm/cc

Applications:
For sealing against steam, water, oils, gases, dilute acids and alkalis.

Unit Per Sht.

CODE	Thick mm	Size mm	CODE	Thick mm	Size mm
81 12 80	0.5	1,500 × 1,500	81 12 83	1.5	1,500 × 1,500

Expand Metal Insert Graphite Joint Sheets

Novaphit SSTC

Juntas de Expansión de Grafito
エクスパンドメタル入りグラファイトジョイントシート
膨胀金属嵌件 石墨 接缝板

The highest quality gasket material based on pure exfoliated graphite with a stainless steel mesh reinforcement and no binders or adhesives. It is easier to cut than the traditional tang metal reinforced graphite and it is fire-safe approved by Lloyds. It exhibits virtually no creep in service. Available in sheet form or as a Cut Gasket to suit standard or non-standard flanges.

Performance:

Temperature	-240°C to 550°C
Stress Relaxation	300/C - 43 N/mm² (approx)
DIN 52913	175/C - 45 N/mm² (approx)

Applications:
For sealing high pressure steam, most hydrocarbons, solvents, flammable liquids, fuels, gases, alkalis and many acids.

Unit Per Sht.

CODE	Thick mm	Size mm	CODE	Thick mm	Size mm
81 12 86	1.0	1,000 × 1,000	81 12 88	2.0	1,000 × 1,000
87	1.5		89	3.0	

Non-Asbestos Jointing Pilotseal 178

for Steam, Water, Oils, Gases, Dilute Acids and Alkalis

Junta de unión sin amianto Pilotseal 178
ノンアスジョイント・パイロットシール 178
无石棉接缝导向密封 178

General service non-asbestos jointing manufactured from heat resistant synthetic fibre and polymer. The printed green 25 mm squares assist when cutting and making gaskets.

Performance:

Max. Temperature	400°C
Max. Pressure	6.9 N/mm²
Tensile Strength	10.3 N/mm² (1,500 psi)
Density	1.95 gm/cc

Applications:
For sealing against steam, water, oils, gases, dilute acids and alkalis.

Unit Per Sht.

CODE	Thick mm	Size mm	CODE	Thick mm	Size mm

High-Strength Rubber Sheet Gaskets

Reinforced in Aramid Fiber

Plancha de caucho de alta resistencia reforzada con fibra de aramida
アラミド繊維複合ゴムシートガスケット
高强度芳纶纤维复合橡胶垫片

Pillar No.5003-NBR
Structure:
An NBR rubber sheet gasket reinforced with short aramid fibers.

Feature:
1. High sealing performance.
2. Low stress relaxation and high mechanical strength.
3. High insulation performance.

Applications:
- Flange gaskets for water (including sea water) pipes
- Insulation gaskets
- Flanges for watertight test

Performance:

Temperature	-30 to 120°C
Pressure	up to 2.6 MPaG

Unit Per Sht.

CODE	Thick mm	Size mm	CODE	Thick mm	Size mm
81 13 55	1.5	1,270 × 1,270	81 13 57	3.0	1,270 × 1,270

Low Creep PTFE Sheet Gaskets

Mixed with Selectable Fillers

Plancha para juntas PTFE de baja percolación mezclada con relleno seleccionable
低クリープ充填材混合 PTFE シートガスケット
低蠕变充填材混合 PTFE 密封垫片

Pillar No.4001, 4002, and 4003

Structure:
PTFE sheet gaskets with fillers.

Features & Applications:
Protected from creeping of PTFE sheet gasket by using different types of filler.

4001: High anti-creeping and acid-resistance properties. It is best suitable to the strong acid, hydrocarbon, water, steam, etc.

4002: Good compression property and superior fit with flange surfaces. It is also best suitable to the lining flange, etc. tightened at low torque, and to the substitution of enveloped gasket.

4003: High anti-creeping and alkaline-resistance properties. It is best suitable to the strong alkali and oxygen, and is also applicable safely to the food application in safe.

Properties and Performance

Pillar No.	4001	4002	4003

Bi-directional PTFE Gasketing Materials

SICHEM S11

Materiales de empaquetadura de PTFE bidireccional
PTFE フランジジョイントガスケット　双向 PTFE 垫片材料

A bi-directional orientated gasketing material on PTFE-basis, filled with silica, designed to achieve the lowest creep values and seal integrity, combining excellent chemical resistance and optimal sealing performances.

Can be used for applications with pH-range from 0 to 14 with exception to hydrogen fluoride, fluorine compounds and molten alkali metals.

Applications:
For all types of flanges joint connections in maritime applications in all sizes for temperatures from -260°C/+260°C and pressures classes up to 80 Bar

Characteristics:
Density: 2.2 g/cm^3

Leckage DIN 3535-6 = <0.05 mg/(s*m)
KSW DIN 28090-2 = <4.0%
KRW DIN 28090-2 = >1.7%
WSW DIN 28090-2 = <24%
Tensile Strength ASTM F 152 = 15 N/mm^2

Characteristics Certifications:
*FDA 21§177.1550 Approval
*LFGB and Regulation (EC) No.1935/2004
*BAM proofed for gaseous oxygen until 30 bar and +260°C
*EN 13555 (Qmin, Qsmin, PQR, ...)
*TA-Luft + Blowout test,
*DVGW

Name of Mfr: Planichem Srl

High Performance Non-Asbestos Sheets

Plancha de alta capacidad sin amianto
高機能ノンアスシート　高效非石棉纤维垫片

BLACKHYPER™
Valqua® No. GF300

This gasket is mainly composed of PTFE as a binder and doesn't contain any rubber.

Features:
- Very minor change in physical properties even under high temperatures.
- Excellent chemical resistance.
- Excellent heat resistance.
- Easy to handle.
- Does not harden easily.
- No hardening makes retightening possible.

Temperature	Pressure
-200 to 300°C / -328 to 572°F	Max 3.5 MPa

Suitable fluids: General fluids (water, steam, oil, etc.), solvents, liquefied gas.
Applications: Pipe flanges, valve bonnets, towers & tanks, pressure vessels and heat exchangers.
Color type: Black
Print color: Black

The ring molded article supports JPI (ASME / ANSI).

Unit Per Sht.

CODE	Thickness (mm)	CODE	Thickness (mm)
1,270 × 1,270 (mm)		1,500 × 1,500 (mm)

Compressed Non-Asbestos Fiber Sheets

Plancha de fibra comprimida sin amianto
ノンアスジョイントシート　压缩非石棉纤维垫片

Compressed Non-Asbestos Fiber Sheets are rolled and vulcanized sheet-type gasket materials, in which special rubber binders and a small amount of filler material are mixed with organic and inorganic fibers.

General use type
Valqua® No. 6500

Features:
- An economical option.
- Easy to handle.

Temperature	Pressure
-50 to 183°C / -58 to 361°F	Max 3 MPa

Suitable fluids: General fluids (water, steam, oil, etc.), liquefied gas.
Applications: Pipe flanges, valve bonnets and other equipment used in various industries.
Color type: Blue
Print color: Black
The ring molded article supports JPI (ASME / ANSI).

Unit Per Sht.

CODE	Thickness (mm)	CODE	Thickness (mm)

17	2.0	**18**	2.0
07	3.0	**10**	3.0

Anti-corrosion type
Valqua® No. 6500AC

This gasket is low in leachable chloride.

Feature:
• Corrosion suppressive

Temperature	Pressure
-50 to 183°C / -58 to 361°F	Max 3 MPa

Suitable fluids: General fluids (water, steam, oil, etc.), liquefied gas.
Applications: Stainless steel pipe flanges, valve bonnets and other equipment used in various industries requiring corrosion resistance.
Color type: Blue
Print color: Orange

VALFLON™ (PTFE) Gaskets

Junta VALFLON™ (PTFE)
バルフロン PTFE ガスケット VALFLON™（PTFE）垫片

These are sheet gaskets made of VALFLON™ (PTFE) with excellent chemical resistant and non-stick properties.

VALQUALON™ (PTFE-blended sheet) Gasket

Junta VALQUALON ™ (lámina con mezcla de PTFE)
バルカロンガスケット（聚四氟乙烯混合板材）垫片

Valqua® No. 7020 (For oxidizing)

In order to improve the cold flow (the creep phenomenon), which is a drawback in PTFE, these gaskets are shaped by means of a special manufacturing process where inorganic filler material is compounded.

Features:
• Excellent acid resistance.
• Heat resistance.
• Anti-cold flow properties.
• Can handle various chemicals.

Temperature	Pressure
-200 to 200°C / -328 to 392 °F	Max 4 MPa

Suitable fluids: General fluids (water, steam, oil, etc.), solvents, corrosive liquids (especially, acid liquid), liquefied gas, cryogenic fluid, flammable gas.

Applications: Pipe flanges, valve bonnets, towers & tanks.

The ring molded article supports JPI (ASME / ANSI).

Unit Per Sht.

Black VALQUALON™ Gasket

Junta negra VALQUALON
ブラックバルカロンガスケット 黒色 VALQUALON™ 垫片

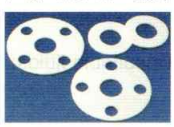
Valqua® No. 7026 (For alkali)

Similar to their companion products, the No. 7020 and No. 7026 gaskets have excellent heat resistance, chemical resistance, and anti-cold flow properties.

Features:
Excellent alkali resistance.
Heat resistance.
Anti-cold flow properties.
Handling various chemical.

Temperature	Pressure
-200 to 200°C / -328 to 392°F	Max 4MPa

Suitable fluids: General fluids (water, steam, oil, etc.), solvents, corrosive liquids (especially, alkali liquid), liquefied gas, cryogenic fluid.
Applications: Pipe flanges, valve bonnets, towers & tanks.
The ring molded article supports JPI (ASME / ANSI).



Unit Per Sht.

New VALFON™ Gasket

Nueva junta VALFON ニューバルフロンカスケット 新 VALFON™ 垫片

Valqua® No. 7010-EX

Made of New VALFLON™ material with improved anti-creeping performance, while maintaining the PTFE's excellent chemical resistance.

Features:
• Anti-creeping performance.
• Excellent chemical resistance.
• Heat resistance.
• Non-stick properties.

Temperature	Pressure
-50 to 150°C / -58 to 302°F	Max 1 MPa

Suitable fluids: General fluids (water, steam, oil, etc.), solvents, corrosive liquids, liquefied gas.
Applications: Pipe flanges, valve bonnets, towers & tanks.
The ring molded article supports JPI (ASME / ANSI).

Unit Per Sht.

CODE	Thick (mm)	Size (mm)	CODE	Thick (mm)	Size (mm)

VALFON™ Soft Sheet

VALFON™ Hoja Blanda バルフロンソフトシート VALFON™ 软床单

Valqua® No. 7GP61S

This highly flexible sheet has a specially made mesh construction.

Features:
• Highly flexible sheets.
• Excellent chemicals resistance.
• Heat resistance.

Temperature	Pressure
-240 to 260°C / -400 to 500°F	Max 2 MPa

Suitable fluids: General fluids (water, steam, oil, etc.), solvents, corrosive liquids.
Applications: Pipe flanges, valve bonnets, towers & tanks.
The ring molded article supports JPI (ASME / ANSI).

Unit Per Sht.

VALQUAFOIL™ (Expanded Graphite) Gaskets

Junta VALQUAFOIL™ (grafito expandido)
バルカホイルシートガスケット
VALQUAFOIL™（膨胀石墨）垫片

Valqua® No. VF-35E

Leverages the characteristics of the pure graphite sealing material VALQUAFOIL™.

Features:
- Excellent heat resistance.
- Very small changes in physical properties under high temperatures .
- Low stress relaxation.
- Chemical resistance.

Temperature	Pressure
-240 to 400°C / -400 to 752°F	Max 5 MPa

Suitable fluids: General fluids (water, steam, oil, etc.), corrosive liquids, liquefied gas, cryogenic fluid.
Unsuitable fluids: Not applicable to oxidizing acids such as hot concentrated sulfuric acid and concentrated nitric acid.
Applications: Pipe flanges, valve bonnets, covers, various industries.
The ring molded article supports JPI (ASME / ANSI).

Unit Per Sht.

Non-Asbestos Manhole Packings

Empaquetadura de Amianto para Registro
マンホールパッキン　非石棉密封垫

Flat folded glass cloth with rubber lined manhole packing in the required manhole sizes. All sizes are made to order except for the standard sizes listed below. When ordering, specify the inside longer length (L), inside shorter length (S), width (W), and thickness (T).

How to order: CODE

Manhole packing, non-asbestos, INSIDE LONGER LENGTH, INSIDE SHORTER LENGTH, WIDTH and THICKNESS mm

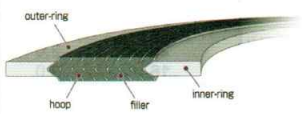
Unit Per Pc.

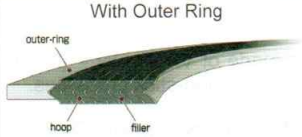
CODE	Dimensions mm			
	Inside Length (L)	Inside Length (S)	Width (W)	Thick (T)
81 15 96	400	300	25.4	6.4
97	400	300	22.3	9.6
81 15 98	380	260	25.4	6.4
99	380	260	22.3	9.6

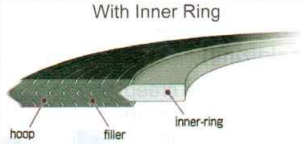
*Sizes not listed above are made to order.

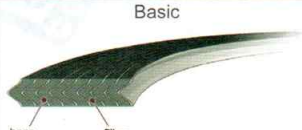
Spiral Wound Gaskets

Juntas Espirometálicas　スパイラルガスケット　缠绕式垫片









Spirally wound gaskets are constructed of a continuous strip of preformed V shaped metal which is wound spirally with pure graphite and inorganic fibers as fillers instead of asbestos, which is excellent in gas sealing and heat resistance. The complex combination of a single metal ply and soft filler offers greater resiliency than any other metallic gasket and therefore provides good compensation for relaxation, temperature or pressure cycling, and shock or vibration.

Because there is a variety of sizes, shapes, and materials available such as copper, iron, stainless steel, monel, aluminium, and combinations of metal, pure graphite and inorganic fibers, please specify the details referring to the illustration below. A sample is acceptable for order made gaskets, but the standard shapes are illustrated below for your information.

Applications: Pipe flanges, tanks, valve bonnets and other equipment.

< Standard Shape of Spiral Wound Gasket >

	Type	Usage
IOR	With Inner & Outer Ring 	Used on plain flat face, and raised face flanges. Inner ring prevents inner buckling of sealing element, protects from heat and media. Outer ring serves to center the gasket in the flange joint and work to prevent media from blowout.
OR	With Outer Ring 	Used on plain flat face flanges, and raised face flanges. Outer ring serves to center the gasket in the flange joint and work to prevent media from blowout.
IR	With Inner Ring 	Used for tongue and groove type, male and female type of flanges, sealing the pump casing joint and valves bonnet and body fixing joints
R	Basic 	

< Standard Material of Spiral Wound Gasket >

Material Type	Temperature	Pressure	Suitable fluids
Expanded Graphite	*-270 to 450°C / -454 to 842°F	Max 43.1 MPa	General fluids (water, oil, etc.), high temperature & high pressure steam, liquefied gas, cryogenic fluid.
Non Asbestos	-200 to 500°C / -328 to 932°F	Max 30.0 MPa	General fluids (water, steam, oil etc.), high temperature & high pressure fluids, liquefied gas
PTFE	-200 to 260°C / -328 to 500°F	Max 15.5 MPa	General fluids (water, steam, oil, etc.), solvents, corrosive liquids, liquefied gas, gas (oxygen, etc.)

* For use under a non-oxidizing atmosphere, it is up to 600°C.

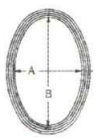
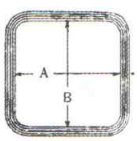
<Other Shape of Spiral Wound Gasket>



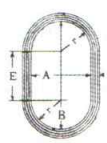
Hanger Shape

When ordering, specify PRESSURE, MATERIAL, LARGEST OUTSIDE SIZE (D), OUTER DIAM (B), INNER DIAM (A), and THICKNESS. Inner or outer ring if any.



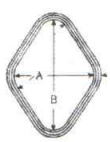
Oval Shape

When ordering, specify PRESSURE, MATERIAL, INNER & OUTER SIZES for A, INNER & OUTER SIZES for B, and THICKNESS.



Square Shape

When ordering, specify PRESSURE, MATERIAL, INNER & OUTER SIZES for A, INNER & OUTER SIZES for B and THICKNESS.



Oblong Shape

When ordering, specify PRESSURE, MATERIAL, INNER & OUTER SIZES for A, INNER & OUTER SIZES for B, RADIUS
for r, LENGTH for E, and THICKNESS.

Diamond Shape

When ordering, specify PRESSURE, MATERIAL, INNER & OUTER SIZES for A, INNER & OUTER SIZES for B, RADIUS
for r1 & r2, and THICKNESS.

Non-Asbestos Spiral Wound Gasket

Manufacturing ranges:

(mm)

Gasket Thickness	Manufacturing ranges Inside Diameter
4.5	10 to 3,000

Valqua® No.	Type	
＊＊＊0 Series (for example 6590 series)	R	Basic
＊＊＊1 Series (for example 6591 series)	OR	With Outer Ring
＊＊＊2 Series (for example 6592 series)	IR	With Inner Ring
＊＊＊6 Series (for example 6596 series)	IOR	With Inner & Outer Ring

Applications: Pipe flanges, tanks, valve bonnets and other equipment

BLACKTIGHT™

VALQUA® No. 6590 Series

These gaskets are composed of pure graphite (expanded graphite) as filler material.

Features:
- Reducing retightening frequency
- Excellent air tightness
- Excellent sealing properties at very low temperatures

Temperature	Pressure
−270 to 450°C / −454 to 842°F	Max 30.0 MPa

Suitable fluids: General fluids (water, oil, etc.), high temperature & high pressure steam, liquefied gas, cryogenic fluid.

Unit Per Pc.

CODE	Valqua® No.	Type	
81 18 03	6590	R	Basic
81 18 04	6591	OR	With outer ring
81 18 05	6592	IR	With inner ring
81 18 06	6596	IOR	With inner & outer ring

How to order: 81 - 18 - XX

Gasket, wound, spiral, SHAPE, PRESSURE, MATERIAL (INNER RING, HOOP, OUTER RING), OUTER DIAM, INNER DIAM, THICKNESS

WHITETIGHT™

VALQUA® No. 7590 Series

These gaskets are composed of PTFE tape as a filler material.

Features:
- Excellent corrosion resistance
- Excellent air tightness

Temperature	Pressure
−260 to 300°C / −436 to 572°F	Max 20.0 MPa

Suitable fluids: General fluids (water, steam, oil, etc.), solvents, corrosive liquids, liquefied gas, gas (oxygen, etc.)

Unit Per Pc.

CODE	Valqua® No.	Type	
81 18 07	7590	R	Basic
81 18 08	7592	IR	With inner ring
81 18 09	7596	IOR	With inner & outer ring

How to order: 81 - 18 - XX

Gasket, wound, spiral, SHAPE, PRESSURE, MATERIAL (INNER RING, HOOP, OUTER RING), OUTER DIAM, INNER DIAM, THICKNESS

CLEANTIGHTTM

VALQUA® No. 8590 Series

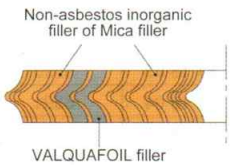
These gaskets are composed of non-asbestos-based inorganic paper tape as a filler material.

Features:
- Excellent heat resistance

Temperature	Pressure
−200 to 500°C / −328 to 932°F	Max 30.0 MPa

Suitable fluids: General fluids (water, steam, oil etc.), high-temperature & high-pressure fluids, liquefied gas

Unit Per Pc.



CODE	Valqua® No.	Type	
81 18 31	8590	R	Basic
81 18 32	8591	OR	With outer ring
81 18 33	8592	IR	With inner ring
81 18 34	8596	IOR	With inner & outer ring

How to order: 81 - 18 - XX

Gasket, wound, spiral, SHAPE, PRESSURE, MATERIAL (INNER RING, HOOP, OUTER RING), OUTER DIAM, INNER DIAM, THICKNESS

Spiral Wound Gaskets with Lines Lined CLEANTIGHT™

VALQUA® No. 8590L Series

These gaskets are composed of VALQUAFOIL™ (expanded graphite sealing material) filler that has been wound in the middle of inorganic fillers.

Features:

- Excellent heat resistance
- Airtight

Temperature	Pressure
−200 to 600°C / −328 to 1,112°F	Max 30.0 MPa

Unit Per Pc.

CODE	Valqua® No.	Type	
81 18 35	8590L	R	Basic
81 18 36	8591L	OR	With outer ring
81 18 37	8592L	IR	With inner ring
81 18 38	8596L	IOR	With inner & outer ring

How to order: 81 - 18 - XX

Gasket, wound, spiral, SHAPE, PRESSURE, MATERIAL (INNER RING, HOOP, OUTER RING), OUTER DIAM, INNER DIAM, THICKNESS

VALFLON™ Envelope Gaskets

VALFON® 封套型垫片
Junta envolvente VALFLON™
バルフロンジャケット形ガスケット

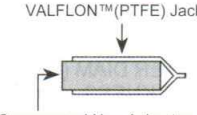
VALQUA® No. N7030 series

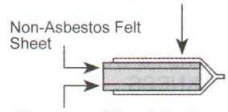
VALFLONTM (PTFE) Envelope Gasket using Compressed Non-Asbestos Fiber Sheet and Flexible Graphite in the core.

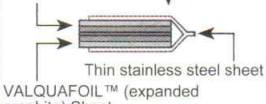
Feature:

· Excellent chemical resistance

Type	Temperature	Pressure (MPa)	Standard thickness (mm)
N	-100 to 150°C -148 to 302°F	Max 1.5	2.8
S	-100 to 200°C -148 to 392°F	Max 2.0	3.2
H	-100 to 260°C -148 to 500°F	Max 3.0	4.0







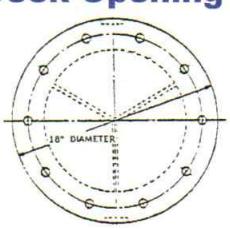
Suitable fluids: General fluids (water, steam, oil, etc.), solvents, corrosive liquids, liquefied gas.

Applications: Pipe flanges, tanks, valve bonnets, and other equipment used in various industries.

The ring molded article supports JPI (ASME / ANSI).

Type of VALFLON™ Envelope Gasket.

Unit Per Pc.



CODE	VALQUA® No.	Type

Hole Gaskets for Deck Opening

Juntas para Orificio
船倉孔用パッキン　塑钢粘合剂

For deck opening holes on tankers. The available materials are non-asbestos, oil, vegetable oil, or oil-resistant rubber gaskets.

Guide of How to order:

When ordering, please specify the following points:

CODE	**81 20 01**
Name	Hole gasket for deck opening
Material	Oil resist rubber
Size O.D. × I.D. × Th	460 × 320 × 3.2 mm
Bolt Hole Circle×Diam×No.	390 × 22 mm × 10 holes

Flange Gaskets

Juntas para Brida　フランジガスケット　法兰衬垫

Two types of gaskets are available.

Ring gaskets which cover from the face of the flange to the inside edge of the bolts, and full face gaskets which cover the whole face of the flange including the bolt holes. These gaskets are made of either non-asbestos oil or vegetable oil. When ordering, specify the type of gasket (ring or full face), the pipe size and material, and the bolt hole number and size if required.

Guide of How to order:

CODE	**81 21 01**
Name	Flange gasket
Type	Full face
Pipe Size	100A
Material	Vegetable oil

Full Face Flange Gaskets

Non-Asbestos

Juntas de Brida de Cara Completa Sin amianto
ノンアスベスト全面銅包みフランジガスケット
无石棉 全端面法兰垫片

Commonly used for high temperature requirement such as incinerators or funnels. Material is available from steel, copper, aluminium, or stainless steel. Please specify the material when ordering.

Ceramic Fiber Blanket Sheets

Manta de Fibra de Cerámica
セラミックファイバーブランケットシート
陶瓷纤维垫

Ceramic fiber blanket made from the purest of raw materials. Which are electromelted, air-brown at high speed and fiberized. Light in weight and soft to the touch, ceramic fiber blanket has various application with excellent refractory and insulating properties. Suitable for sealing, filtering, and reinforcing of various composites.

Typical Application:
Furnace linings, heat seals, packing, fire protection, noise reduction, filter material.

General Properties	
Max. Service Temperature	1,260oC (2,300°F)
Melting Point	1,760°C
Fiber Diameter (μm)	2.8
Fiber Length (mm)	250
Specific Gravity	2.6
Chemical Analysis	Al_2O_3 : 47.1% SiO_2 : 52.3%

Unit Per Sht.

Non-asbestos Brake Linings
Ferodo con Tejida sin Amianto
ノンアスベストブレーキライニング
非石棉刹车片

High quality lining made of special non asbestos heat-resistant tightly woven fabric, brass wire reinforced, impregnated with oil-resistant, wear-proof and heat resistant synthetic resin, finished to prescribed size of roll, generally from 5 to 25 mm thick, 25 mm to 300 mm width and 20 mtr long.

Application:
For large capacity / floating winch / crane, windlass, heavy industrial machines, dredger.

Asbestos Free #1350-WS (from FB Industrial)
A tough-heavy duty asbestos zero material with a high degree of flexibility & long life. Developed for use of resistance to heat, oil, abrasion and withdurability, and has stable coefficient of friction for a long period.

Asbestos Free Uni Tex No.8000 (from Wakasugi)
Service: For heavy duty brake lining such as windlass and winches.
Material: Woven brake lining with recent non-asbestos fibres and brass wire, and treated with special chemicals.

81 16 76	Brake lining, non-asbestos, SIZE, THICKNESS × WIDTH × LENGTH	Mtr.

Metal-filled Epoxies
Cemento epóxido con Metales
メタルエポキシ樹脂　含金属树脂

Loctite® Aluminium Liquid
Aluminio Líquido　アルミニウムパテ液状タイプ　铝液

Aluminium filled, pourable and self-leveling, steel-filled epoxy. Ideal for casting or making molds. Works well to fill hard-to-reach areas. Can be machined when cured. Sets in 25 minutes. Typical applications include filling or leveling equipment, pouring molds, parts, and fixtures, making aluminium forming dies, casting aluminium parts.

CODE	Contents	Unit
81 21 76	1 lb	Set

Loctite® PC7254 (3475 Aluminium Putty)
Masilla de Aluminio　アルミニウムパテ　铝油灰

Two-part epoxy system heavily reinforced with aluminium powder. Ideal for repairing aluminium parts under typical dry service temperatures to +93°C (+200°F), or where aluminium finish is desired. Use in repairing aluminium castings, repairing worn aluminium parts, making models and jigs for holding odd shaped parts, making aluminium dies.

CODE	Contents	Unit
81 21 77	1 lb	Set

Loctite® EA3476 (Stainless Steel Putty)
Masilla de Acero Inoxidable　ステンレススティールパテ　不锈钢油灰

Stainless steel filled two-part epoxy. Repairs stainless steel parts on applications where a stainless steel finish is desired under typical dry service temperatures to +107°C (+225°F). Once hardened it can be machined, drilled, tapped or filed just like the original metal. Typical applications are renewing stainless steel pumps, rebuilding stainless steel shafts, resurfacing stainless steel equipment, repairing stainless steel castings, making stainless steel molds.

CODE	Contents	Unit
81 21 78	1 lb	Set

Loctite® EA3472 (3472 Steel Liquid)

Líquido de Acero スティールリキッド（液状タイプ） 钢液

Two-part pourable epoxy system heavily reinforced with steel powder for casting parts or filling voids under typical dry service temperatures to +107°C (+225°F). Once hardened it can be machined, drilled, tapped or filled just like steel. Rebuilds worn parts fast, reduces downtime, high steel content-cures to a steel-like finish, superior adhesion-form a solid bond to steel, cast iron, stainless steel, concrete, and clean and abraded bronze, copper, and aluminium.

81 21 80	4 lb		

Loctite® EA3471 (3471 Steel Putty)

Masilla de Acero Inoxidable スティールパテ 不锈钢油灰

Steel reinforced, two-part epoxy that cures to a metal-like finish and can be machined, drilled, tapped or filed under typical dry service temperatures to +107°C (+225°F). Typical applications are sealing cracked castings, tanks, vessels, and valves, patching non-structural defects in steel castings, making models and jigs for holding odds shaped parts, making metal dies, resurfacing worn air seals, and filling cavitated areas.

81 21 81	1 lb	Grey	Set
81 21 82	4 lb		

Loctite® PC7290 (3474 Wear Resistant Putty)

Masilla Resistente al Desgaste 耐摩耗パテ 耐磨腻子

Ceramic fibers give this trowelable putty excellent wear and abrasion resistant properties under typical dry service temperature to +107°C (+225°F). Provides smooth, low friction finish for equipment exposed to wear, erosion, and cavitation. Typical applications are filling cavitation, providing protective coating in or on: pipes, pumps, elbows, transitions, butterfly valves, deflection plates, turbine blades, and tanks.

81 21 83	1 lb	Grey	Set
81 21 84	3 lb		

Loctite® (3478 Superior Metal)

Superior Metal スーペリア・メタル 高级金属

Non-rusting, ferro-silicone-filled epoxy. Extremely high compressive strength and wear resistance. Ideal for rebuilding worn surfaces exposed to harsh environments. Can be machined, drilled and tapped in 6-8 hours. For final finish cuts, let the product cure for 24 hours and use carbide tooling. Spreadable putty. Sets in 20 minutes.

CODE	Contents	Colour	Unit

Loctite® EA9480 (Underwater Repair Epoxy)

Epoxi de Reparación Subacuática

アンダーウォーターリペア（耐水性エポキシパテ）水下修复环氧树脂

This putty-like materials is ideal for plumbing, irrigation, and marine applications because it is unaffected by chlorinated or salt water. Ideally suited for underwater repairs. Sets in 15 minutes.

CODE	Contents	Unit
81 21 93	113 grm	Pc.

Loctite® EA3473 (3473 Fast Set Steel Putty)

Masilla de Acero de Fraguado Rápido

ファストセットスチールパテ 速凝钢腻子

Set in 3 minutes, steel reinforced, two-part epoxy designed for making fast and curable repairs to a variety of metals. This product is typically used in applications with maximum temperature +93°C (200°F). Typical applications include fuel and gas tank holes, stripped threads, cracked battery cases, leaking storage tanks, and leaks on pipes and elbows.

Loctite® 5070 Pipe Repair Kits

Equipo de reparación de tuberías
パイプリペアーキット　管道维修套组

No tools required, cures in 30 minutes. Easy-to-use pipe repair kit. Use for temporary and medium term repair of leaking pipes, and reinforcement of weak areas. Urethane impregnated fiberglass tape, activated by water, for reliable, temporary repairs of metal, plastic, and composite pipes. Kit contains Fixmaster Metal Magic Steel epoxy stick, urethane impregnated fiberglass tape, and gloves. Cures in 30 minutes. The maximum temperature resistance is +121°C(+250°F). Yellow color is available. Typical application include sealing cracked castings, tanks, vessels, valves and pipes. It also repairs pipe joints and reinforces tanks, vessels, valves, joints and elbows.

Small Pipe Repair Kits

Kits de Reparación de Tuberías Pequeñas
パイプ補修キット　小型管道修理工具包

Designed to put all products required to carry out emergency repairs to leaking pipework. By utilizing Pipe Repair Bandage, immediate and cost effective repairs can be carried out, and surface preparation is at a minimum due to the surface tolerant characteristics of Bandage. The end result can offer long term protection at a working temperature of 270°C and at pressures ranging from 10 bar (150psi) through to 27 bar (400psi) if used in conjunction with "Stick Grade Metal(Code 812202) and a double wrap.

Contents :

5 units	"Pipe Repair Bandage" W50mm × L1.8mtr
1 unit	"Stick Grade Metal"
5 pairs	Disposable gloves
1 vol	Mixing and application instructions packaged in a robust plastic container (which serves as a water bucket)

81 23 67	ThistleBond Small Pipe Repair Kit UPS19500	Set

ThistleBond SG Stick Grade Metal

SG Stick Grade Metal
SG スティックグレードメタル　SG 棒级金属

A specially packaged rapid curing synthetic metal repair compound for onsite repairs to metal components such as leaking pipes, tanks, ducts, radiators, etc.

81 22 02	ThistleBond SG Stick Grade Metal, 125 grm × 10, UPS 19060 SG	Pc.

ThistleBond EG Metal Repair Paste

EG Pasta reparadora de metales
EG メタルリペアペースト　EG 金属修补膏

A high performance multi-purpose synthetic metal repair compound specially developed for metal repairs requiring excellent mechanical strength combined with easy machining properties.

81 22 11	ThistleBond EG Metal Repair Paste, 1 kgs / Unit UPS 105 EG	Set

ThistleBond RH Standard Resin & Hardener

Resina y Endurecedor Estándar RH
RH スタンダードレジン＆ハードナー
RH 标准树脂和固化剂

A high performance, solvent free epoxy system designed for onsite

repairs to metal, wood, glass and synthetic materials. Excellent adhesion to both blast cleaned and mechanically prepared surfaces, excellent corrosion resistance even under seawater, unaffected by short term contact with industrial chemicals. Suitable for use up to 100°C (212°F) dry heat.

81 22 16	ThistleBond RH Standard Resin & Hardener, 225 grm x 10, UPS19000 RH	Set

ThistleBond GT Glass Tapes

Cintas de Vidrio GT　ガラステープ
GT 玻璃纤维胶带

A high performance unique braided Glass Fibre Tape that, when used in conjunction with the UPS 19000 RH (Code 812216) offers the ultimate in both Leak Sealing and Pipe Protection.

81 22 23	ThistleBond GT Glass Tape, 50 mm x 50 mtr, UPS 19007 GT	Rls.
81 22 25	ThistleBond GT Glass Tape, 100 mm x 50 mtr, UPS 19009 GT	"

ThistleBond A & B Cement

Cemento A & B　A & B セメント　A & B 水泥公司

A high performance, two pack, solvent free epoxy repair system for use on metallic surfaces. Ideal for application where only minimal surface preparation can be carried out and is usually used in conjunction with RH Standard Resin & Hardener (Code 812216). Suitable for rebuilding corrosion pitting on metallic structures and in particular, as a fairing compound on pipework prior to wrapping with the RH Pipe Repair System.

81 22 31	ThistleBond A & B Cement, 1 kgs UPS 19003	Set

Devcon Products

Productos "Devcon"　デブコン製品　Devcon 产品

Precision Repair Epoxy

Devcon Titanium Putty

Masilla de Titanio
チタニウムパテ　钛油灰

Titanium-reinforced epoxy putty for making repairs that can be precision machined. Provides excellent temperature resistance, high compressive strength and unmatched resistance to a broad range of chemicals and acids.

- Resistance to chemicals and most acids, bases, solvents, and alkalis.
- Temperature resistance to 350°F.
- High compressive strength (18,800 psi).

81 22 41	Devcon Titanium putty, 1 lb / unit	Set
42	Devcon Titanium putty, 2 lb / unit	"

Devcon HR SUPER 3000

Devcon HR Super 3000　HR スーパー 3000
得复康 HR 超级 3000

Provides excellent temperature resistance with continuous service temperatures (200-220°C) and maximum temperature (300°C). Enhances strength when used with enclosed glass tape under high temperature and pressures. Ideal for emergency repairs as cures in a few minutes at over 100°C. Trowelable and bonds to most metals.

81 22 43	Devcon HR Super 3000, 500 grm / unit	Set

Emergency Repair Epoxy

Devcon Underwater Repair Putty (UW)

Devcon UW, Masilla Reparadora para Bajo Agua
ウェットサーフェイスリペア UW　水下修理用封泥 UW

For repairing, patching and rebuilding equipment in habitually wet environments, even underwater.

- Bonds to steel, iron, aluminium, brass, bronze, concrete, wood, and plastics.
- Penetrates moisture; eliminates the need to dry substrates thoroughly before repairs.
- Cures at temperatures down to 40°F.

81 22 46	Devcon Underwater repair putty UW, 1 lb/unit	Set

Rubber Repair and Casting Urethanes

Devcon Flexane 80 Putty or Liquid

Devcon Flexane 80, Masilla o líquido
デブコンフレクサン 80P　橡胶制品修理用封泥 80P

Putty:
Trowelable 100 % solid urethane compound. Easy to mix and cures to tough, medium-hard rubber for a broad range of lining and protection applications. Withstands continuous service temperatures up to 180°F (dry environments) and 120°F (wet environments). Bonds to metal, concrete, rubber, wood and fiberglass.

Liquid:
Castable, non-shrinking, medium-viscosity urethane compound for making rugged, flexible molds, forming dies, cast parts and non-scratching holding fixtures, as well as abrasion and noise-resistant linings and encapsulating parts. Mixes and pours easily and cures at room temperature to a semi-rigid rubber material.

- Mixes easily and trowels on smoothly.
- Cures to a tough medium-hard rubber (Shore A 87).
- Service temperatures to 180°F dry / 120°F wet.
- Flexane Primers are recommended for maximum adhesion to metal, rubber, and concrete surfaces.

81 22 48	Devcon Flexane 80 putty 1 lb / unit	Set
49	Devcon Flexane 80 Liquid 1 lb / unit	"

General Repair Epoxies

Devcon Plastic Steel Putty (A)

Devcon (A), Masilla para Plástico-Acero
プラスチックスチールパテ デブコン A　塑钢泥 (A)

Metal filled epoxy putty used for routine maintenance, production, and tooling applications.
Bonds to most metal, concrete and some plastics and is ideal for patching and repairing areas where welding would be undesirable or impossible.

- Bonds to most metals, concrete, and some plastics.
- Cures at room temperature.

- Can be drilled, tapped, machine, water, and chemicals.
- Ideal for patching and repairing areas where welding or brazing would be undesirable or impossible.

81 22 51	Devcon Plastic steel A, 1 lb/unit	Set
52	Devcon Plastic steel A, 4 lb/unit	"

Devcon Plastic Steel Liquid (B)

Devcon (B), Líquido para Plástico-Acero
プラスチックスチールリキッドデブコン B　塑料 钢铁 液体

Steel-filled liquid epoxy with the performance properties of Plastic Steel Putty (A). Can be cast over models for accurate detail reproduction when making holding fixtures, light-gauge forming dies and molds. Hardens in about an hour.Hardens in about an hour.

- Hardens in about an hour.
- High compressive strength.
- Machinable to close tolerances.
- Low viscosity makes it an ideal leveling compound for machinery and equipment.

81 22 56	Devcon Plastic steel B, 1 lb/unit	Set
57	Devcon Plastic steel B, 4 lb/unit	"

Devcon Plastic Steel 5-minute Putty (SF)

Devcon (SF), Masilla para Plástico-Acero 5 minutos
プラスチックスチール 5 ミニッツパテ SF　塑钢油灰 5 分钟

Fast-curing, steel-filled epoxy for dependable emergency repairs in less than 1 hour. Cures to a tough, steel-filled material that can be machined, drilled, tapped or sanded.

- Cure in less than 1 hour.
- Tough, steel-filled material can be machined, drilled, tapped, or sanded.

81 22 62	Devcon Plastic steel SF, 1 lb/unit	Set

Devcon Aluminium Putty (F)

Devcon (F), Masilla para Alumnio
アルミニウムパテデブコン F　铝灰泥 (F)

Aluminium-filled epoxy putty for dependable non-rusting repairs to aluminium castings, machinery and equipment. Bonds to aluminium and other metals. Can be machined, drilled or tapped.

- Repairs air conditioning system components.
- Excellent resistance to chlorofluorocarbons.
- Bonds to aluminium and many other metals.
- Fills porosity in aluminium castings.
- Can be machined, drilled or tapped using conventional metalworking tools.

81 22 66	Devcon Aluminium putty F, 1 lb/unit	Set
67	Devcon Aluminium putty F, 3 lb/unit	"

Devcon Aluminium Liquid (F-2)

Devcon (F-2), Líquido para Alumnio
アルミニウムリキッドデブコン F2　铝液 (F-2)

Aluminium-filled pourable epoxy for molds, patterns, holding fixtures and cosmetic casting repairs. Cures just over 1 hour.

- Can be machined, drilled, or tapped.
- Low viscosity provides accurate reproduction of mold details and of delicate or intricate parts.

81 22 71	Devcon Aluminium Liquid F-2, 1 lb/unit	Set

Devcon Wear Resistant Putty (WR)

Devcon (WR), Líquido Resistente al Desgaste
ウエアーレジスタントリキッドデブコン WR　耐磨腻子 WR

High wear-resistant, self-lubricating compound for repairs requiring smooth surfaces against sliding wear.
Non-shrinking liquid used for building up metal shafts and pumps, making bearings and general repairs. Also ideal for making metal-forming dies and duplicating masters. Cures to a smooth surface.

- Bonds to steel, iron, aluminium, ceramic, concrete, brass, and some plastics.
- Contains wear-resistant fillers for low-friction applications.

81 22 81	Devcon Wear Resistant WR, 500 g / unit	Set

Devcon Wear Resistant Putty (WR-2)

Devcon (WR2), Líquido Resistente al Desgaste
ウエアーレジスタントリキッドデブコン WR2　耐磨腻子 WR2

Smooth, non-rusting, all purpose epoxy putty for repairs requiring low friction finishes, excellent wear resistance and protection from bi-metallic corrosion.
Bonds to steel, iron, aluminium, ceramics, concrete, brass, and some plastics.

- Bonds to steel, iron, aluminium, ceramic, concrete, brass, and some plastics.
- Contains wear-resistant fillers for low-friction applications.

81 22 86	Devcon Wear Resistant WR-2, 1 lb/unit	Set

Devcon Bronze Putty (BR)

Devcon (BR), Masilla para Bronce
ブロンズパテデブコン BR　青铜泥 (BR)

Bronze-filled epoxy putty for repairing bronze and brass bushings, shafts, castings and equipment parts. Ideal for repairing and rebuilding areas where brazing would be undesirable or impossible.

- Repairs and rebuilds areas where brazing would be undesirable or impossible.
- Bonds securely to bronze alloys, brass, copper and ferrous metals.

81 22 90	Devcon Bronze putty BR, 1 lb/unit	Set

Devcon Stainless Steel Putty (ST)

Devcon (ST), Masilla para Acero Inoxidable
ステンレススチールパテデブコン ST
不锈钢油灰 (ST)

Stainless steel-filled epoxy putty, ideal for patching, repairing and rebuilding stainless steel food processing equipment. It is non-rusting and bonds to ferrous and non-ferrous metals.

- Bonds to ferrous and nonferrous metals.
- Nonrusting.
- NSF certified for potable water applications and acceptable for use in meat and poultry plants.

81 22 92	Devcon Stainless steel putty ST, 1 lb/unit	Set

Devcon Magic Bond (cures in 12 hours at 25°C)

Devcon Magic Bond (Pegamento Mágico)
デブコンマジックボンド　萬能膠

Devcon Fasstik (shows 85% of strength in 15 min. at 25°C)

Devcon Fasstik (Pegamento de Barra)
デブコンファススティック　萬能膠

Ideal for emergency repairs. Easy to carry and use: cut as you need, mix with fingers and patch.

For Magic Bond
- For plumbing repairs and marine use.
- Cures rock-hard in 30-40 minutes, seals permanently.
- Cure even under water.

For Fasstik
- NSF certified for use in potable water applications.

81 22 93	Devcon Magic Bond, 114 g / unit	Pc.
94	Devcon New Fasstik, 114 g / unit	"

Devcon Zip Patch

Devcon Zip Patch (Parche Potente)　ジップパッチ　修理胶带

Easy-to-use waterproof adhesive patch kit. Hardens in minutes at room temperature. Excellent adhesion to iron, steel, stainless steel, titanium, FRP, aluminium, wood, ceramics, composites, acrylics, PVC, and other plastics. Makes permanent, waterproof field repairs to pipes, tanks, and containers.

Contents: Glass fibre patch 100 mm × 230 mm, Activator spray, Spatula, Protective gloves.

81 22 98	Devcon Zip Patch	Kit

Cordobond Products

Productos "Cordobond"　コードボンド製品　Cordobond 产品

Cordobond Strong-Back Resin & Activator

Resina y Activador Strong-Back
コードボンド製品スタンダード　考特强力粘合剂

Liquids to be mixed together for use with glass cloth, glass mat and glass tape. The mixture hardens into a rigid mass that bonds with high tenacity to almost any surface to produce a tight seal which will not dissolve in water, oil or most chemicals and will resist elevated temperatures and pressures.

81 23 01	Cordobond Strong-back resin & activator, 453 grm/unit	Set
02	Cordobond Strong-back resin & activator, 906 grm/unit	Set

Cordobond Strong-Back Putty (Red)

Masilla (Roja) Strong-Back　パテ　考特强力粘合膏

A tough, dense compound which sets up hard and possesses high adhesive qualities. Used for plugging large holes before reinforcement with activated Cordobond strong-back resin and fiberglass cloth.

81 23 06	Cordobond Strong-back putty, 226 grm/unit	Set

Cordobond Strong-Back Sealer

Sellador Strong-Back
コードボンドシーラー　考特强力密封膏

Sticky material for sealing small holes, cracks and leaks around tank and pipe fittings where pressures are low. Can be applied by trowel or putty knife.

81 23 08	Cordobond Strong-back sealer, 113 grm/unit	Set

Cordobond Strong-Back Steel Putty

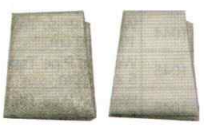
Masilla de Acero Strong-Back
コードボンドスティールパテ　考特铜质粘合膏

Combination of steel packed resin and activator for repairing cracks, holes, crevices, defects, etc. in steel and other metals. Steel putty can be drilled, threaded, machined, filed or hack-sawed.

81 23 10	Cordobond Strong-back steel putty, 453 grm/unit	Set

Cordobond Strong-Back Leveling Compounds (Yellow)

Compuestos (Amarillos) para Allanar
レベリングコンパウンド　强力备材



Trowel applied packed resin and activator used for building up corroded and pitted areas to a uniform surface.

81 23 12	Cordobond Strong-back leveling compound, 453 grm/unit	Set

Cordobond Glass Sheets

Plancha de Vidrio　ガラス シート　玻璃板

Cloth　Mat

Glass tape, cloth and reinforced mat. The tape and cloth are made of woven glass yarn. Provides the main strength of a patch when saturated with activated Cordobond strong-back resin. The mat is made of fibers which are felted together and reinforced. Due to its absorbing and reinforcing qualities, glass mat is used to speed up the curing and provides additional strength.

81 23 21	Cordobond glass cloth, 1,000 × 1,000 mm	Sht
22	Cordobond glass mat, 900 × 900 mm	"

Cordobond Repair Kits

Equipos para Reparación　リペアーキット　维修工具包

These repair kits are the commercial adaptation of the U.S. Navy kit, packed in suitable chests. The kit container size is 480 × 320 × 320 mm.

The Repair Kit contains the following:

20	Unit	226 grm	Cordobond Strong-Back Standard Resin & Activator
2	Unit	226 grm	Cordobond Strong-Back Putty (red)
2	Unit	113 grm	Cordobond Strong-Back Sealer
2	Unit	453 grm	Cordobond Strong-Back Steel Putty
2	Unit	453 grm	Cordobond Strong-Back Level Compound
1	Sht	1mtr×2.7 mtr	Cordobond Glass Cloth
3	Rolls	38mm×1mtr	Cordobond Glass Tapes
1	Sht	1mtr×90cm	Cordobond Glass Mat
1	Sht	3cm×1mtr	Cordobond Contour Cloth
2	Pair		Neoprene Gloves
1	Pair		Scissors
12	Pcs		Wood Stirring Tools
1	Sht	2.4mtr×30cm	Kraft Paper
1	Ball		Twine
12	Pcs		Paint Brushes
1	Roll		Pressure Sensitive Tape

Wencon Products

Productos Wencon　ウェンコン製品　WENCON 产品

Wencon Repair Kit for Marine

Wencon Equipo de Reparación　補修キット　WENCON 修补用具

The mechanical first-aid kit for leaking pipes and tanks, for corroded cooler end covers, pump casings, valves, sea water filters, etc. Wencon repair kits are available in different sizes, depending on size and age of the vessel.
Covers most aspects of emergency repairs and long lasting maintenance. Suitable for all ships where repairs and maintenance are carried out frequently. Please select a suitable kit according to your vessel's size and age from the following range of kits.

Product No.	The 4 standard repair kit contains:	Kit 1 (812341)	Kit 2 (812331)	Kit 3 (812332)	Kit 4 (812333)	Tanker Kit (812326)

Wencon Exhaust Repair Kit

Wencon Equipo de Reparación de Escape
排気システム用補修キット　WENCON 排气系统修补用具

One-component cold weld product for repair of cracks and leaks in exhaust systems exposed to high temperatures. The compound resist temperatures up to 1,300°C (2,400°F).

The kit contains;

2 × 250 grm	Exhaust repair compound
1 pc	Metal mesh for reinforcement purposes
1 pc	Spatula
1 pc	Application data sheet

81 23 40	Wencon exhaust repair kit, 2 × 250 grm product No. 1070	Set

Wencon Cream/Rapid

Wencon Crema de Reparación para Metales/Rápida
クリームラピッド　WENCON 修补膏

Repairing and refurbishing metal structures being deteriorated through corrosion, bimetallic corrosion or in other ways. Especially used for corroded tanks, pump housings, valves, filter housing and strainers, tubes, heat exchanger end covers, flange faces. Roller bearing seats, alignment of bushings, shafts, hydraulic rams, key ways, etc. "Cream" and "Rapid" are both paste consistency and easy applied even to vertical surfaces, and "Cream" is for slow curing and "Rapid" is quick curing.

CODE	Description	Products No.	Contents	Unit
81 23 35	Wencon cream	1010	1 kg	Set
81 23 43	Wencon rapid	1005	8 × 125 grm	Set
47	Wencon rapid	1000	1 kg	Set

Wencon UW Cream Wet Surface

Crema UW Wencon　水中補修用クリーム　WENCON 水下修补剂

A two component cream, to be applied on wet surfaces or under water. The UW Cream is excellent for filling up holes, dents and rebuilding of surfaces which, due to high humidity, have to be done in wet conditions. Typical applications are corroded hulls and all underwater parts of ships and structures, tanks, pipes, flange faces, etc. It is also excellent for filling up cavitation damages on hulls and rudders. Wencon UW Cream has a strong adhesion to all metal surfaces.

81 23 34	Wencon UW cream, wet surface, #1014, 0.5 kg	Can

Wencon Coating

Wencon Revestimiento　コーティング材　WENCON 高温保护材料

For protecting your machine parts against bi-metallic corrosion, erosion/ corrosion, impingement, entrainment, etc. The treatment will improve the flow characteristics in pumps and valves. Typical applications are coating of surfaces rebuild after deterioration, protection of tanks, pumps, valves, wet liners, cooler end covers etc. against corrosion and bi-metallic corrosion as well as a variety of small and large repair and maintenance jobs. Wencon Coating can be applied by spatula and is a double coat system in white and blue.

CODE	Description	Products No.	Contents	Unit
81 23 37	Wencon coating white	1020	0.5 kg	Set
38	Wencon coating blue	1030	"	"

Wencon Hi-Temp

Wencon Revestimiento para Alta Temperatura
高熱用コーティング材　WENCON 高温保护材料

The high performance coating product for repair and protection in high temperature and aggressive environments. The Hi-Temp offers temperature up to 160° C, provided the media is not boiling. Typical applications are coating of surfaces rebuild after deterioration including repair of lining on inert gas systems, fresh water generators, hot pipes and heating coils, protection of tanks, pumps and valves against chemical and mechanical aggression, corrosion and bi-metallic corrosion. Wencon Hi-Temp is supplied in a double coat system in yellow and green.

CODE	Description	Products No.	Contents	Unit
81 23 45	Wencon hi-temp yellow	1050	0.5 kg	Set
46	Wencon hi-temp green	1060	"	"

Wencon UW Coating Wet Surface

Capa UW Wencon　水中補修コート材　WENCON 水下修补剂

Excellent liquid coating for applying on wet surfaces or under water, with a very good adhesion to metal surfaces. Typical applications are coatings of steel surfaces rebuild with Wencon UW Cream, and coatings under water - like ships hulls and/or other submerged structures, tanks, pipes etc. Examples of repairs under extreme conditions could be: on-site repair of sea-water filter housings, unable to achieve a dry surface and coating of scratched painting on hulls in splash-zones and under water. Wencon UW Coating is a double coat system and is supplied in two different colours, orange and brown.

81 23 36	Wencon UW Coating, wet surface, orange #1035, 0.5 kg	Set
81 23 27	Wencon UW Coating, wet surface, brown, #1036, 0.5 kg	"

Wencon Bio Cleaner

WENCON Bio Cleaner　生分解性クリーナー　WENCON 清洗剂

A water based alkaline degreaser, used for cleaning purposes prior to application of Wencon products, in order to ensure best possible adhesion. An environmentally friendly product and is classified as Non Dangerous Goods. Applied on wet and dry surfaces. For application on wet surface, Wencon UW Coating is needed as a primer before application of any further products. Supplied with a separate spray, which is set for foam spray when delivered. Recommend using foam spray, due to the efficiency.

81 25 97	Wencon Bio Cleaner, spray, #1104, 0.75 ltr/btl	Btl.

Wencon Pipe Tape

Wencon Cinta para Reparación de Tubeías
パイプテープ　WENCON 管道胶带

A fast curing pipe repair bandage especially formulated to make quick and effective repairs of cracks, leaks, fractures, and corrosion porosity in piping carrying water, oil, steam, most gases and even solvents. Wencon Pipe Tape has good pressure, temperature and chemical resistance. Available in 3 sizes.

CODE	Description	Product No.	Unit
81 23 28	Wencon pipe tape, 2 unit pack 10 cm x 350 cm	1044	Set
44	Wencon pipe tape, 5 unit pack 5 cm x 150 cm	1045	"
48	Wencon pipe tape, 4 unit pack 5 cm x 350 cm	1046	"

Wencon Putty

Wendon Masilla　パテ　WENCON 密封料

The quick curing, ready to use, mouldable, epoxy repair paste. This multipurpose epoxy paste is ideal for a wide range of emergency repairs where an ultra quick curing and mouldable compound is required. Typical applications are patching sealing and filling of cracks, leakages and holes in pipes, on flanges, in tanks etc. Used in combination with Wencon Pipe Tape.

81 23 42	Wencon putty, 8 x 125 grm, product no. 1040	Set
81 23 29	Wencon putty, 4 x 125 grm, product no. 1042	"

Wencon UW Putty

Wendon UW Masilla　水中補修パテ　WENCON UW 密封料

Wencon UW Putty is a two-component compound, to be applied on wet surfaces or under water. The UW Putty is excellent for filling up holes, dents and rebuilding of surfaces which, due to high humidity, have to be done in wet conditions. Wencon UW Putty is developed for applications, where bigger quantities are needed in one process.

81 23 54	Wencon UW putty, 1 kg, product No. 1012	Set

Wencon Cleaner

Wencon Limpiador　クリーナー

WENCON 清洗剂

Trichlorethylene based non-flammable degreasing agent, which is used for cleaning purposes prior to application of the Wencon products.

81 23 49	Wencon cleaner, 0.5 ltr	Can

Wencon Release Agent

Wencon Agente para Despegar　剥離材　WENCON 分离剂

Used in applications where you want to prevent adhesion between Wencon and the substrate. The release agent is applied in a thin layer and left for drying in ten minutes. Remove excess material using a cloth.

81 23 50	Wencon release agent, 50 grm	Pc.

Wencon Ceramic Cream

Crema Cerámica Wencon　セラミッククリーム　威康陶瓷乳剂

The epoxy compound for repair and rebuilding of deteriorated metal parts, exposed to excessive wear. Typical applications are corroded tanks, pump housings, impellers, valves, pipes, flange faces, roller bearing seats, worn shafts, hydraulic rams and heat exchangers. Wencon Ceramic Cream is also excellent as a filling compound.

Wencon Ceramic Cream can be machined, drilled and worked like metal after curing. The compound has a paste consistency and is easily applied by spatula also to vertical surfaces.

81 25 92	Wencon ceramic cream, No.1016, 1 kg	Set

Wencon Ceramic Coating

Revestimiento Cerámico Wencon
セラミックコーティング　威康陶瓷涂层

The versatile and cost effective two-component coating product for general repair, maintenance and protection of surfaces, exposed to excessive wear. Typical applications are coating of surfaces rebuild after deterioration, protection of tanks, pumps, valves, wet liners, cooler end covers etc. against wear, corrosion and bi-metallic corrosion as well as a variety of small and large repair and maintenance jobs.
Wencon Ceramic Coating is a double coat system and is consequently supplied in two different colours, light grey and light green. The product is liquid and is applied by brush, roller or spatula.

81 25 93	Wencon ceramic coating, Light Grey, No.1017, 0.5 kg	Set
94	Wencon ceramic coating, Light Green, No.1018, 0.5 kg	"

Wencon Application Tools

Utensilios de aplicación Wencon
アプリケーションツール　威康应用工具

Wencon Application Tools are quality products regularly used in connection with mixing and application of Wencon repair products.
The kit contains:
- 4 spatulas for application of compounds and coatings.
- 4 brushes for application of coatings.
- 4 mixing knives for mixing of Wencon two component.
- 1 pair of scissors for cutting Wencon Reinforcement Tape, Pipe Tape and other soft material.
- 4 pairs of nitrile-gloves.

81 25 95	Wencon application tools, No.2805	Set

Wencon Fixation Tools

Herramientas de fijación Wencon　固定・補修ツール　维修工具包

Used for repair of cracks and corrosion in tanks, leaking pittings and welding seams. The Fixation Tools help to support and secure Wencon products to the damaged part.

81 25 96	Wencon Fixation Tools, No.2808	Set

Belzona Polymerics

1111 Super Metal

Super Metal de Belzona Polimérica
ベルゾナポリメリックススーパーメタル　高级金属修理膏

A general-purpose engineering compound for fully machinable repairs.

Belzona 1111 Super Metal has outstanding mechanical strength combined with excellent chemical resistance. The unique properties of 1111 Super Metal make it ideal for application to hydraulic rams, worn shafts, oversize housings, worn keyways, damaged engine blocks, distorted flanges, and also to repair pinholes and fractures in pipe work, particularly on T-pieces and elbows. Repairs tracked and eroded flange faces. Each unit contains basic resin and hardener.

Suitable for contact with potable water as it is certified to NSF/ANSI Standard 61 and satisfies the UK Drinking Water Inspectorate.

Unit Per Set

Water Activated Tapes

for Pipe Repair

Cintas de plástico reforzado con vidrio hidroactivas para reparación de tuberías
配管修理用水発泡テープ　管道修理用水发泡胶带

Designed and recommended for stopping leaks in pipe which may occur due to corrosion or other reasons. Composed of a quality knitted fiberglass cloth coated with a special poly-urethane resin which is activated by a 5 second immersion in water. Once activated by water the tape will transform from a wet adhesive into a rigid plastic state in minutes. Bonds to most common plastic or metallic pipe materials such as steel, iron, copper, PVC, fiberglass, and others. Recommended for leaks not exceeding 1/8" in diameter and pipe size 2" in diameter. May be used with good results on pipe with a temperature range from –29°C to 121°C. Each roll of products is individually packaged with gloves for handling.

Unit Per Rls.

CODE	Size	Weight grm
81 23 61	5 cm × 1.2 mtr	130
64	5 cm × 1.5 mtr	100
62	5 cm × 3.6 mtr	205
81 23 65	7.5 cm × 1.2 mtr	160
81 23 63	10 cm × 1.2 mtr	307

Pipe Repair Kit

Water Activated Fiberglass Tapes

Cintas de plástico reforzado con vidrio hidroactivas para reparación de tuberías
水活性テープ配管修理キットト　管路修理用水发泡胶带

Ideal for the emergency repair of defective and damaged pipes and pipelines. It comprises one WEICON Repair Stick Multi-Purpose, a special repair tape made of fibreglass-reinforced plastic, assembly instructions and one pair of protective gloves. The repair tape is soaked with a special resin and is activated by contact with water. Can be processed without additional tools and provides reliable long-term sealing of cracks and leaks. It is very easy and fast to apply and shows excellent adhesive properties, high resistance to pressure and chemicals as well as high temperature resistance up to 150°C. Certified to NSF/ANSI 61 as drinking water approval.

81 24 31	Pipe Repair Kit, Water Activated Fiberglass Reinforced Plastic Tape	Set

Name of Mfr.: Weicon GmbH & Co. KG

High Pressure Leak Sealant Kits STOPIT® HP™

Equipo para sellado de fugas de alta presión
高圧配管修理用水発砲テープキット
高压管道修理用水发泡胶带配套工具

A multi-component epoxy composite repair system designed for high-pressure sealing applications with working pressures up to 2,000 PSI (140 kg/cm²) and operating temperatures up to 165°F (74°C). The repair system provides a built in 5:1 safety margin.

Repair applications can be made regardless of pipe orientation and results in a durable coating approximately 5mm thick. The repair epoxy system has a working time of approximately 8 – 10 minutes and will allow return to service in as little as 4 hours.

Supplied in a kit with all the necessary components for field installation*. Standard kits for repair of pipes up to 4" in diameter are available; non-standard kits can be custom made to order with short delivery times.

* Installation requires no special training and involves minimal surface preparation.

Physical Properties of Sealant:

Shelf Life:	6 months from date of purchase when stored at 40° to 83°F (5° to 28°C).
Colour:	Component 1-Clear/Component 2- Straw/Fiber-yellow.
Mixing Ratio:	As supplied, dual cartridge dispenser.
Pot Life:	8 min. @72°F (22°C), after mixing for films less than 1/2" thick.
Glass Transition Temperature:	216°F (102°C), cured and annealed.
Cure Time:	- 4 hour @72°F (22°C) at 1/8" film thickness.
Sealant Viscosity:	Gel-like before cure.

Kit Contents

1 x Pre-filled dispensing cartridge(s) 2 x Static mixers with retainer 1 x Composite fabrics 1 x Instruction manual	1 x Mixing tray 1 x Safety gloves 1 x Clean-up supplies

Adjustable Pipe Repair Clamps

Abrazaderas Ajustables para la Reparación de Tuberías
調整式パイプ補修クランプ　　可调式管路维修夹钳

Adjustable Type 301 Stainless Steel repair clamps repair splits, pin holes or punctures in pipe or tubing. This handy tool is uniquely faced with expanded PTFE which is the most effective seal for all common chemicals and is food grade acceptable. The clamp conforms to most irregular surfaces and controls most pressures with simple hand-tightening. Adjustable to fit pipe and tube sizes from 1/2" to 6". Combine clamps to fit larger sizes. 10 clamps per case.

81 23 66	Stop-It® Pipe Repair Clamp for pipe size 1/2" to 6", 10 clamps per case	C/S

Leak Repair Kits

InduMar - First Response™

Equipos para Reparación de Fugas
漏洩補修キット　洩漏维修成套工具

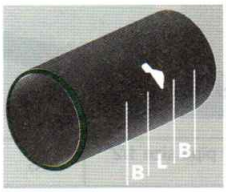
Quickly repair most common leaks in pipes, tanks and drums with a variety of sealing devices and materials. Designed with first responders in mind. The kit has the tools to respond to pipe leaks and surface holes of all shapes, as well as cracks and gashes - includes the following:

No.	Items	Q'ty
1.	Stop It® Pipe Repair System – small/medium/large	1
2.	Epoxy Fix Stix™	5
3.	Assorted wooden plugs	18
4.	Rubber hammer	1
5.	Plug rugs "Plug-N-Dike"	2
6.	Plug patties "Plug-N-Dike"	3
7.	Lead wool filler pack	1
8.	Hot/cold hose repair tape	1

81 23 68	Leak repair kit, First Response™	Set

Emergency Pipe Repair Systems

Sistema de reparación de emergencia para tuberías
緊急パイプ補修クランプシステム　应急管道修补带



The fastest and easiest way to temporarily repair pipe leaks and bursts. Taking less than 60 seconds to install and featuring a fully self-contained design, which does not require the use of tools. Made from 316 stainless steel, the rapid response clamp system covers 10 bar, 20 bar and 40 bar faults and features a Nitrile or Viton lip-seal, making it suitable for water, gas and petroleum liquids.

Designed under contract by the Australian Government Defence Science and Technology Organisation (DSTO) for use by the Royal Australian Navy, and is suited to a wide range of commercial uses, including: marine, oil and gas, mining, emergency services and plumbing applications.

Selecting the correct clamp length;
When repairing a damaged pipe, it is important to ensure sufficient rubber gasket contact between the edge of the damaged area (refer to "L") and the edge of the clamp. The table below provides a guide to clamp selection, where "B" is the minimum recommended sealing width between the damaged area (L=width) and the end of the clamp.

Nom. Diameter (DN)	Min. Seal Length B (mm)
38 mm - 930 mm	15 mm

Minimum Recommended Clamp Length = L + 2B
Example; If the damaged area measures 20 mm, then a 60 mm Single Clamp should be used.
(L = 20; 20 + [2 x 15] = 50 mm)

Metal Repair and Protection Systems

Reparación de Metal y Sistemas de Protección
金属修理・保護システム　金属修理・保护系统

The polymer composites provide the ultimate solution for erosion, corrosion, wear or chemical attack which create problems in fluid flow systems.

The systems exhibit outstanding compressive and flexural strengths as well as phenomenal adhesion, producing the most advanced polymer claddings available for rebuilding, resurfacing and protecting virtually all fluid flow components.

Metalclad Duralloy

Multipurpose paste material, can be drilled, tapped, turned on a lathe, sanded and polished. Can be used to repair worn shafts, cracked casings and engine blocks, etc. Trowelable, requires no heat.

81 23 71	Metalclad Duralloy, 1 kg	Set
72	" 2 kg	

Metalclad Speedalloy

The leak stopper paste material. Fast, easy, non-slump ; can be used to repair just about any leak in minutes. Bonds to virtually any rigid surface.

81 23 75	Metalclad Speedalloy, 167 grm × 10's	Set

Metalclad Ceramalloy CP+

Outstanding wear resistant paste material. Trowelable system for repairing and rebuilding metal damaged by erosion and corrosion: pumps, valves, heat exchangers, etc.

81 23 77	Metalclad Ceramalloy CP+,1 kg	Set
78	" , 2 kg	"

Metalclad Ceramalloy CL+

The ultimate resurfacing system for protecting fluid flow equipment. Brushable, self-leveling, castable thixotropic liquid for pumps, valves, water boxes, tube sheets, tanks, propellers, etc. Two colours (blue and grey) are provided.

81 23 81	Metalclad Ceramalloy CL+, Blue, 1 kg	Set
82	" , Grey, 1 kg	"

Flexiclad Dura Tough

These systems provide exceptional protection to equipment prone to cavitation attack and subsequent damage. Also ideal for creating or repairing flexible seals on machinery and equipment such as on heat exchangers, pumps, valves and piping systems.

Dura Tough DP: Epoxy urethane paste
Dura Tough DL: Thixotropic liquid, blue or green

81 23 85	Flexiclad Dura Tough DP, 500 grm	Set
81 23 86	Flexiclad Dura Tough DL, blue, 500 grm	Set
87	" , green, 500 grm	"

Chemclad XC

Epoxy system liquid resistant to a very wide variety of organic and inorganic acids, alcohol, alkalis, ester, ether, hydrocarbon, ketone, oil, salt, etc. Can be easily and safely applied by brush, roller, squeegee or airless spray. Two colours (light grey and dark grey) are provided.

81 23 91	Chemclad XC, light grey, 5 kg	Set
92	" , dark grey, 5 kg	"

Eneseal HR

To provide maintenance and facilities engineers to protect insulation from water and oil impregnation, impact and chemical attack; to seal and protect concrete containment walls ; to provide a heat refractive surface to reduce the heat envelope around the equipment and structures —especially metal decks, increasing energy efficiency; and to waterproof just about any porous surface. Can be easily and safely applied by roller, brush or spray.

81 23 95	Eneseal HR, 15 ltr	Can

ウルトラメタル・セラミック・スティール・パティ
超金属陶瓷钢腻子

Ultrametal ceramic steel is suitable for extreme loads when maintaining industries and crafts. The highly wear resistant polymer provides an extended pot life in combination with a shortened curing time (<2 hours) which allows best results on medium as well as large-scale repairs e.g. pipe coatings, wear protection coatings, pump repairs, slides, shafts etc.

Product Benefits:
- Increased wear resistance.
- High chemical resistance.
- General purpose compound in engineering.
- Short curing epoxy (2 hours).

81 23 88	DIAMANT Ultrametal ceramic steel putty 1kg/set	Set

DIAMANT Ship Repair Set

Conjunto de reparación para barcos DIAMANT
緊急パイプ補修キット　应急管道修补套组

The "must have" solution kit for general maintenance as well as emergency repairs. The ship repair set provides solutions from simple leak repairs up to emergency repairs of pipes, pumps, tanks and other equipment in the open sea.

The set consist of:

1 x 500 grm	Plasticmetal cast-iron WF 0062
2 x 500 grm	RR-Metal 0316
1 x 500 grm	Ultrametal ceramic rapid 1685
1 x 500 grm	Ultrametal ceramic-steel 1683
1 x 500 grm	Diagum putty 0373
1 x 200 ml	DIAMANT cleaner liquid 1417
div.	Application and mixing tools, reinforcement materials, clamps and technical documentation

81 23 89	DIAMANT ship repair set	Set

DIAMANT Diagum

Agente endurecedor de baja temperatura　低温硬化剂　低温硬化剂

Cold-curing 2-component elastomer for reliable repairs which cures to a tough medium-hard rubber (Shore A85). After curing the product is extremely elastic and resistant against chemical and physical loads up to 160°C. The elastomer perfectly adheres to all metals, natural and synthetic rubbers, nitrile, butyl, concrete, fiberglass and wood. Diagum is commonly used on pipes, pipe bends, clutch parts, polishing drums, rubber hoses, rubber rolls, rubber wheels, surface seals, conveyor belts and many other parts. Diagum is available in putty and liquid viscosity.

CODE	Description	Unit
81 23 93	DIAMANT diagum liquid, 500 grm/set	Set
94	DIAMANT diagum putty, 500 grm/set	"

DIAMANT RR Metal

Agente de reparación de metales DIAMANT RR
金属補修剤　金属修补剂

Quick and reliable repair material for metal parts even on WET SURFACES or UNDERWATER. Two component type rapid repair system for voids, cracks, dents and holes in all kind of machine elements, castings, pipes, tanks, pumps and engines. It adheres to nearly all surfaces and offers a wide range of protection against corrosion, erosion, chemical, thermal and physical attacks. Permanent temperature resistant up to 160 °C / 320 °F and a free mixing ratio gives you the possibility to adjust the viscosity from liquid to putty to fulfill your needs during the application.
Product Benefits :

- Applicable on wet surfaces.
- Fast curing (Even underwater).
- Resistant up to 160°C.
- Free mixing ratio (Liquid & putty in one product).

81 23 98	Industrial Pack	650 grm	350 grm

DIAMANT Plasticmetal WF

Masilla de metal DIAMANT de alta temperatura
高温用金属補修剤　高温金属修补剂

Quick and reliable repair material for metal parts even at HIGH TEMPERATURES. Two component type rapid repair system for voids, cracks, dents and holes in all kind of machine elements, castings, pipes, tanks, pumps and engines. It adheres to nearly all surfaces and offers a wide range of protection against corrosion, erosion, chemical, thermal and physical loads. Permanent temperature resistant up to 250 °C / 480 °F and a free mixing ratio provides you the possibility to adjust the viscosity from liquid to putty to fulfill your needs during the application. Plasticmetal has been developed for an outstanding ease of use compatible with superior technical properties.

Product Benefits:

- Temperature resistant up to 250 °C.
- Very high proportion of metallic fillers.
- Excellent technical characteristics.
- Fast curing.
- Machinable like metal.
- Variable viscosity.

DIAMANT Ultrametal Putty

Masilla para metales de uso general
汎用金属補修剤　通用金属修补剂

The general purpose compound in engineering. The polymer metal is highly resistant against chemical and physical loads and is machinable like metal: file, mill, turn, and bore, thread cutting and polishing. Up to 90% metallic filters allow best metal properties and guarantee a long-lasting repair. Ultrametal has been developed especially for large-scale repairs with an ineffectual shrinkage.

Product Benefits:

- General purpose compound in engineering.
- Preferred choice for large-scale repairs.
- Deliverable in service boxes.
- Mixing ratio 1:1 eases the application.

81 23 96	DIAMANT Ultrametal putty, 1,000 grm	Set

DIAMANT UM1250

Equipo de reparación rápida DIAMANT UM1250
緊急補修キット　应急修补套组

The quick repair solution for emergency situations. Very good adhesion to any kind of metal even on OILY SURFACES. Short curing times make DIAMANT UM1250 the first choice to repair parts at sea. Whether housings, pumps, containers, engine blocks, cylinder heads, gear boxes, bearing seats, coolers, propellers, impellers, tubes or pipes, UM1250 is your solution to fix the problem within a couple of minutes. Suitable for small areas with good resistance to wear, abrasion and

extremely resistant to aggressive chemicals. Machinable like metal. Mixing ratio 1:1 by volume, delivered in a complete box with all needed tools in one set.

Product Benefits:
- Applicable on oily surfaces.
- Emergency repairs / first curing.
- Perfect adhesion on metal parts.

81 23 97	DIAMANT UM1250, 500 grm	Set

Weicon Emergency Repair Kit

Equipo de reparación rápida
ウェイコン緊急補修キット　应急修补套组

For emergency repairs and maintenance works on board of ships, equipped with many different products that support you in various cases, cover most cases of offshore emergency repairs and maintenance works during long ways.

Repair Kit 1 covers the most common emergency and maintenance cases, Repair Kit 2 and 3 covers a lot of different applications on board. The Repair Kits are suitable for all ships, where repairs and maintenance have to be done frequently.

The 3 standard repair kit contains:	Kit 1 (812907)	Kit 2 (812908)	Kit 3 (812909)

WEICON Plastic Metals

Epoxy Resins for Repair, Casting and Bonding

Weicon Plásticos/Metales　ウェイコン補修製品　WEICON 塑胶制品

High-quality, two-component epoxy resin systems for fast, cost-effective and durable repairs of many types of material. Ideal for rebuilding of shafts, repairing leaking pipes and tanks, repair of pumps and valves damaged by erosion and/or corrosion and many other cases. Temperature resistant from –35°C to +120°C. After curing, the material is machinable with normal working tools and equipment.

Unit Per Set

CODE	Product	Content	Description
81 29 01 02	WEICON A	0.5 kg 2.0 kg	Pasty, steel-filled, certified by DNV. Especially suitable for the elimination of corrosion damages and pitting on tanks, repairs on pipes and castings, housings and machine parts.
81 29 05 06	WEICON B	0.5 kg 2.0 kg	Flowable, steel-filled, long pot life. Making of moulds and models, tools, templates, gauges and fixtures. Also for filling blowholes and microporosities on castings as well as for general repair works where a castable compound is advantageous.
81 29 10 11	WEICON BR	0.5 kg 2.0 kg	Pasty, bronze-filled, non-corrosive. For filling blowholes and rebuilding bronze equipment parts (e.g. propellers of ships).
81 29 03 04	WEICON C	0.5 kg 2.0 kg	Flowable, aluminium-filled. High temperature resistant from -35°C up to +220°C. Non-corrosive, anti-magnetic and cures practically without shrinkage. Suitable for pouring out moulds (e.g. vacuum and foam moulds), making fixing devices and tools, (e.g. injection dies) which are exposed to high temperatures.
81 29 21 22	WEICON F	0.5 kg 2.0 kg	Pasty, aluminium-filled, non-corrosive. Temperature resistant from -35°C up to +120°C. Filling blowholes and reconditioning of parts (e.g. injection moulded parts, holding devices).
81 29 33 34	WEICON F2	0.5 kg 2.0 kg	Flowable, aluminium-filled, non-corrosive. Temperature resistant from -35°C up to +120°C. Making of castings, moulds and templates, predotypes and fixing devices. Ideal for pouring out swages to test their exactness or for pouring out fixing devices in ultrasonic welding machines.
81 29 51	WEICON HB 300	1.0 kg	Pasty, steel-filled, high-temperature-resistant briefly up to +280°C. For applications on vertical surfaces for the repair and bonding of cast and metal parts, for filling in blow holes, for repairing damage on containers, carriages and machine parts and for sealing pumps and pipes.

(to be continued)

Unit Per Set

CODE	Product	Content	Description
81 29 37 38	WEICON Ceramic BL	0.5 kg 2.0 kg	Flowable, brushable, mineral (carborundum and zircon)- filled , extremely wear resistant. Temperature resistant from -35°C (-31°F) up to +180°C (+356°F). Brushable surface prediction with extremely high wear and abrasion resistance. As a preventive coating or applied after repair, it reduces abrasion on castings, valves, blower vans and in many other applications.
81 29 41 42	WEICON Ceramic W	0.5 kg 2.0 kg	Pasty, mineral-filled. Temperature resistant from -35°C (-31°F) up to +150°C (+302°F), briefly up to +260°C (+500°F). Brushable surface prediction with extremely high wear and abrasion resistance. As a preventive coating or applied after repair, it reduces abrasion on castings, valves, blower vans and in many other applications.
81 29 31 32	WEICON SF	0.5 kg 2.0 kg	Pasty, steel-filled, fast curing. Temperature resistant from -35°C (-31°F) up to +90°C (+194°F). For quick repairs and bondings (e.g. on leaky pipes, housings and gears) as well as for making anchorages and fixing devices. Certified by DNV.
81 29 43 44	WEICON ST	0.5 kg 2.0 kg	Viscous, can be applied with a spatula, metal-filled, anti-corrosive. For versatile repairs and maintenance works on stainless steel machine parts and components such as tanks, pipelines, containers, funnels and flanges.
81 29 45 46	WEICON TI	0.5 kg 2.0 kg	Pasty, titanium-filled. Temperature resistant from -35°C up to +150°C, briefly up to +260°C. Repair of pumps, valves, wearing plates, ball bearing seats, shafts, centrifugal pumps and propellers.
81 29 35 36	WEICON UW	0.5 kg 2.0 kg	Pasty, mineral-filled-resistant, cures even under water. Temperature resistant from -35°C up to +160°C. Particularly suitable for repair and maintenance work at marine and off-shore sector, wherever dampness and wetness lead to bonding problems.
81 29 57 58	WEICON WP	2.0 kg 10.0 kg	Pasty, high strength, ceramic-filled, extremely wear-resistant, viscoplastic and impact-resistant. Prevents metal loss and replaces previously applied wear-resistant alloys, ceramic tiles and rubber linings as well as welded metal coatings.
81 29 47 48	WEICON WR	0.5 kg 2.0 kg	Liquid, steel-filled, wear resistant. Temperature resistant from -35°C up to +120°. Repair of shafts, pouring out bearings, cutting and punching tools, making of castings, drawing moulds, underpouring machines and foundations.
81 29 49 50	WEICON WR2	0.5 kg 2.0 kg	Pasty, mineral-filled, wear-resistant, highly abrasion-resistant. For repairs on conveyors, guides and sliding ways where rolling or sliding movements cause wear. Also for lining pump housings and extruders and for the repair of worn-out flanges.

(to be continued)

Unit Per Set

CODE	Product	Content	Description
81 29 55 56	WEICON CBC	3.0 kg 10.0 kg	Flowable, vibration-resistant, shock-resistant. self-levelling, long pot life of 30 minutes, almost no shrinkage, permanent high static strength, high resistance to ageing, chemical-resistant. Certified by ABS.
81 29 85	Casting Resin MS 1000	1.0 kg	Liquid, unfilled, low viscosity. A transparent and very flowable epoxy resin system with high mechanical strength. For metal, wood, rigid foam and many plastics.
81 29 52 53 54	Epoxy Resin Putty	0.1 kg 0.4 kg 0.8 kg	Putty (kneadable), high-strength, versatile, temperature-resistant up to +200 °C. Used for fast repairs and maintenance works such as fixing screws, anchors and plugs, repairing leaky tanks and pipes, reconditioning castings, repairing shafts, bearings, pumps and housings, reconditioning defective threads.
81 29 59 60	Mould Release Agent Liquid F 1000	250 ml 1 ltr	Liquid, solvent-containing release agent on a waxy basis for epoxy resins and polyurethanes. It is especially suitable for release processes from smooth and non-absorbing surfaces.
81 29 64 79	Mould Release Agent Wax P500	150 g 0.5 kg	Putty, solvent-containing release agent on a waxy basis for epoxy resins and polyurethanes. It is especially suitable for release processes from smooth and/or porous surfaces.

Name of Mfr. : Weicon GmbH & Co. KG

Liquid Polyurethane

Poliuretano líquido　リキッドポリウレタン　液体聚氨酯

Flexible casting and coating resin with high impact strength and abrasion resistance.

Unit Per Pc.

CODE	Name	Description	Content
81 29 61	Weicon Urethane 45 (Shore hardness 45)	2-component polyurethanes that cure at room temperature to a rubber-like material, remaining flexible at temperatures down to even -60°C. Adhere to a variety of materials such as metals, concrete, rubber, wood, or fibre glass.	0.5 kg
62	Weicon Urethane 60 (Shore Hardness 60)		0.5 kg
63	Weicon Urethane 80 (Shore Hardness 80)		0.5 kg
81 29 82	Primer M 100	For pre-treating non-absorbent metal surfaces (aluminium, steel, stainless steel, brass, copper, zinc, tinplate), plastics (ABS, rigid PVC, PA 6.6, FRP, SMC, PUR), lacquered surfaces, enamel, ceramics, and glass.	250 ml
81 29 83	Primer S 300	For pretreating of porous and absorbing surfaces.	250 ml

(to be continued)

Unit Per Pc.

CODE	Name	Description	Content
81 29 84	Colour Paste – black -	Special colour paste on the basis of finely dispersed pigments for colouring WEICON Urethanes and WEICON Casting Resin MS 1000.	250 g
81 29 86	Easy-Mix PU-90	Structural Adhesive is a high-strength, extremely fast-curing, highly viscous adhesive, which can be sanded and painted over after approx. 30 minutes. It is weather-resistant, resistant to chemicals and temperature-resistant from -55°C to +125°C.	50 ml
81 29 87	Easy-Mix PU-240	Structural Adhesive is a high-strength, extremely fast-curing, highly viscous adhesive, which can be sanded and painted over after approx. 30 minutes. It is weather-resistant, resistant to chemicals and temperature-resistant from -55°C to +125°C.	50 ml

Name of Mfr.: Weicon GmbH & Co. KG

Accessories

Unit Per Set

81 29 88	Processing Kit	Includes: Processing spatula, short Wire mesh 138 x 210 mm, Butyl tape, Paint brush, Box cutter.

Name of Mfr. : Weicon GmbH & Co. KG

Repair Sticks

Barras de reparación
スティック型補修剤　棒形修补剂

The easy solution for all repair and maintenance works. Temperature resistant from -50°C (-58°F) up to +120°C (+248°F), briefly up to +150°C (+302°F).

Unit Per Pc.

CODE	Product	Content	Description
81 29 65 66	Repair Stick Aluminium	57 grm 115 grm	Putty (kneadable), aluminium-filled. For quick non-rusting repairs and bonds of metal parts. Patches and seals cracks, holes, leakages and surface damages.
81 29 23 24	Repair Stick Aqua	57 grm 115 grm	Putty (kneadable), ceramic-filled. Ideal for quick repairs on damp and wet surfaces and for underwater applications.
81 29 67 68	Repair Stick Concrete	57 grm 115 grm	Putty (kneadable), ceramic-filled. Especially for quick repairs and reconditioning of all concrete, stone and ceramic surfaces.
81 29 69 70	Repair Stick Stainless-Steel NSF	57 grm 115 grm	Putty (kneadable), stainless steel-filled. For non-corroding repairs and reconditioning of stainless steel and other rust-proof metals.
81 29 71 72	Repair Stick Wood	28 grm 56 grm	Putty (kneadable), mineral-filled. For permanent and elastic, non-shrink repairs of wooden parts.
81 29 73 74	Repair Stick Plastic NSF	57 grm 115 grm	Putty (kneadable), plastic-filled. Especially for durable repairs of plastic parts (except for plastics such as PE, PP, PTFE, etc.).
81 29 75 76	Repair Plastic Copper NSF	57 grm 115 grm	Putty (kneadable), copper-filled. For very quick repairs of cracks, holes and leakages even on damp and wet surfaces.
81 29 25 26	Repair Stick Steel NSF	57 grm 115 grm	Putty (kneadable), steel-filled. Preferably used for quick and high strength repairs and bonds of metal parts.
81 29 77 78	Repair Stick Titanium	57 grm 115 grm	Putty (kneadable), titanium-filled. Temperature resistant from -50°C (-58°F) up to +280°C (+536°F), briefly up to +300°C (+572°F). For permanent, high temperature and wear resistant repairs and bonds of metal parts.

Graphite Flakes

Grafito en Escamas　グラファイトフレーク　石墨片

A standard lubricating graphite, particularly useful for engines, compressors, etc. Graphited surfaces improve lubrication and help oil and grease to last longer. These graphite flakes are also used as paint pigment for heat resistant and protective coats. Furnished in tins of 1, 2.5 and 5 kg.

81 24 06	Graphite flake, 1.0 kg	Tin
07	" " 2.5 "	"
08	" " 5.0 "	"

Graphite Paste

Pasta de Grafito　グラファイトペースト　石墨膏

An outstanding product for high temperature application such as on cylinder head studs, face plate studs, boiler and manhead gaskets, gas burner connections, studded and threaded connections, etc. Will keep joints leakproof against oil, acids and gases which might penetrate ordinary oil mixed compounds.

81 24 11	Graphite paste, 0.5 kg	Tin
12	" " 2.0 "	"
13	" " 5.0 "	"

Pipe Joint Compounds

Compuestos para Sellado de Uniones Roscadas
パイプジョイントコンパウンド　管子螺纹密封膏

For sealing threaded joints in iron, stainless steel, brass, copper and plastic pipes used for gas, water, steam, compressed air, etc. Withstands most corrosive liquids and gases. This filler also acts as a lubricant. Furnished in a 2.5 kg tin only.

81 24 20	Compound, pipe joint, 2.5 kg	Tin

Rock Wool
(Mineral Glass Fiber)

Lana Mineral　岩綿　石棉

For building insulation, ovens, ducts, etc. of temperatures up to 600°C (1,112°F). Furnished 25 kg per bag.

Unit Per Bag

Sheet		Granulated	
CODE	Size mm	CODE	Weight
81 24 32	25 × 605 × 1,820	81 24 34	25 kg
33	50 × 605 × 1,820		

Fire Clay Powder

Polvo de arcilla Refractaria
ファイヤークレーパウダー　耐火土粉面

Dry milled powder for boiler brick work, anti-fire walls, etc. Will withstand up to 1,200°C. 30 kg in a sack.

81 24 35	Fire clay powder, 30 kg	Bag

Refractory Products

Productos Refractarios　AGC プライブリコ製品　耐火材料产品

Plastic refractories are firebricks in plastic putty-like form which can be installed by ramming the plastics with a wooden hammer or air rammer into any shapes required. After installation, it is baked with operation temperature of the furnace itself (over 1,000°C) to form the tough walls.

Castables are refractory cements which are mixed with the proper amount of water for installation. May be poured into frames or trowelled as is the case with ordinary cement. After installation by whichever method, it hardens to a sufficient strength.

From among various types of products, the most common products are listed below.

THERVEK RM (Ramming) – Plastic refractories
Clay bonded ramming refractory with superior resistance to thermal spalling (Ramming). Plastic refractories does not require mixing, and can be rammed as they are. Clay bonded plastic refractories offer superior resistance to thermal palling.

THERVEK C (Casting / Trowelling) - Cement castables
Easy installation and excellent general-purpose characteristics. Enables easy application of refractory lining walls with superior refractoriness. Has low thermal conductivity in comparison with shaped refractories, and can contribute to energy saving. Also offers greater resistance to thermal spalling than shaped refractories. Offers an extensive lineup of products with maximum service temperatures ranging between,1,350°C and 1,800°C, and can be used for all manner of equipment.

THERVEK PAT (Patching) - Plastic refractories
Patching repair material with superior adhesive properties. These refractories are affixed firmly to the repair area by the strong adhesive power of phosphate. After heating, patching refractories display extremely strong adhesive strength in their adhesion to the base material. Patching in this way enables you to prolong the service life of your refractories by performing easy repairs.

THERVEK PX-BD - Other monolithic refractories
High-strength joint packing and bond. A paste-type product consisting of refractory aggregate and water glass binder. Can be used to fill joints by inserting a tube into the open space between brick joints and filling them directly with the product. When performing patching repairs, a thin underlay coating of PX-BD can be applied to the surface of the base material using a trowel or similar tool. Doing so increases the adhesive strength of the bond between the base material and the patching material, increasing the effectiveness of the repair. When PX-BD is heated to temperatures in excess of 500°C, chemical bonding occurs, increasing the strength of the refractory (i.e. heat setting).

Anticorrosive Tapes

Cintas Anti-corrosivas　防蝕テープ　防腐蚀带

Uses:
For protection against corrosion and the waterproofing of pipes, flanges and valves for marine use.

Compound:
A neutral compound based on saturated petroleum hydro carbons (petrolatum) with inert fillers.

Fabric:
Fabric carrier free from chemical impurities, fully impregnated and coated on both sides.

Characteristics:
Unalterable in composition and plasticity over a wide range of temperatures. Slight superficial oxidation occurs in atmospheric application and renders the surface less tacky. Has a very high degree of impermeability to water. Won't crack or harden. Unaffected by vibration and highly resistant to mineral acids, alkalis and salt. Basically no VOC's (Volatile Organic Compounds) contains so it is friendly to the environment.

Specifications	
Thickness	1.2 mm
Weight	1.4 kg/m²
Elongation	20%
Temperature	For applicable 5°C to 55°C

Unit Per Rls.

Anti-corrosive Tapes

SeaSeal™ Sealants

Cinta anticorrosión sin VOC
VOC 对策防蝕テープ　VOC 对策防腐蚀胶带

SeaSeal™ products utilize the latest viscous-elastic technology to gain superior performance in anti-corrosion or water proofing situations such as pipe, pipe joint and flange corrosion protection as well as hatch sealing, and conduit box packing. Since it has no VOC's (Volatile Organic Compounds) it is friendlier to the environment.

Properties
Impermeable to moisture and gases
Immediate adhesion to substrates
Never will crack or become brittle
Non-carcinogenic, no VOCs
Non-toxic, nonflammable
Inert material, no deterioration
NO primer needed

SeaSeal™ Tape

It is available as a quick wrap or paintable product. In the quick wrap from it has a removable backing and a clear overlay on the topside for sealing, pipe spans, coating transitions, elbows & tees or pipe coating rehabilitation in salty and humid environments.

The paintable version has all the qualities of the quick wrap and it has a white polymer topcoat that can be painted after application.

Unit Per Rls.

Flat Patch Leak Sealant Kits

STOP IT® Flat Patch

Kits de sellado de fugas Flat Patch
修理用水発泡テープキット　平面补漏密封胶套件

A leak sealant product designed for applications where localized repair is needed or full pipe wraps are impractical. The carbon fiber composite repair system safely and quickly restores operations up to 1,000 psi, and provides localized corrosion inhibition.

Applications can be made regardless of surface orientation (i.e., vertical or horizontal) and will result in a durable repair that will not shatter or crack, even under extreme operating conditions. Operations may resume in as little as 4 hours following application and cure under ambient conditions. Supplied in a kit with all the necessary components for field installation*.

* Installation requires no special training and involves minimal surface preparation.

Applications:
Tanks • Vessels • Large Diameter Pipes • Valve and Pump Casings • Welded Seams Rail Cars • Roofs • Drums • and More.

Shelf Life:
6 months from date of purchase when stored at 40° to 83°F (5° to 28°C).

Unit Per Set

CODE	Kit Size	CODE	Kit Size

Dispensing Guns for Leak Repair Kit STOPIT® HP/Flat Patch

Dispensing gun is not included in leak repair kit and available separately on request.

81 24 76	Dispensing Gun, 200 ml for STOPIT HP/ Flat Patch	Pc.

Rapid Self Fusing Repair Tapes

for Leakage, Heat Resistance

Cintas de reparación autofusibles rápidas para fugas, resistentes al calor
漏水、耐熱用速融着補修テープ
用于防漏、耐热的快速自熔修补胶带

Specially formulated silicone rubber tapes, bond irreversibly to itself providing an insulative barrier resistant to moisture, sea water, steam water over wide temperature range from -50 to 200°C. By strongly tensing while taping, the tape will be self-bonding to each other and tightly adhere to the leaking part on pipes or hoses, even for spouting water.

Meets MIL-I-46852C and can be applied to drinking water pipes.

Specification and Characteristic

Material	Silicon Rubber
Heat Resistance	-50°C to 200°C
Tensile Strength	8.0 Mpa
Expansion (%)	600%
Pressure Resistance (kgf/cm²)	Approx. 10 kgf/cm² (Overlap depends on required pressure)

CODE	Width × Length	Unit
81 24 78	25 mm × 2 mtr	Rls.
79	25 mm × 5 mtr	
80	25 mm × 11 mtr

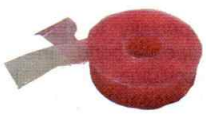
Anti-Corrosive Silicone Adhesive Sheets - Catpad

Láminas adhesivas de silicona anticorrosiva
防錆・防蝕シリコーン粘着シート　防腐蚀硅胶粘合片

An anti-corrosive silicone adhesive sheet suitable for any repair works for long-lasting rust prevention. Very easy application, simply cut and patch the sheet on the surface of any materials without primer and it will last rust prevention for 10-20 years. Suitable for rust repairing or reinforcing the corrosion resistance on the finished surface. Available in gray or transparent color, sheet or roll type.

- Excellent durability and weather resistance.
- Excellent airtightness and waterproofing performance.
- Excellent heat/cold resistance, and flame resistance.
- Excellent insulation up to 33.6 kV.
- Excellent anti-vibration.



Specification and Characteristic

Material	Silicone Rubber
Thickness	1.8 mm
Operating temperature range	-40°C to 180°C
Tensile Strength	10 MPa
Elongation at break (%)	800%

Cat-Tape Clear

Cat-Tape Transparente　キャットテープ　透明 Cat-Tape

Putty-like adhesive tape to patch any corrosion area. It can also be used to finish the edges or jointing sections of Catpad to increase the durability of waterproofing and rust prevention. It cures and bonds in 24 hours after application and bonds strongly to both Catpad sheets and any surfaces.

Specification and Characteristic

Material	Silicone Rubber
Colour	Pink (Separator film) Transparent (Tape body)
Tensile Strength	5.4 MPa
Elongation at break (%)	730%
Tear strength Angle type	16 kN/m
Adhesive (between mortar)	22 N/cm
Adhesive (Catpad)	47 N/cm

81 25 00	Cat Tape Clear, 25 mm × 3,000 mm, 10's/pkt	Pkt.

Tapes for Prevention of Leakage and Corrosion, and for Insulation

漏洩防止用、防食用及び電気絶縁用テープ　防漏，防腐绝缘带

Leak None Tape #117

Excellent workability and fitting many kinds of piping or winding materials. High close-adhesiveness and self-adhesiveness.

- **Good Workability**
  Since Leak None Tape is self-adhesiveness type, it has good workability without sticking to the hands or any goods surrounding the working space. The tape, slightly tensed while taping, will adhere within 20 to 30 minutes by overlapping about every half width of tape to the material. It is not necessary to fasten by any hose band over the wrapped tape.

- **Applicable of Underwater Taping**
  Able to stop the liquid leaking (about 2 to 3 kgf/cm²) and also able to tape even in water. In this case the tape must be winded, pressing over by hand, to the material to avoid the water and trash permeating between the layer of tapes.

- **Applicable to Various Materials/Uses**
  This tape is applicable not only for protecting the leakage but also preventing the damage by salt and for electric insulation. This tape can be applied to various kinds of material, such as metal, gum, plastic resin including PVC, piping stick materials or line materials, etc.

Specification and Characteristic

Thickness and Colour	0.5 mm, Black
Expansion (%)	450
Peel Adhesion (N)	30 (20mm width)
Pressure Resistance (kgf/cm²)	1 – 5 (4 ply) 5 – 10 (7 ply)
Weatherability	No extraordinary in 200h. by Weathermeter
Water Resistance	No extraordinary in no leak, no swelling
Ozone Resistance	No cracks, no peeling No extraordinary
Tracking Resistance OA	Liquid of Stain

High-Adhesive Butyl Sealing Tapes

Cintas de sellado de butil de alta adhesividad
強接着ブチルシーリングテープ　强粘力丁基密封胶带

A self-adhesive sealing tape made of a butyl rubber compound, protected by a reinforced aluminium film, making it highly resistant to ageing and oxidizing caused by atmospheric and chemical agents. Highly adhesive to all materials and especially to plastic, glass, steel, polycarbonate and wood. Especially used to repair small leaks and water infiltrations, for example around windows.

Characteristics:
Cold applied/Waterproof and self-sealing/Resistant to ageing and UV-rays/Excellent adhesion at low temperatures.

Compound color: Grey
Application temperature: 0°C/+40°C
Service temperature: -30°C/+90°C. up to 160°C for max. 24h.

Unit Per Rls.

Gore Joint Sealants

Sellador de juntas Gore　ゴアジョイントシーラント　戈尔接缝密封胶

Pillar No.3300

A rope-shaped gasket made of stretched 100% PTFE with double-sided tape attached to one side. Its shape and the marshmallow-like structure make this sealant a great choice for use with flanged that have large surface areas, complex shapes, or rough surfaces.

Features & Performance:
- Inert to almost all chemicals.
- Reliable sealing performance (max 3.3 MPaG).
- Thermally resistant.

Applications
Extremely flexible and compressible, and can not only be used as a gasket but for numerous other purposes.

Unit Per Rls.

CODE	Nominal Size	Size W × Th × Length

PTFE Joint Sealant Tapes

CORDSEAL™ <Soft>

Cintas selladoras de juntas de PTFE
PTFE ジョイントシーラントテープ
聚四氟乙烯（PTFE）接缝密封胶带

A marshmallow-shaped free-size sealing material, which has been modified to be flexible and very tough, while maintaining the PTFE's excellent chemical resistance and heat resistance properties. These are for the temporary repairs.

Features:
- Excellent chemical resistance.
- Heat resistance.
- Good workability.

Temperature	Pressure (MPa)
-240 to 260°C/-400 to 500°F	Max 2.0 (gas), Max 5.0 (liquid)

Suitable fluids: General fluids (water, steam, oil, etc.), solvents, corrosive liquids.

Applications: Large diameter equipment (rough finished flange, strained flange, insufficient tightening force), tanks, heat exchangers, pressure vessels, duct flanges, pipe flanges, gland packing for valves.

Oval type

VALQUA® No. 7GS66A
String shaped product with an oval cross-section [string type] and adhesive to improve workability.

Silicone Sealants

Sellador de Silicona　シリコンシーラント　玻璃胶

When extruded, reacts with humidity in the air, curing inwards from the surface and becoming silicone rubber. Has outstanding adhesion to glass, ceramic, aluminium, and many plastics. Resists sunlight, weathering, water, and most chemicals. An excellent insulator, its dielectric strength is unaffected by electrical cycling or stress. Uses include potting electronic components, insulating electrical boxes, fabricating and repairing gaskets, and making expansion and contraction seals in bridges and tunnels. It is also used for general maintenance, caulking and sealing, and for production bonding. Available in 100 grm and 350 grm weight tubes.

81 26 03	Gun for silicone sealant, 350 grm		Pc.

Sealing Agents

Permatex Form-a-Gasket

Agentes Selladores　液状パッキン　密封剂

Available in many types of gaskets, but the 3 most common types are described below:

1. Form-a-Gasket No. 1
   Hard-setting sealant. A fast-drying, hard-setting, heavy bodied sealant ideal for repairing gaskets, etc.
2. Form-a-Gasket No. 2
   Pliable-setting sealant. A non-hardening, heavy bodied pliable sealant for semi permanent assemblies.
3. Aviation Form-a-Gasket No. 3
   A non-hardening, liquid, brushable sealant.

Unit Per Tub or Can.

CODE	No.	Size	Container
81 26 11	1	11 oz	Tube
81 26 12	2	11 oz	Tube
14	2	1.5 oz	Tube
81 26 13	3	16 oz	Brush-top Can

Sealing Agents

ThreeBond 1100 Series

Agentes selladores
液状パッキン　密封剂

These are series of liquid gaskets that have been developed based on a new concept and leak prevention theory that differs drastically from the ones from which conventional solid sheet gaskets have been developed. It is incorporated by being applied to the seal surfaces of the machine to prevent leaks.

CODE	No.	Feature	Size	Unit
81 26 21	1101	Non-solvent and harmless	200 grm	Tub
22			1 kg	Can
81 26 23	1102	All round use, non-drying, easy application	200 grm	Tub
24			1 kg	Can
81 26 25	1103B	For small precision parts	150 grm	Tub
26			1 kg	Can
81 26 27	1184	All round use, for large clearance application	200 grm	Tub

81 26 32	1107D	For high temperature application	1 kg	Can

High Temperature Resistance Inorganic Adhesives

ThreeBond No.3732

Adhesivo Inorgánico Resistente para Alta Temperatura
耐熱性無機接着剤　耐热无机粘接剂

Made of alumina, and high temperature resistance inorganic adhesive for temperature up to 1,400°C. Suitable for use as adhesives for ceramic, glass and other metals. Also used as the putty for electrical parts where possibly exposed to extreme high temperature.

Unit Per Pkt.

CODE	Width x Length	CODE	Width x Length
81 26 35	200 grm/pkt	**81 26 36**	1 kg/pkt

Pipe-Seals

Sellador Tuberias　パイプシール　管封

Compounded with teflon to lubricate joint assemblies. Resistant to chemicals and can be used on pipes larger than 3/4" diam. to seal kerosenes, LP gas, oils, water, weak caustics, mild acids and low pressure steam. Performs to 500°F at moderately high pressure, will not run, drip or separate. Service temperature up to 500°F.

Unit Per Btl.

CODE	Type	Contents
81 26 51	PSBT- 8	8 oz/btl with brush top
52	PSBT-16	16 oz/btl with brush top

Name of Mfr. : SAF-T-LOK Corporation

Ferryl Pipe Sealants

Sellador de tuberías Ferryl
フェリルパイプシーラント　Ferryl 管道密封剂

A multi-purpose pipe sealant designed for marine use.

Unit Per Tub.

CODE	Product No./ Unit	Application
45 04 19	Ferryl Armacit Pipe Sealant 150 grm/tube	Paste-like packing that dries hard for permanent sealing of threaded pipes and flanges. Resistant to oil, petrol, most gases. Temperature and pressure-resistant.

Name of Mfr.: Ferryl Sales Limited.

Liquid-Rubber Kits

Estuches (Juego) Goma Líquida
リキッドラバーキット　液体—橡胶工具包

Formulated for on-the-spot rubber part repair. Available in liquid or paste. Dries in 2 hours at room temperature. Provides excellent flexibility, wear and abrasion resistance.

Unit Per Pkt.

CODE	Type	Contents
81 26 61	LR-5 Liquid	5 oz/pkt
62	LR-5 Paste	5 oz/pkt

Name of Mfr. : SAF-T-LOK Corporation

Polyurethane Foam Spray

Espuma de poliuretano en spray
発泡ウレタンスプレー　聚氨酯泡沫喷雾

A spray also known as Pu-Foam or construction foam. Polyurethane foam reacts rapidly with moisture in the air and expands after application, high curing and bonds extremely well to the surface due to its high adhesion power. Mainly used for assembly of doors and windows, sound and heat insulations, infilling applications, waterproof barriers etc.

81 26 63	Polyurethane Foam Spray, 400 ml	Can

Silicone Gaskets

"Formador de Junta" Silicona para Juntas
液状シリコンガスケット　橡胶垫圈

Paste type sealing gaskets to apply to any shape of flanges, casing or cover. Due to oil resistance and anti-freeze performance, it can be applied to Oil pump, Water pump, Valve cover, Crankshaft end, Transmission case, etc. Will be tack-free within 15 minutes.

Unit Per Tub.

CODE	Contents	CODE	Contents
81 26 71	70 cc	**81 26 72**	300 cc

Gasket Paste

Pasta para juntas　ガスケットペースト　垫圈膏

Gasket Paste is an agent employed to enhance the sealing effect of gasket contact surfaces and to facilitate peeling off gaskets when disassembling joints. Please select the optimum type from the variety of products listed below.

Unit Per Can/Tube

CODE	Product Name	Applicable Temper-ature	Description
81 26 91	No. 5 2.5 kg/can	-200 to 200°C (-328 to 392°F)	Black paste containing special oil-soluble adhesive compounded with fine graphite particles. Suitable fluids: Water-based fluids (steam, hot water, water, seawater, acid, alkali, salt solutions and alcohol).
81 26 92	No. 5M 2.5 kg/can	-200 to 200°C (-328 to 392°F)	White paste containing special oil-soluble adhesive compounded with fine mica particles. Suitable fluids: Water-based fluids (hot water, water, seawater, acid, alkali and salt solutions), where white paste is specifically required.
81 26 93	No. 6 2.5 kg/can	-200 to 900°C (-328 to 1,652°F)	Black paste containing special water-soluble adhesive, with high oil and solvent resistance, compounded with fine graphite particles. Suitable fluids: Hydrocarbon-based fluids (petroleum-based oil, oil gas, solvents, solvent vapor, animal & vegetable oil, LNG and general gases).
81 26 94	No. 6M 2.5 kg/can	-200 to 900°C (-328 to 1,652°F)	White paste containing special water-soluble adhesive, with high oil and solvent resistance, compounded with fine mica particles. Suitable fluids : Hydrocarbon-based fluids (petroleum-based oil, oil gas, solvents, solvent vapor, animal & vegetable oil, LNG and general gases) where white paste is specifically required.
81 26 95	Sealpaste™ 800 grm/can with brush	-50 to 300°C (-58 to 572°F)	Light brown paste containing a special non-drying oil adhesive, compounded with inorganic filler material and a small amount of solvent. Suitable fluids: When handling water, air and hydrocarbons (gasoline, kerosene, lubricating oil, natural gas, LPG, refrigerants, hydrogen sulfide, ethylene, butane, and thane), and also when it is necessary to prevent crevice corrosion on the flange surface.
81 26 96 **97**	New Valflon™ Paste 100 grm/ Tube 1 kg/can	-200 to 300°C (-328 to 572°F)	Fluororesin powder that is water-dispersed using surfactant agents. Suitable fluids: When handling highly corrosive fluids (strong acids, alkalis, or halogens and when handling oxygen) when noncombustible materials are required.

Wood Glues

Cola para Madera　木工用ボンド　木工用胶水

Has superior adhesion and is designed exclusively for use in general wood working. Available in many sizes, but the 1 kg tin is coded as below :

81 27 11	Glue for wood, 1 kg	Tin

Quick Bonding Adhesives

Adhesivos Instantáneos　瞬間接着剤　迅速粘合剂

A unique adhesive which forms a strong bond instantly with almost all materials such as rubber, plastic, and metal to metal. Does not require solvents or any other special treatment. Mainly composed of alpha cyanoacrylate monomer. Harmful to the skin.

Unit Per Tub.

Hot Melt Glue Guns

Pistolas de cola caliente　ホットメルトガン　热熔胶枪

A handy adhesive device that melts and bonds materials by applying heat (80 - 100°C). Commonly supplied with solid cylindrical sticks of various diameters, made of ethylene vinyl acetate (EVA), and heated nozzle will melt them for use. It is widely used for the materials such as Acrylic, ABS resin, metal, tile, wood, leather, natural rubber, paper, cloth, etc. When using, make sure to ventilate the working area.

81 27 31	Hot melt glue gun for 10mm stick, 110V	Pc.

33	Stick cartridge for hot melt glue gun, 10 mm	"

Glue Araldite

Pegamento - Aradite　アラルダイト　胶水

Epoxy type, strong adhesive, liquid glue for use with almost all materials such as metal, ceramic, glass, stone, wood, paper, leather, rubber, plastic and styro-foam, etc. This is an epoxy resin. When cured, it becomes a firm, clear, transparent gel. 10 minutes quick hardening type and 12 hours hardening standard type are available. This glue is supplied with the hardener.

Unit Per Set.

CODE	Description
81 27 41	Glue Araldite, quick, 30 cc w/hardener
42	Glue Araldite, quick, 180 cc w/hardener
43	Glue Araldite, standard, 30 cc w/hardener
44	Glue Araldite, standard, 180 cc w/hardener

Loctite® Engineering Adhesives

Adhesivos industriales Loctite　ロックタイト接着剤　乐泰胶水

Loctite® technology strengthens the assembly of two or more parts by filling all the space between mating surfaces with a single-component liquid which chemically self-hardens at room temperature into a tough heat-and-solvent-resistant structural solid. From among the various types of products, the most common products are listed below.

Unit Per Btl.

CODE	Type No.	Size	Characteristics
Threadlocker（ねじゆるめ止め用嫌気性接着剤）			
81 27 51	222	50 ml	**Low Strength/Small Screw** Ideal for fastener diameters of 1/4"(6 mm) and smaller. Controlled lubricity for accurate clamp loads. Parts can be separated using hand tools.
81		250 ml	
81 27 52	242	50 ml	**Medium Strength** A general-purpose, removable threadlocker for fasteners between 1/4" and 3/4"(M6 to M20) diameters. Controlled lubricity for accurate clamp loads. Parts can be separated using hand tools.
81 28 44	243 (Thread locker, Blue)	50 ml	**Medium Strength/Primerless** A general-purpose, medium strength threadlocker with improved temperature resistance and oil tolerance. Does not require most fasteners to be pre-cleaned or primed before use. Suitable for fasteners up to 1 1/2" (M36).
45		250 ml	

(to be continued)

Unit Per Btl.

CODE	Type No.	Size	Characteristics
81 28 11	248 (Thread locker, Blue)	19 ml	**Semi-Solid - Medium Strength** General-purpose threadlocker for all nut and bolt applications, especially fasteners up to 2" (M50). Removal with handtools. The semisolid formula also means it won't spill or leak.
81 28 46 47	263 (Thread locker, Red)	50 ml 250 ml	**High Strength/Primerless** A general-purpose, high strength threadlocker with improved temperature resistance and oil tolerance. Does not require most fasteners to be pre-cleaned or primed before use. Locks fasteners up to 3/4" (M20).
81 28 12	268	19 ml	**Semi-Solid - High Strength** Semi-solid stick is high strength prevents loosening of threaded fasteners. Well suited for fasteners up to 3/4" (M20) and is removable with heat and hand tools. Red colour is available.
81 27 46 64	270 (Thread locker, Green)	50 ml 250 ml	**High Strength/Primerless** A general-purpose, high strength threadlocker with improved temperature resistance. Does not require most fasteners to be pre-cleaned or primed before use. Locks fasteners up to 3/4" (M20).
81 27 56 86	290	50 ml 250 ml	**Wicking Grade** A medium to high-strength threadlocker for pre-assembled bolts up to 1/2"(M12). Penetrates threads by capillary action. Secures set screws and other assemblies after settings are completed. Seals welds and porous metal parts. Protects threads from rust and corrosion. Localized heating and hand tools are needed for disassembly.
Thread Sealant （金属配管用シール剤）			
81 28 48 49	55	50 ml 150 ml	**Thread sealing cord for metal and plastic pipes** Non curing, immediate, full pressure seal for a quick, easy and reliable seal. For pipes up to 4 in. and temperatures up to 150°C.
81 27 48	542	50 ml	**Fine Threads** A liquid sealant recommended for sealing the fine threads of hydraulic and pneumatic connectors.
81 28 21 22	545	50 ml 250 ml	**Hydraulic/ Pneumatic Fittings** Contains no fillers of particles that could contaminate system fluids, foul valves, or clog fine filters and screens. Suitable for fittings up to 2" (M50) in diameter. Excellent solvent resistance.
81 28 23 24 25	567	50 ml 250 ml 350 ml	**PST Thread Sealants High Temperature** Excellent solvent resistance, allows easy assembly, prevents galling, and can withstand temperatures up to 400°F (200°C). Excellent for high pressure applications, it locks and seals tapered metal, pipe threads and fittings. Ideal for stainless steel, aluminium, galvanized metal, and other inert metals. Disassembles with hand tools.
81 27 62 94	572	50 ml 250 ml	**Low Strength** Low strength sealant with moderate fixture speed for use on coarse threads.
81 27 49 95	577	50 ml 250 ml	**Coarse Threads** Medium strength, general-purpose sealant for use on coarse, threaded components.
Flange Sealant （フランジシール剤）			
81 27 61	504	250 ml	**Gasket Eliminator Gap Filing Flange Sealant** A single-component, instant, low-pressure seal that fills gaps to 0.762mm (0.030").
81 27 90 91	515	50 ml 300 ml	**Gasket Eliminator Flange Sealant** Makers flexible gaskets for rigid machined flanges with less than .1.27mm (0.050" gap). Flexes with flanges that move in service.
81 28 13 14 19	518	25 ml 50 ml 300 ml	Semi-flexible gasketing product for machined metal flanges. Ideal for use on rigid iron, steel and aluminium flanges.
81 28 35 81 27 47	574	50 ml 250 ml	**Rigid Assembly Gasketing Products** Anaerobic, fast curing (unprimed 1-12hrs, primed 15min. to 2hrs), thixotropic, can fill gap until 0.254mm (0.01") without prime and 0.508mm (0.02") with prime. Suitable for gasket sealing within temperature range –54°C to 150°C (–65°F to 300°F). The products cures when confined in the absence of air between close fitting metal surfaces. Orange colour is available.
81 28 20 34	5188	50 ml 300 ml	Gasketing product for sealing rigid flanges, especially aluminium flanges; excellent chemical resistance; superior adhesion, can tolerate slight oil contamination on the flange surface.
81 28 37 38 39	587	70 ml 190 ml 300 ml	**Blue, High Performance RTV Silicone Gasket Maker** Forms tough, flexible gaskets directly on the flange. Offers excellent adhesion to oily surfaces. Low odor, non-corrosive, low volatility. Withstands temperatures to 260°C (500°F) intermittent. Resistant to most chemicals and solvents. Fill gaps to 6.35mm (0.25"). Typical applications include valve covers, rocker covers, oil pans, water pumps, end seals, intake manifolds, and rear axle housings. Excellent adhesive for bonding and repairing fabricated silicone gaskets.
81 28 41 42 43	598	70 ml 190 ml 300 ml	**Black, High Performance RTV Silicone Gasket Maker** Retains high flexibility and oil resistance for longer gasket life. Temperature range is –59°C to 329°C (–75°F to 625°F) intermittent. Low odor, non-corrosive, low volatility. Resistant to most chemicals and solvents. Fill gaps to 6.35mm (0.25"). Typical applications include oil pans, transmission pans, valve covers, valves and guides, timing gear covers, and differential covers.

(to be continued)

(to be continued)

Unit Per Btl.

CODE	Type No.	Size	Characteristics
81 27 92 93	5699	95 grm 300 ml	**Grey High Performance RTV Silicone Gasket Maker** For flexible flange assemblies. Excellent fluid resistance. Easy to dispense, non-corrosive. Low odor, low volatility.
Retaining Compound （はめ合い用嫌気性接着剤）			
81 27 96 97	603	50 ml 250 ml	**Press Fit/Oil Tolerant** A retaining compound tolerant of oil and other contamination. Seals and secures cylindrical assemblies up to 0.127 mm (0.005") radial clearance. Fixtures in 10 minutes. Prevents fretting and corrosion of metal assemblies. Good for close-fitting parts.
81 28 26 27	620	50 ml 250 ml	**Slip Fit/High Temperature** A high temperature (450°F), high viscosity liquid retaining compound. Provides shear strength of over 3,800 psi on steel. Locks and secures metal cylindrical assemblies up to 0.381 mm (0.015") diametral clearance. Prevents metal fretting and corrosion. Seals against leakage. Typical applications include locating pins in radiator assemblies, sleeves into pump housings and bearings in auto transmissions.
81 28 28 29	638	50 ml 250 ml	**Slip Fit/Maximum Strength** A maximum strength retaining compound for use where high dynamic force or cyclic loading is expected. Locks cylindrical assemblies up to 0.010 in. Diametral clearance. Fixtures in 5 minutes.
81 27 50 98	648	50 ml 250 ml	**High Strength/Rapid Cure** A retaining compound recommended for continuous working temperatures up to 149°C (300°F). Fills gaps up to 0.1524 mm (0.006") diameter clearance. Fixtures in 5 minutes. Good for close-fitting parts.
81 28 30	660	50 ml	**Quick Metal Retaining Compound** A creamy, non-running gel that is applied onto cylindrical parts to fill surface imperfections and repair worn areas. It contains no metal, but once assembled hardens to a strength that often doubles that of a press fit. Used for repairing worn coaxial parts without remachining; enables reuse of worn bearing seats, keys, splines, tapers or for retaining shims.
81 28 31 32	680	50 ml 250 ml	**Slip Fit/ High Strength** A high strength, high viscosity room-temperature- curing adhesive used to join fitted cylindrical parts. It fixtures in 10 minutes and provides a shear strength of 4,000 psi after 24 hours. Capable of filling diametral gaps up to 0.27mm (0.015"). Allows relaxed machining tolerances and replaces clamp rings, set screws, and snap rings.

(to be continued)

Toolboxes & Specialty Kits（スペシャルボックスキット）			
81 28 33	-	12.9 ml	**Form-A-Thread Stripped Thread Repair Kit** Permanently repairs stripped threads and fasteners in 5 minutes (up to SAE Grade 5 English and 8.8 metric). Allows up to 1.538 in. lbs. torque (on M25 bolt) and 300°F. Resists most shop fluids. Grey colour is available.

Loctite® Marine Maintenance & Emergency Repair Kits

Equipo de mantenimiento y de　緊急補修キット　应急修补套组

A "must have" solution kit for general maintenance and emergency repair for every vessel. The Marine Maintenance & Emergency Repair Kit provides solutions from simple vibration-proof bolt fastening to emergency pipe repair in open sea. Applications include thread locking, thread sealing, retaining, flange sealing & gasketing, emergency metal rebuilding & pipe repair, anti seize and bonding. The kit contains the following products.

Instant Adhesives

(Cyanoacrylates) Loctite®

Adhesivos instantáneos　瞬間接着剤　瞬间粘合剂

Loctite® instant adhesives cure very quickly when confined between surfaces, triggered by the humidity on the surfaces. Cyanoacrylates are chosen for bonding small parts to achieve extremely fast fixturing. They are clean and easy to apply and join a wide variety of dissimilar materials. From among the various types of products, the most common products are listed below.

Unit Per Btl.

CODE	Type No.	Size	Characteristics
81 27 87 88	401	20 grm 50 grm	**PRISM Surface Insensitive Instant Adhesive** A general-purpose surface insensitive adhesive for difficult-to-bond surfaces.
81 28 15 16	404	4 oz 1 lb	**Quick Set Instant Adhesive** For general maintenance and repair. Designed for bonding of plastics and elastomeric materials where very fast fixturing is required.
81 28 17 40	406	20 grm 50 grm	**Wicking Grade** Designed for bonding plastics and electrometric materials where very fast fixturing is required.
81 27 79 89	454	3 grm 20 grm	**PRISM Surface Insensitive Instant Adhesive Gel** Designed for the assembly of difficult-to-bond materials that require uniform stress distribution. Particularly suited for bonding porous or absorbent materials. Also formulated for faster cure speeds on dry or acidic surfaces and substrates.
81 28 18	480	20 grm	**Rubber-toughened Instant Adhesive** Low viscosity, elastomer-modified instant adhesive. Bonds metals and rubbers. Excellent peel, impact and shear strength. NSF/ANSI 61 certified for potable water.
81 27 58	495	20 grm	**Super Bonder Instant Adhesive** A general purpose adhesive designed to bond rubber, metal, and plastic parts with gaps to 0.1016mm (0.004").
81 27 59	496	20 grm	General Purpose Rubber Bonding.
81 28 00	3090	10 grm	Gap filling general purpose 2K instant adhesive; for gaps up to 5mm.
81 28 02	HY4060GY	25 grm	**Repair Structural Hybrid Adhesives** Excellent environmental and temperature resistance. Outstanding substrate versatility. Simple hand mix solution.

Cleaner and Activators

Loctite

Limpiador y activadores　洗浄活性剤　洗滌活性剤

Before bonding surface cleaners.

Unit Per Can

CODE	Contents	Description
Loctite® SF7063 Universal Cleaner & Degreaser Before Bonding		
81 27 36 37	400 ml 10 ltr	General Purpose Cleaner & Degreaser Solvent-based, removes most greases, oils and lubrication fluids from all surfaces, leaves no residues; ideal for use prior to bonding and sealing applications.
Loctite® SF7649 Activator		
81 27 38 39	150 ml 500 ml	Activator to speed up cure on passive and inactive surfaces; suitable for threadlocking, pipe and threadsealing, gasketing and retaining applications; solvent-based; on-part life of up to 30 days.

Adhesives SAF-T-LOK

Adhesivo - SAF-T-LOK　サフ・ティー・ロック接着剤　粘合剤

SAF-T-LOK anaerobic adhesive/sealants reliably lock, retain and seal metal assemblies in a wide range of applications. By eliminating the loosening of assembled components, costly breakdown is prevented and damage to equipment from vibration and shock is avoided. From among the various types of products, the most common products are listed below.

Unit Per Btl.

CODE	Type No.	Size cc	Characteristics
81 27 65	T22	50	Low strength, holds screws, but allows adjustment.
81 27 66	T42	50	Medium strength, locking & sealing screws & bolts.
81 27 67	T70	50	High strength, locking & sealing screws & studs to 1/2" diameter.
81 27 68	T77	50	High strength, locking & sealing studs over 1/2" diameter, sealing flanges.
81 27 69	S90	50	Medium strength, sealing porosity (Weld beads /Castings).
81 27 70	SA5	50	Bonds metal, plastic & wood.
81 27 71	IB45	20	Bonds in second, bonding rubber or plastic parts.
81 27 72	IBM100	20	Bonds in second, bonding metal parts. Excellent for nameplating.
81 27 73 74	PFS	50 250	Sealing metal flanges. Any size or shape gaskets.
81 27 75 76	TPS	50 250	Instantly seals tapered threads hydraulic pipe, etc.
81 27 77	R01	50	Retaining bearing / bushing, gears and pulleys, sealing porosity.
81 27 78	Primer	6 pz	Primer to accelerate, cure, or cure at temperature below 0°C.

WEICON Epoxy Adhesives

Adhesivos epóxicos WEICON　エポキシ系接着剤　环氧树脂粘合剂

WEICON Epoxy Adhesives are cold-curing, solvent-free two-component systems with extremely strong bonding properties. They enable material bonds with high tensile and impact strength and are thus ideal for assembly, repairs and production.

Unit Per Pc.

CODE	Product	Content	Description
81 29 80	Epoxy Minute-Adhesive	24 ml	Viscous, self-levelling, very short pot life, fast-curing, transparent. Produces residually elastic bonds with high impact strength on metal, plastic, fibre-reinforced materials, ceramics, glass, stone and wood.
81 29 81	Fast-Metal Minute-Adhesive	24 ml	Highly filled, pasty, very short pot life, fast-curing, gap-filling. Ideal for repairs and bondings with larger bonding gaps or bigger tolerances.

Name of Mfr.: WEICON GmbH & Co. KG

WEICON
RK-Construction-Adhesives

Methacrylate-based Adhesives

Adhesivos con base de metacrilato
メタクリレート系接着剤　甲基丙烯酸脂粘合剂

Used in many bonding applications in the marine industry – especially in environments where epoxy adhesive are not strong enough (for example due to high temperature, vibration, shocks and structural demands).

- Quick and high initial bonding strength (mechanical durability after 8 – 9 min.).
- Residual elasticity and impact resistance.

Typical Applications;

- Bonding name plates, controls, instruments, consoles for machines.
- Bonding galvanized profile sheets for cabins.
- Magnet bonding.
- Bonding metal and plastic laminates, sandwich elements for ship construction.

Unit Per Pc.

CODE	Product	Content	Description
81 29 91	RK-1300	60 g	Pasty, high-strength, fast-curing 2-component adhesive with high impact, peel and shear strength. For bonding large surfaces of many different materials such as metals, ferrites and rigid plastics.
81 29 92	RK-1500	60 g	2-component adhesive, liquid, high-strength, fast-curing. For bonding glass, metal and ceramics.
81 29 94	RK-7000	50 g	Slow-curing, high-strength, impact-resistant, residual elasticity. For bonding plastics, metals and ceramics with high tensile, shear and peel strength. It is particularly suitable for structural bondings where high strength connections are required.
81 29 95	Easy-Mix Hand Dispenser D 50	-	Very robust, break-proof, and made of fibreglass-reinforced plastic (polyamide). The dispenser is equipped with a metal transport lever. Suitable for all Easy-Mix types except PE-PP.
81 29 96	Quadro Mixing Nozzle	-	Suitable for RK-7000/-7100/-7200, Easy-Mix types S 50, N 50, N 5000, Epoxy Minute Adhesive, Easy-Mix PU-90/PU-240.

WEICONLOCK®

Anaerobic Adhesives and Sealants

Adhesivos y selladores anaerobios
嫌気性接着剤、及びシール材　厌气性粘合剂，及密封胶材料

The ideal solution for construction, production and maintenance: WEICONLOCK® products are high quality anaerobic adhesives and sealants on the basis of special methacrylate resins, especially made for economical threadlocking, retaining and sealing of threaded, cylindrical and pipe assemblies. The Pen-System packaging offers easy dosing and application.

Unit Per Pc.

WEICON Plast-o-Seal®

Silicone Free Universal Sealant

Sellador universal sin silicona
シリコンフリー万能シーラント　　无硅胶万能密封剂

Permanently plastic, non-dripping and silicone-free universal sealant (max. gap filling capacity up to 0.1 mm). For bigger gaps in combination with a mechanical seal.

Solvent-free.

Unit Per Pc.

CODE	Product	Content	Description
81 52 37	GMK 2410	350 g Brush top can	A solvent-based Polychloroprene (CR) contact adhesive. Used for strong and flexible full-surface bonding of rubber to rubber and rubber to metal. It also bonds cellular rubber (e. g. neoprene), leather, felt, insulating material, textiles, wood, and many plastics. After curing, the joint is resistant to humidity.
38		700 g	
81 52 39	GMK 2510	324 g	2-component adhesive based on polychloroprene for full-surface and permanently elastic bonding of parts which are continuously exposed to dynamic loads. It bonds rubber, metal, textiles, leather, sponge rubber (neoprene), CSM (Hypalon), insulating materials, PU materials with an adhesive coating, wood and many plastics, to themselves and among each other. After curing the bonding is moisture-proof.
40		690 g	

Name of Mfr.: WEICON GmbH & Co. KG

WEICON Contact Cyanoacrylate Adhesives

Adhesivos instantáneos de contacto de cianoacrilato WEICON
瞬間接着剤　瞬间粘合剂

Cold-curing one-component adhesives, free of solvents. They quickly polymerize by reacting with moisture and cure under light pressure. They will bond within seconds almost all materials to and among each other, such as: metals, plastics, glass, ceramics, wood, leather, natural and synthetic rubber.

Unit Per Pc.

CODE	Product	Colour	Content	Description
81 52 74	Flex 310 M Stainless Steel SEGA MS-Polymer base	Stainless steel	310 ml	Suitable for various applications. Especially for applications where the colour of the sealant should be close to the colour of material (e.g. stainless steel, aluminium, etc.) Non-corrosive.
81 52 75 76	Flex 310 M Super-Tack MS-Polymer base	White Grey	290 ml	Very high initial strength. For metals, plastics and many other materials. In particular suitable for bonding on vertical surfaces, indoor and outdoor. Replaces screws, pegs, rivets, and other traditional fixings.
81 52 78	Flex 310 M HT 200 MS-Polymer base	Grey	310 ml	High temperature resistant. Very good adhesion on metal and most plastics. Allows bonding and sealing of parts before thermal coating (e.g. powder coating).
81 52 88	Flex 310 M FireSeal	Grey	310 ml	A permanently elastic adhesive and sealant based on SMP with a fire resistance up to 120 minutes. Tested and classified for all joint structures according to EN 1366-4.
81 52 89	Flex 310 m ProSeal	Grey	310 ml	Multi-purpose, permanently elastic, fast-curing and high-strength 1-C adhesive and sealant based on SMP. Neutral curing, entirely weather-resistant, very low emissions and odour as well as free of silicone, isocyanate and solvents.
81 52 79 80 81	Aqua-Flex SEGA MS-Polymer bae	White Black Grey	310 ml	Special adhesive and sealant for a variety of applications, also on wet and humid surfaces. Free of isocyanate and solvents.
81 52 82 83	Silicone HT 300	Red	85 ml 310 ml	Temperature resistant up to +230°C (+446°F), briefly up to 300°C (+572°F).
81 52 84 85 86	Black Seal Special Silicone	Black	85 ml 200 ml* 310 ml *Pressure-pack	Solvent-free special silicone sealant. Temperature resistant from -60°C (-76°F) up to +280°C (+536°F) (briefly up to +300°C (+572°F)).

(to be continued)

81 52 87	Flex + Bond SEGA	Grey	85 ml	Strong, permanently elastic, temperature-resistant from -40°C to +90°C (-40°F to +194°F), weather-resistant, resistant to UV rays, ageing and salt water, paintable (wet-on-wet), sandable. It is free of silicone, isocyanate, halogens and solvents.

Name of Mfr.: WEICON GmbH & Co. KG

Gasket Removers

Spray Quita-junta　ガスケットリムーバー　垫圈清洗液

Removes gaskets from any type of assembly in 10 to 15 minutes. Prepares metal parts for new gaskets, eliminating scraping and sanding.

Works on wood; non-corrosive on aluminium.

Not for use on plastics, linoleum or synthetic fibers.

81 28 01	Gasket remover spray, 400 ml	Tin

"O" Rings

Junta Tórica Neopreno　O リング　O 型密封圈

Made from synthetic or natural rubber or teflon. When ordering, specify the material, outer and inner diameter as well as thickness. Since there are thousands of sizes available, only a basic illustration is given here.

81 30 01	"O" ring, material, outer diam × inner diam x thickness	Pc.

Rubber Strings

Cordón Tórico Neopreno　ゴムひも　橡皮带

Synthetic rubber made round string for forming "O" rings with glue, etc. Any length is furnishable upon request.

O-Ring Splicing Kits

Estuches para Articular O-Ring　O リング作成キット　O 形环接头工具

Saves the need for complete disassembly. Eliminates the need for an inventory of different sized O-rings. Joints resist water/oil and are as strong as the rubber itself.

Kit contains:

1. 5.48 meter (3 ft.) lengths of common diameters of Buna N cord
2. 1 of Loctite 404 Quick Set Instant Adhesive
3. 1 of o-ring fixture.
4. 1 of blade.
5. 1 each of water-proofing solution and cleanup solution

81 30 70	O-Ring splicing kit	Set

Loctite Product No.00112 (480166 for U.K.)

O-Ring Kits

Estuche Juna Tórica Pulgadas　O リングキット　0 型密封圈工具包

Specially designed for marine use, containing 17 sizes/222 pieces. Packed in a transparent sturdy- hinged acrylic case. Details of the sizes are as follows:

Vinyl Acetate Sponge Water Sheet Filters

Wet Type

Plancha Esponja de Vinilo para Filtro

酢酸ビニールスポンジシート　海棉（湿型）

Synthetic made sponge filter ideal for immersion in any cascade tank or sump for filtering of hydraulic systems, coolant fluids, etc. Size is 1,000 × 1,000 mm and 10 mm thick. Colour is milky white.

81 31 20	Filter, water, vinyl acetate spone sheet, 10 × 1,000 × 1,000 mm	Sht

Vinyl Acetate Sponge Piece Filters

Wet Type

Piezas Esponja de Acetato de Vinilo para Filtro

酢酸ビニールピース　碎海棉（湿型）

Same as the above filter but in pieces packed 1 kg in polythene bag.

81 31 22	Filter, water, vinyl acetate spone piece, 1 kg	Bag

Vinyl Acetate Sponge Oil Filters

Dry Type

Esponja de Acetato de Vinilo para Filtro de Aceites

酢酸ビニールスポンジフィルター　滤油海棉（干型）

Specially designed for filtering lubricating oil, etc. Size furnished 2 mm thickness, 1,000 × 1,000 mm (39" × 39") of width and length.

81 31 24	Filter, oil, vinyl acetate spone, 1,000 × 1,000 mm	Sht

Coco Fiber

Fibra de Coco　ココファイバー　椰子纤维

For filtering waterm, oil, etc.
Made from coco and packed 30 kg in a carton.

81 31 26	Coco fiber	Kgs

Loofah Sponges

Esponjas para Filtro, Lufa　ヘチマ　丝瓜布

Used forr oil straining or filtering.
Each sponge is approoximately 40 cm in length Furnished in pieces only.

81 31 28	Loofah sponge	Pc.

Copper Wool Filters

(Copper Net Filters)

Malla Filtrante de Cobre　コッパーウール　铜滤网

Made of wool-like fine copper and woven into flat tubes. Finely meshed net can strain out and refine lubricating oil or any other liquid. Furnished in a width of 100 mm and coiled approximately 5 kgs per roll.

81 31 30	Filter, copper wool	Kgs

Reflex Flat Gauge Glasses

Cristal Nivel Caldera Extriado

リフレックスゲージガラス　液位表反射平玻璃板

"Klinger" type boiler gauge glasses. Available in pressure capacity of 2.0 MPa (20 kgs/cm²) and 3.9 MPa (40 kgf/cm²).

Plain Flat Gauge Glasses

Cristal Nivel Caldera Liso　プレーンゲージガラス　水位錶平玻璃

Plain type gauge glasses for boiler use. Available in pressure capacity of 2.0 MPa (20 kgf/cm²) or 7.8 MPa (80 kgf/cm²). Specify pressure when ordering and if mica sheet or non-asbestos packing is required.

Plain Type

Oil Seals

Retenes　オイルシール　油封

The Oil Seal stops oil leakage and prevents water, dust and other harmful particles from getting into the workings of bearings. It keeps the bearing clean and lubricated for smooth rotation. Besides stopping leakage effectively, the oil seal is of compact size and is easy to install and remove. Made of highly flexible synthetic rubber to match the motion of the shafts and act as an efficient sealant in simultaneous motion with the springs.

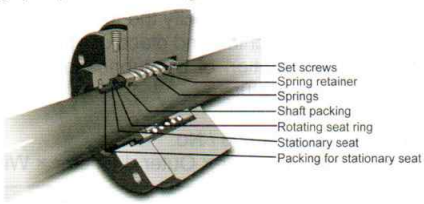
There are so many types of materials and sizes of oil seals, it is impossible to code them all. For this reason, the items described below are only the standard seal designs commonly used for a variety of applications and they are not coded.

Lip materials of the synthetic rubber are:
- Nitrile Rubber
- Polyacrylate Rubber
- Silicone Rubber
- Fluoroelast Rubber

When ordering, please specify the following points:
1. Name of the machine and place of application.
2. Detailed information of the lubricating oil used and the ambient temperature.
3. R.P.M. of shaft.
4. Oil Seal Type /Name / No.
   Size: Shaft diameter × Outer diameter × Width

Type	Features
 S Type	General non-pressure fluid sealing applications and severe grease sealing conditions. It is a single lip oil seal with a garter spring to provide a consistent radial load against the shaft. General limited working capacity : SMPS 12 m/sec. Temperature 120°C Pressure 0.3 kgf/cm²G.
 T Type	General non-pressure fluid sealing applications with light duty exclusion of foreign materials. This design uses the primary lip configuration, with an auxiliary dust lip to provide effective light duty dust exclusion. General limited working capacity : SMPS 10 m/sec. Temperature 120°C Pressure 0.3 kgf/cm²G.
 V Type	Economical design for grease retention or sealing viscous fluid. It is a single lip seal. General limited working capacity : SMPS 8 m/sec. Temperature 120°C Pressure 0 kgf/cm²G.
 K Type	Economical design for grease retention or sealing viscous fluid with light duty exclusion of foreign materials. This type has an auxiliary lip for light dust exclusion. General limited working capacity : SMPS 5 m/sec. Temperature 120°C Pressure 0 kgf/cm²G.
 D Type	The application which requires separating two fluids from each other should use two garter spring loaded lips. The "D" style incorporates the two lips into one design. General limited working capacity : SMPS 5 m/sec. Temperature 120°C Pressure 0.3 kgf/cm²G.

* SMPS denotes Surface Meter Per Second.



81 35 01	Oil seal, TYPE INNER DIAM or SHAFT DIAM, OUTER DIAM, WIDTH	Pc.

Mechanical Seals

Cierres Mecánicos メカニカルシール 机械密封

The Mechanical Seal has two flat seal faces at right angles to the axis of the rotating shaft, preventing shaft wear. One is the seal face of the rotating seal ring and the other is the seal face of the stationary seal ring (stationary, seat or floating seat). One seal face (rotating seal ring) is allowed axial motion to permit the seal faces to remain in contact with each other despite endplay of the shaft, wear or runout of the seal faces. The seal ring is flexibly mounted on the shaft and rotates against the stationary seal ring.

The seal ring has a resilient packing, called shaft packing (O-ring or V-ring assembly) that allows the seal ring to slide back and forth along the shaft and at the same time prevent leakage between it and the shaft or sleeve as a secondary seal. The stationary seat is backed against the gaskets (mostly O-rings) to prevent leakage around its back.

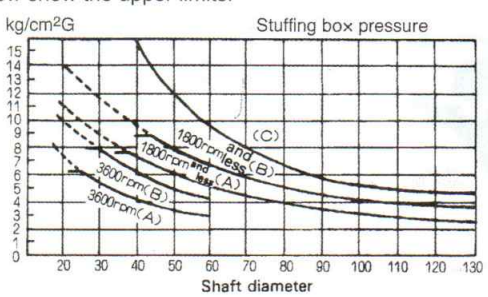
Standard for Marine Pump Mechanical Seals

1. Scope of application

This standard is applied to the mechanical seal of the unbalanced single spring type (hereinafter referred to as mechanical seals). The mechanical seals are among those used for marine centrifugal pumps, gear pumps, and screw pumps, driven by electric motors, for pumping fresh water, seawater, fuel oil and lubricating oil, with shaft diameters in the range from 20 to 140 mm. However, special seals are excluded with operating conditions which exceed values stipulated in Section 2 "Criteria for Application" of this standard.

2. Criteria for application

2-1. Limited temperature



In using the mechanical seals, liquid temperature is restricted within values shown in the table.

Kind of Liquid	Temperature Limit (max.)
Fresh water	90°C
Sea water	40°C
Fuel oil and lubricating oil	100°C

Use cooler with the mechanical seal when the working temperature is higher than the recommended one.

2-2. Limit of pressure and peripheral speed

Pressure for the mechanical seal (stuffing box pressure) and peripheral speed are limited differently depending upon the face material combination. As a rule, the lines in the figure below show the upper limits.

(A) Ceramic vs Carbon
(B) Tungsten Carbide vs Carbon
(C) Silicone Carbide vs Carbon

1. For a pressure and peripheral speed located in the ranges shown by the dotted lines, use balance type mechanical seals.
2. If stuffing box pressure should be negative, please consult us beforehand.

3. Restriction of face materials against rust inhibiter

When the concentration of rust inhibiter exceeds 1,000 ppm, its effect on the seal materials often appears rapidly. Therefore, consult with a dealer before using a mechanical seal with concentrations of rust inhibiter of 1,000 ppm and over.

4. Cooling of the seal face

The normal practice is to require sufficient flushing shown in Fig. A near the seal face for the purpose of cooling, washing, and lubrication. Examples of flushing are shown in Fig. B and Fig. C.

Flow rate for flushing

Fig. A

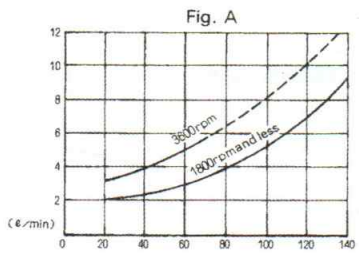


Fig. B

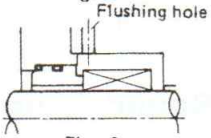

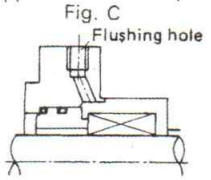

Fig. C

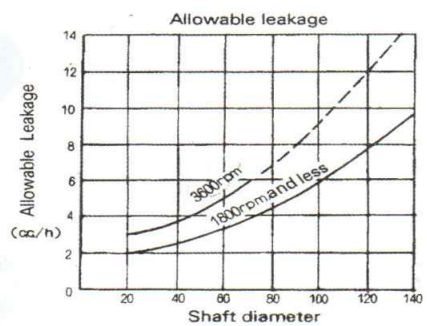
5. Axial movement, run out and squareness of shaft

Table



Unit mm

	Allowable Limits
Axial movement	0.5 and under
Shaft run out Squareness	From 20 to 80 include, in shaft diameter "d" not more than $\frac{\sqrt{d}}{120}$ Over 80 to 140 includ, nott more than 0.075

* d: Shaft or shaft sleeve diameter at the part where the mechanical seal is fixed.

6. Allowable leakage

In using mechanical seals, the allowable leakage during initial operation is shown in the figure in the next page.

Non-combustible Divisions

(Compartimientos) Incombustibles 不燃性仕切り 不燃性壁材

Non-combustible divisions are a material made from silicic acid calcium which neither burns or gives off flammable vapors in sufficient quantity for ignition when heated up to 750°C. All exposed surfaces of a ships bulkheads, linings, and ceilings are required to be covered with this material. The material listed below has a density of 0.65 gm/cm³, which satisfies the requirements for class B divisions according to the 1983 SOLAS regulations.

Name of Mfr. : Alligator

Wired Insulation Mats

Alfombrillas de aislamiento cableadas
ワイヤー入り断熱マット　内含钢丝隔热垫

Suitable for the thermal and acoustic insulation of pipework.
Service temperature: 750°C.

Unit Per Sht.

CODE	T × W × L mm	CODE	T × W × L mm
81 39 90	60 × 500 × 4,000	**81 39 92**	80 × 500 × 3,000

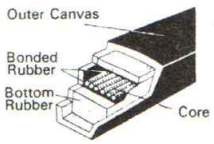
Pipe Insulation Tapes
for High Temperature

Cinta Aislante y Resistente a Altas Temperaturas para Tubos
パイプ用絶縁テープ　管路用耐高温绝缘胶带



Quick and easy way to insulate high temperature surfaces of pipes or valves in vessel engine rooms. For use on bent and flanged pipes in areas where maintenance is not a consideration and/or space is limited. Made from biosoluble vitreous silicate fibre which is reinforced with an outer jacket of heat sealed aliminium foil. Rated for use to 1,000°C max.

Unit Per Rls.

V-Belts
for Power Transmission

Correas Trapeciales　V ベルト　V 型带

(Ref. JIS K 6323 ISO-/R608)

The outstanding properties of the single line cord V-belt are that it has great strength and flexibility while stretching only a minimum amount.

Standard V-Belts

The standard sizes are classified into 6 types: M, A, B, C, D, E with the sizes as shown in the table below.

The length M type is measured by an outside circle, while types A~E are measured by the inside circles of the belt.

Standard V-Belt Section

CODE	JIS		RMA (USA)		BS	
	a	b	a	b	a	b
M	10.0	5.5			9.5	6
A	12.5	9.0	12.7	8.0	13.0	8
B	16.5	11.0	16.7	10.3	17.0	10.5
C	22.0	14.0	22.2	13.5	22.0	13.5
D	31.5	19.0	31.7	19.0	32.0	19.0
E	38.0	25.5	38.0	23.0		

Note: Type D and E are seldom requested for supply and not coded here.

High Pressure Gases

Gases de Alta Presión　高圧ガス　氧气

Gases are obtainable packed in cylinders or empty cylinders from a vessel can be refilled for use. The most commonly required gases for marine use are listed below. When ordering, please specify the type of gas required. Charges for cylinder rental or gas refills are applied separately and the guidelines regarding what type of valves are used on the cylinders, how frequently the cylinders must undergo pressure tests, and if cylinders can be exchanged will vary by country and manufacturer.

CODE	Gas Name	Gas Symbol	Unit	Standard Cylinder
85 01 02	Oxygen	O_2	M^3	7 M^3
04	Acetylene	C_2H_2	kg	6.8 ~ 7.8 kg
09	HFC-134a	CH_2FCF_3	kg	10, 20, 100 kg
10	R-404A	(*)	kg	10, 20, 100 kg
11	R-407C	(**)	kg	10, 20, 100 kg
85 01 13	R-407H	(**)	kg	10, 50 kg
15	R-448A	(***)	kg	10, 50 kg
17	R-449A	(****)	kg	10, 50 kg
12	Propane	C_3H_8	kg	10, 20, 50 kg
14	Carbon Dioxide	CO_2	kg	30 kg
85 01 16	Helium	He	M^3	7 M^3
18	Argon	Ar	M^3	7 M^3
20	Hydrogen	H_2	M^3	7 M^3
22	Nitrogen	N_2	M^3	7 M^3
24	Ammonia	NH_3	kg	50 kg

Remark (*) : R-404A is mixture gas of HFC-125/143a/134a
(**) : R-407C/407H is mixture gas of R32/R125/R134a
(***) : R-448A is mixture gas of HFO-1234yf/1234ze and HFC-32/125/134a
(****) : R-449A is mixture gas of R32/R125/R134a/HFO-1234yf

Note: The refill of an empty cylinder is under strict control by the high pressure gas control safety law of most countries. Consequently, it takes a long time for the refill procedure. To avoid this slow process, cylinder rental systems are also available in certain countries.

Information regarding the use of refrigerant gases

In accordance with the IMO resolution A. 719 (17) regarding CFCs we would like shipyards and ship owners to take note of the current regulations in place on the design of refrigerant systems and proposals for the future restriction of refrigerant gases.

The resolution states as follows:

1. The use of CFCs whose ozone depleting potential is higher than 5 % of R-11 in installations of fixed refrigeration and air conditioning plants and insulation shall be prohibited on ships of which the keel is laid or which are at a similar stage of construction on or after 6 November, 1992.
2. The use of CFCs in such new installations on other ships shall be prohibited by 6 November, 1992.

In regard to the use of refrigerant gases, CFC refrigerants above grade CFC 11(R-11) has been banned from use from the year 1996. Furthermore, the alternative refrigerant HCFC 22(R-22) has been totally banned in EU since 2015. Starting from 1st January 2020, virgin R-22 will be banned in non-article 5 parties (Montreal Protocol) such as Japan, Australia and USA. The other alternative refrigerants such as R-404A (mixture gas of HFC-125/143a/134a) and R-507 (mixture gas of HFC-125/143a) and R-422D (mixture of R-125/134a/600) will also be banned in EU from 1st January. 2020.

The Montreal Protocol stipulates 100% phaseout of the production of CFCs, which is the most common ozon-depleting refrigerants such as CFC-12, R-502 and HCFC-22, by January 1, 1996.

HFCs are environmentally superior to CFCs because HFC does not contain chlorine. However, due to their environmental impact, even more eco-friendly alternatives are introduced such as HFOs, which has significantly lower global warming potential and ozone-depleting potential.

We also include alternative gases from this edition as environmentally friendly refrigerants which enable to make direct replacement of CFCs.

CFC denotes Chlorofluorocarbon.
HFC denotes Hydrofluorocarbon.
HCFC denotes Hydrochlorofluorocarbon.
HFO denotes Hydrofluoroolefin.

Refrigerant Gases

As alternative for CFC Refrigerants

Gas refrigerante como alternativa a refrigerantes a base de CFC
冷凍機ガス　冷冻机制冷气体

Due to the ozone depleting issues, environmentally friendly maritime refrigerant is required for use in various cooling system. Here is the reference of quality assured refrigerants to the highest purity standards (ARI-700), covers wide range of marine refrigeration requirements.

CODE	Name	Unit	Application
85 01 25	Hycool Marine 45	kg	A cost efficient and environmentally friendly secondary refrigerant for use in indirect cooling systems. It is based on the organic salt Potassium Formate. Biodegradable and has neither Ozone Depleting Potential nor Global Warming Potential, Non-flammable and non-toxic. and Wide application range +50 to -45°C, can be used in freezing, cooling and heating applications.
26	Same, supplied in can (25L)	25 L	
85 01 27	Unicool R-407F	kg	A synthetic HFC refrigerant, used in a variety of maritime refrigeration applications such as high, medium and low temperature applications.
28	Same, supplied in 12L cylinder	11 kg	
29	Same, supplied in 56L cylinder	51 kg	
85 01 30	Unicool R-410A	kg	A synthetic HFC refrigerant, used in a variety of maritime refrigeration applications such as high, medium and low temperature applications.
34	Same, supplied in 12L cylinder	9.5 kg	
38	Same, supplied in 56L cylinder	45 kg	
85 01 39	Unicool R-417A	kg	A synthetic HFC refrigerant for replacing R-22 in existing refrigeration systems for low, medium and high temperature applications. **NOTE: Recommended drop-in retrofit replacement for R-22.**
40	Same, supplied in 12L cylinder	11 kg	
47	Same, supplied in 56L cylinder	51 kg	
85 18 21	Unicool R-448A	kg	A new generation of HFO blend refrigerant, with low GWP and highly energy efficient refrigerant for low and medium temperature applications. **NOTE: Suitable for new installation and retrofit for R-404a**
85 18 22	Same, supplied in 12L cylinder	10 kg	
85 18 23	Same, supplied in 56L cylinder	45 kg	

(to be continued)

CODE	Name	Unit	Application
85 18 24	Unicool R-449A	Kg	A new generation of HFO blend refrigerant, with low GWP and highly energy efficient refrigerant for low and medium temperature applications. **NOTE: Suitable for new installation and retrofit for R-404a**
85 18 25	Same, supplied in 12L cylinder	10 Kg	
85 18 26	Same, supplied in 56L cylinder	45 Kg	
85 18 27	Unicool R-452A	Kg	A new generation of HFO blend refrigerant, with low GWP and highly energy efficient refrigerant for low temperature application with air-cooled condenser. **NOTE: Suitable for new installation and retrofit for R-404a**
28	Same, supplied in 12L cylinder	10 Kg	
29	Same, supplied in 56L cylinder	45 Kg

85 18 33	Unicool R-407H	Kg	A new generation of HFC blend refrigerant, with low GWP and most suitable for new installations.
34	Same, supplied in 12L cylinder	10 Kg	
35	Same, supplied in 56L cylinder	45 Kg	

Name of Mfr: Wilhelmsen Ships Service

Seamless High Pressure Gas Cylinders

for Oxygen, Nitrogen, Hydrogen, Helium, etc.

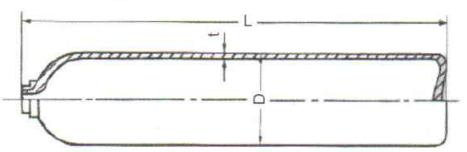
Cilindros sin Costura de Gas de Alta Presión

継目なし高圧ガス容器　　无缝高压气瓶

Made of seamless mangan steel complete with valve and cap for use with various gases such as Oxygen(O_2), Nitrogen(N_2), Hydrogen(H_2), Helium(He), etc.
When ordering, please specify the name of the gas to be filled for safety's sake. Their specifications are as follows:

How to order: CODE

High pressure gas cylinder, KIND of GAS, GAS CAPACITY



Unit Per Btl.

CODE	85 01 41	85 01 42
Gas Capacity m^3	7.0	6.0
Water Capacity ltr	46.7	40.0

Out Diam. mm	232.0	
Nominal Wall Thick mm	6.3	
Overall Length mm	1,370	1,190
Weight kg	53.5	46.5

High Pressure Gas Cylinders

There are a great variety of compressed gas cylinder standards. To avoid dangerous accidents, most countries have their own strict regulations governing the making, refilling and testing procedures of these high pressure gas cylinders. The table in the next page summarizes the abstract details of the popular cylinders of various countries.

In case of refilling, a certain country may require the certificates of the cylinders.

1. American Specifications : DOT 3AA (CTC in Canada)

Fluorocarbon Refrigerant-Recovery Machines

Máquinas de recuperación de refrigerantes de fluorocarburos
フロン冷媒回収装置　碳氟化合物制冷剂回收机

Fluorocarbon refrigerant recovery machine is necessary device that recovers and extract refrigerants from cooling systems such as refrigerator or air conditioning devices to prevent their release into the environment during maintenance, repairs or disposal processes.
Here are the units which may require for recovery works.

Fluorocarbon Refrigerant-Recovery Equipment

Equipos de recuperación de refrigerantes de fluorocarburos
フロン冷媒回収装置
碳氟化合物制冷剂回收设备

A machine that recovers refrigerants from cooling units, and discharges it to the recovery cylinders.

Unit per Set

CODE	85 18 41	85 18 42
Voltage	100V / 50Hz, 60Hz	220-240V / 50Hz
Recovery Refrigerant	R12, R22, R500, T502, R410A, R32, R404A, R407C, R507A,R134a and FC1, FC3 Series of Fluorocarbon Refrigerant (Flammable Exclusive)	R12, R22, R500, T502, R410A, R32, R404A, R407C, R507A,R134a and FC1, FC3 Series of Fluorocarbon Refrigerant (Flammable Exclusive)
Recovery Method	Gas/Mixture: Refrigerant gas from suction port is compressed and changed to liquid. Liquid: Push-Pull Operation. Liquid is forced to cylinder by pressure.	
Ultimate Vacuum	Cont. Operation: Approx. -0.05 Mpa (-380 mmHg) Auto. Operation: Approx. -0.04 Mpa (-300 mm Hg) *Pressure gauge: Mpa display	
Size / Net Weight	H: 360 x W: 430 x D: 260 mm / 16.8 Kg

Pump Oil Capacity	500 ml	100 ml
Intake Fitting	5/16" (1/2-20 UNF)	
Dimension (mm)	W:130 × D:355 × H:265	W:100 × D:245 × H:160
Weight (kg)	10.9	3.75
Accessories	1/4" Male x 5/16" Female adapter (TA159p-4)	

Manifold Gauge

Manómetro　マニホールドゲージ　歧管压力表

Ball valve type hybrid manifold gauge is used for measuring refrigerant pressure by two gauges, one for high pressure and the other for low pressure with valves and ports (for gas and for liquid). The saturation temperatures of the liquid and vapor phases of some gases differ greatly even at the same pressure, and the hybrid gauge has a saturation temperature scale for the liquid and vapor phases, making it excellent accuracy for the saturation temperature.

Gauge connection: 1/8" NPT
Hose connection: 5/16" Flare

85 18 45	Manifold gauge for fluorocarbon refrigerant recovery	Pc.

Fluorocarbon Recovery Cylinders

Cilindros de recuperación de fluorocarbono
フルオロカーボン回収用ボンベ　碳氟化合物回收气瓶

Used to recover and store refrigerants during the process of removing them from cooling devices.

85 18 46	Refrigerant Recovery Cylinder 12 ltr (10 kg)	Cyl.
47	Refrigerant Recovery Cylinder 24 ltr (20 kg)	Cyl.

Nitrogen Gas Cylinders

Bombonas de nitrógeno　窒素ガスボンベ　氮气瓶

Specifications

Application	Inerting
Gas capacity mm^3	9 - 10
Filling pressure bar	196
Gross weight kg	92.7
Overall length mm.	1,664
Outside diameter mm.	230
Valve connection	W24.32 × 1/14M

85 01 77	Nitrogen gas cylinder 9 - 10 m^3	Cyl.

Propane Gas Cylinders

Bombonas de gas propano
プロパンガスボンベ　丙烷气瓶

Made of welded steel for use with liquefied petroleum gas which is mainly used for fuel.

Unit Per Cyl.

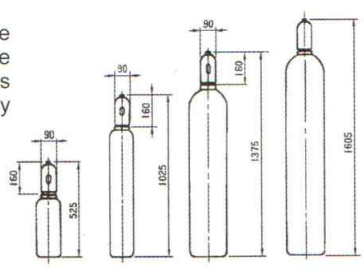
Span (Calibration) Gases

Gases de calibración　スパン(校正用)ガス　量程（校准）气体



Several kinds of gases are available for calibrating gas analyzers. These gases are called Span Gas or Calibration Gas.

For combustible gas detection, two major methods are widely and commonly used in marine applications, one is the non-dispersive infrared absorption principle (Nitrogen Balance) and the other is the catalytic combustion principle (Air Balance).

The specifications of the gases for use on the calibration of the analyzers utilizing the above two principles are as follows.

No.	Mixing Ratio	Name of Gas Mixed	Main Component
C-0	Zero Gas		
D-0	100%		N_2 (Nitrogen)
C-1	Span Gas		
D-1	Approx. 2%	O_2 (Oxygen)	N_2 (Nitrogen)
D-2	" 3%	CH_4 (Methane)	"
D-3	" 4.3%	"	"
D-4	" 5%	"	"
D-5	" 1.5%	"	Air
D-9	Others ... Please specify the components and concentration.		

For containing the above gases, there are several gas cylinders and regulators. They are as follows:

No.	Volume Ltr	Pressure Kgf/cm^2 Filling	Pressure Kgf/cm^2 Test	Size mm Length	Size mm Dia.	Weight Kg
B-0	3.4	100	250	525	140	6.0
1	10	150		1,025	140	14
2	40	150		1,375	232	50
3	47	150		1,605	232	65

When ordering gases and cylinder (if required), please fill the following column.

How to order: 85 - 01 - 84

Span gas, with following information:

Order No. A B C D

(A) With or Without cylinder
0 - Gas only
1 - Gas with cylinder

(B) Cylinder Volume
B - 0, 1, 2, 3

(C) Use
0 - Zero Gas
1 - Span Gas

(D) Kinds of Gas
D-0, 1, 2, 3, 4, 5, 9

Order No. A 1 B 2 C 1 D 3 means

Span gas, 4.3 % CH_4 in N_2 with 40 ltr/cylinder.

Note:
1. In case (A) is 0, the refilling gas cylinder should be attached with the certificate if issued previously.
2. The combustible gas balanced by air which is over 30 % of LEL (Lower Explosive Limit) can't be supplied/refilled.

Span Gases

Gases de efecto invernadero　スパンガス　跨度气体

Span Gas for all types of gas detectors and analyzer. To help comply with standards, various types of calibration gas cylinders are available for your usage.
The most important accessory to any gas detector is a calibration kit, which provides the means to determine if the instrument is working properly. When using gas detection equipment, it is necessary to calibrate the equipment on a regular basis to guarantee accurate results. According to some regulations and standards, one must test the gas detector prior to each use with a suitable test gas.

Can Specifications

Type	34L	58L	110L
Height x Diam	280 x 74 mm	360 x 88 mm	360 x 88 mm
Weight in kgs	0.7	0.8	0.8
Material	Aluminium Alloy		
Filling Pressure	500 PSI	500 PSI	1,000 PSI
Usable Gas	34 ltr	58 ltr	110 ltr
Connection	5/8"-18 UNF(C-10)

Regulators and Accessories

Reguladores y accesorios　レギュレーターとアクセサリー　调压器和配件

Fixed Flow Regulators for 34 ltr, 58 ltr, and 110 ltr

Available for portable detectors with no pump or hand pump, also ideal for fixed head detectors. Flow rate 0.3 litres/minute, 0.5 litres/minute or 1.0 litres/minute.

Unit Per Pc.

CODE	Flow rate	CODE	Flow rate
85 15 93	0.3 ltr/min	85 15 95	1.0 ltr/min
94	0.5 ltr/min		

Demand Flow Regulators for 34 ltr, 58 ltr and 110 ltr

Special designed for gas detectors with built-in electric sample pump. Important gas is supplied at "Sample pump" normal working flow rate, hence ensures testing and calibration are similar to true operation conditions.

85 15 96	Regulator, demand flow, for 34 ltr, 58 ltr and 110 ltr	Pc.

Gas Sample Bags with Clip Valve

Sample bags are available too for use with fixed equipment or pumped instrument.

85 15 99	Gas sample bag with clip valve	Pc.

Gas Cutting Work Diagram

Oxygen & Acetylene Gas Cylinder Regulators

Reguladores de Oxigeno y Acetileno
酸素及アセチレン調整器　氧气及乙炔调节器

Single stage with easy to read 60 mm gauges. For general welding and cutting, these regulators feature greater flow and accuracy, more economy, simple repairs and greater safety.

Oxygen regulators have two types of male and female inlet threads.

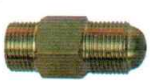
Oxygen Regulator with Male Thread

Oxygen Regulator with Female Thread

Acetylene Regulator

How to order: CODE

Regulator, KIND of GAS, INLET THREAD mm



Unit Per Pc.

		HP	LP			
85 01 91	Oxygen	250	25	10	72	22.8×14 Male
92	Oxygen	25	25	10	72	22 ×14 Female
93	Acetylene	25	1.9	0.7	9	Clamp

Adapters for Gas Cylinder Regulator

Adaptadores para regulador de bombona de gas
ガスシリンダレギュレータ用アダプタ　气瓶调节器适配器

Adapters are also available to connect flashback arresters or couplings in case the threads are not matched with gas cylinder regulators. Mainly used for oxygen cylinder regulators.

Nipple

Socket

85 01 90	Nipple for gas regulator, 22.8 x 14mm, male	Pc.
94	Socket for gas regulator, 22 x 14mm, female	

There are different sizes of Oxygen and Acetylene Hose connecting nipples for the various regulators, cutting and welding torches manufactured in the world, so please pay attention to this matter when ordering.

Flashback Arresters for Gas Cylinder Regulators

Supresor de retroceso de llama para reguladores de cilindros de gas
ガス調整器用逆火防止器　燃气调节阀用回火防止器

To be installed on Oxygen and Acetylene regulators for arresting the flashback.

For Oxygen

Automatic Reverse-flow Prevention Couplings

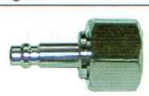
Acoples Automáticos Antirretorno

自動逆流防止継手　自动防回流接头（插座）

These couplings are fitted to the outlet pipe, connecting hose, and the welding/cutting machine and outfit, removing possible risks accompanying the gas welding/cutting operation and making preparation and maintenance of the welding/cutting machines easy.

Further, each type is specially designed for oxygen or fuel gas so as to prevent mistakes.

A spring-loaded locking method is used, fitting or removal is a single action, which minimizes hose damage and makes maintenance easy.



For Hose to Hose Connections

Gas	Size	Socket, Hose End	Plug, Hose End
Oxygen	1/4" Hose End	 AV-1	 AP-1
Acetylene	3/8" Hose End	 AV-2	 AP-2

Quick Couplers

for Welding Equipment Piping

Acoplamiento Rápido para Tubería del Equipo de Soldadura

溶断機器配管用クイックカップラー　焊接备用快速联接器

Especially for welding equipment piping with excellent durability and corrosion resistance. All piping connections from cylinder to torch can be associated with welding equipment by one-touch operations. Body is chrome plated for better corrosion resistance, and plug is hardened for better durability. Oxygen and fuel gas fittings are different sizes and sleeves are given different colours, chrome plating for oxygen and copper plating for fuel gas, to prevent accidental interconnection. No oxygen types (1/4" and 5/16") can be connected to fuel gas types (5/16" and 3/8"). However, respective types of the connection, oxygen plugs and sockets are interchangeable and fuel gas plugs and sockets are interchangeable.

Specification

Body Material	Socket: Brass (Chrome-plated), Plug: Steel (Chrome-plated)
Size	1/4", 5/16", 3/8"
Working Pressure MPa (kgf/cm²)	0.7 (7)
Pressure Resistance MPa (kgf/cm²)	1.0 (10)

Coated Brass Brazing Filler Metal

Varilla para Soldar, Latón Recubierta　被覆黄銅ろう付棒　铜焊条

This is a machine coated, wire drawn brass rod, made from special elements. These coated filler rods have the advantages of low flaming, fine deposits, increased tensile strength, easy and speedy operations.

Characteristic of Deposit Metal

Tensile Strength for All Deposit	36 - 43 kgf/cm²
Elongation (7d)	24 - 32%
Impact Strength	5-6 kgf/cm²
Hardness	90 - 95 HB
Sticking Strength on Steel	30 - 40 kgf/cm²
Sticking Strength on	Equal or up to Mother Metal

Applications:

Repair of cast iron assemblies, welding of dissimilar metals (steel and iron, copper and brass, iron and copper, etc.) assembly of steel plate and steel sheets.

Unit Per Pkt.

CODE	Rod Diam. mm	Rod Length mm	Number of rod per Package	Weight Per Package

Flux Coated Silver Solder

Varilla para Soldar, Plata Recubierta　フラックス付銀ろう　银焊条

Flux coated silver brazing type alloy for joining all ferrous and copper metals, stainless steel, nickel and its alloys, steel castings, malleable and cast iron, tungsten carbides, etc. Suitable for most close-fitting joint designs, rapid application with minimum joint preparation. It is cadmium free, has high fluidity with good capillary flow.

Specifications

Main Component	Ag (30%), Cu, Zn, Sn
Melting Temp. C	620° - 650°
Tensile Strength	60 kg/mm²
Hardness	B 95
Wire Length	450 mm
Package	500 grm/pkt

Unit Per Pkt.

CODE	Diam. mm	Length mm	Weight Per Package
85 04 61	1.6	450	500 grm
62	2.0		
63	2.4		

Welding Fluxes

Fundentes para Soldadura Autógena　ガス溶接剤　气焊粉

Several kinds of fluxes are available and the standard ones are listed below. They are all used for gas welding.

Unit Per Can

CODE	Purpose	Content
85 04 81	For Cast Iron Welding	1 kg
82	For Copper Welding	1 kg
83	For Brass Welding	1 kg
85 04 85	For Dissimilar Metal Soldering	1 kg
85 04 86	For Aluminium Welding	0.1 kg
87	For Silver Soldering	0.4 kg

Electrodes

Electrodos　電気溶接棒　电焊条（低碳钢）

A wide variety of brands from different manufacturers are available. Popular brands are listed below. When ordering, please specify brand and size.

If you wish to order electrodes from a specific manufacturer, please refer to the comparison table listing major international manufacturers and products types on page 85-16 ~ 18.

Unit Per Pkt

CODE	Brand	Size mm D	Size mm L	Kg per Packet	Features
85 06 31	S-03Z	2.0	300	5.0	Lime-titania type electrode for all positions, containing a large amount of iron powder in the coating. It can promote efficiency in welding general structures and light gauges.
32		2.6	350		
33		3.2	350		
34		4.0	400		
35		5.0	450		
36		6.0	450		
85 06 51	S-13Z	2.0	300	5.0	High rutile type electrode which gives beautiful bead appearance with shallow penetration. Arc is calm, spatter is minimal and slag is easy to remove. Vertical downward welding is possible with small diameter electrodes.
52		2.6	350		
53		3.2	350		
54		4.0	400		
55		5.0	400		
56		6.0	450		
85 06 61	FT-51	2.0	250	2.5	High rutile type electrode which gives beautiful bead with shallow penetration. Small diameter electrodes assure easy operation in vertical downward welding. It is especially suitable for weldings sheet steels.
62		2.6	300		
63		3.2	350	5.0	
64		4.0	400		
65		5.0	400		
66		6.0	400		
85 06 71	16	2.6	300	5.0	Low hydrogen type electrode for all positions. The deposited metal from this electrode shows higher crack resistance, elongation and ductility than the other electrodes for mild steel.
72		3.2	400		
73		4.0	450		
74		5.0	450		
75		6.0	450		
76		8.0	450		
85 06 81	16V	3.2	400	5.0	Low hydrogen type electrode for vertical downward butt and fillet welding of mild steel. The deposited metal from this electrode shows high crack-resistability as well as excellent mechanical properties.
82		4.0	450		
83		4.5	450		
84		5.0	450		
85		5.5	450		
86		6.0	450		
For High Tensile Strength Steel					
85 07 01	L-55	2.6	300	5.0	Low hydrogen type electrode designed for all positions welding of 50-55 kg/mm^2 high tensile strength steel. The deposited metal contains less hydrogen, and shows high crack resistance as well as excellent mechanical properties. X-ray quality and notch-toughness.
02		3.2	400		
03		4.0	450		
04		5.0	450		
05		6.0	450		
06		7.0	450		
07		8.0	450		
For Weathering Steel					
85 07 21	CT-16Cr	2.6	300	5.0	Low hydrogen type electrode for welding 50 kg/ mm2 high tensile weathering steel in all positions.
22		3.2	350		
23		4.0	400		
24		5.0	400		
25		6.0	450		
For Cast Iron					
85 07 31	C-1N	3.2	340	2.0	Graphite type electrode with pure nickel core wire for welding cast iron. Weld metal is not so hard and is easy to machine.
32		4.0	380		
33		5.0	380		
85 07 36	C-5N	3.2	350	2.0	Graphite type electrode for welding cast iron. Since Fe-Ni composite wire is used for the core wire, operational characteristics do not change even in high current.
37		4.0	350		
38		5.0	350		
For Stainless Steel					
85 07 41	309-R	2.0	250	2.5	Lime-titania type electrode which gives the deposited metal of 25%Cr-12%Ni. It has excellent crack resistibility especially in the welding of dissimilar metals such as stainless steel to mild steel.
42		2.6	300		
43		3.2	350		
44		4.0	350	5.0	
45		5.0	350		
85 07 51	309-M-R	2.6	300	2.5	Lime-titania type electrode which gives the deposited metal of 25%Cr-12%Ni-2% Mo. It has excellent crack resistance especially in the welding of dissimilar metals such as stainless steel to mild steel.
52		3.2	350		
53		4.0	350		
54		5.0	350	5.0	
85 07 61	310-R	2.0	250	2.5	Lime-titania type electrode which gives the deposited metal of 25% Cr-20% Ni. The deposited metal has perfect austenite structure and shows better corrosion resistance and oxidation resistance than the one from 25% Cr- 12% Ni type electrode.
62		2.6	300		
63		3.2	350		
64		4.0	350		
65		5.0	350	5.0	
85 07 71	316-L-R	2.0	250	2.5	Lime-titania type electrode which gives the deposited metal of 18% Cr-12% Ni-2% MO. It has excellent resistance to intercrystalline corrosion in the as-welded condition.
72		2.6	300		
73		3.2	350		
74		4.0	350	5.0	
75		5.0	350		
For Heat Resistant Steel					
85 07 91	N-0S	2.6	300	5.0	Low hydrogen type 0.5% Mo electrode for welding C - Mo steel to be used in temperatures up to 500oC.
92		3.2	350		
93		4.0	400		
94		5.0	400		
95		6.0	400		
85 08 01	N-1S	2.6	300	5.0	Low hydrogen type 1.25% Cr-0.5% Mo electrode for welding 1-1.5%Cr-0.5% Mo steel to be used in high temperatures around 550oC.
02		3.2	350		
03		4.0	400		
04		5.0	400		
05		6.0	400		
85 08 11	N-2S	2.6	300	5.0	Low hydrogen type 2.25% Cr-1% Mo electrode for welding 2.25% Cr-1% Mo steel to be used in high temperatures around 600oC.
12		3.2	350		
13		4.0	400		
14		5.0	400		
15		6.0	400		
For Hardfacing					
85 08 21	H-Mcr	4.0	350	5.0	Low hydrogen type electrode for building up and hardsurfacing of steel parts subjected to high temperature abrasion and heavy impact abrasion.
22		5.0			
23		6.0			
85 08 26	H-350C	4.0	400	5.0	Low hydrogen type electrode for building up and hardsurfacing of steel parts subjected to light metal-to-metal abrasion.
27		5.0	400		
28		6.0	450		
29		7.0	450		
85 08 31	H-13M	4.0	400	5.0	Low hydrogen type electrode for building up and hardsurfacing of steel parts subjected to abrasion accompanied with severe impact.
32		5.0			
33		6.0			
For Nickel, Nickel-Alloys and Nickel-Alloy Steels					
85 08 36	Yawata Weld 182AC	2.6	300	2.5	Excellent crack-resistance due to much amount of Mn content in the deposited metal makes the electrode suitable for welding of extremely thick plates and for hardfacing of plates for use in nuclear power plants,etc.
37		3.2	300		
38		4.0	350	5.0	
39		5.0	350

Kobe Steel Products (Shinko)

Unit Per Pkt

CODE	Brand	Size mm D	Size mm L	Kg per Packet	Features
For Mild Steel (Shielded Metal Arc Welding)					
85 13 01	Familiark Z-44	2.0	300	2.0	Low fume type electrode for welding of mild steel used for vehicles, light gauge structures and buildings.
02 03 04		2.6 3.2 4.0	350 350 450	5.0	
For All-position Welding of General Structures					
85 13 05 06 07	B-10	2.6 3.2 4.0	350 350 400	5.0	Ilmenite type covered electrode for butt or fillet welding in all positions for thin or thicker plate (1.6 to 20mm).
For All-position Welding of Heavy-duty Structures					
85 13 11 12 13	B-14	2.6 3.2 4.0	350 400 450	5.0	Ilmenite type covered electrode for butt or fillet welding in all positions for thin or thicker plate(1.6 to 20mm).
85 13 15 16 17	B-17	2.6 3.2 4.0	350 350 400	5.0	Ilmenite type covered electrode. Structural steels with heavy sections up to about 25mm can be welded.
For Welding of Steel Sheets and Light Structures					
85 13 21	B-33	2.0	300	2.0	High titania type covered electrode, suitable for in flat or horizontal fillet welding.
22 23 24		2.6 3.2 4.0	350 350 400	5.0	
85 13 25	RB-26	1.6 2.0	250 300	2.0	High titania type covered electrode, suitable for vertical downward welding with the diameters up to 5.0mm.
26 27 28 29		2.6 3.2 4.0	350 350 400	5.0	
For Welding of Heavy-duty Structures and Heavy Plates					
85 13 31	LB-26	2.0	300	2.0	Low hydrogen type covered electrode containing iron powder. The welding in all positions can be easily done.
32 33 34		2.6 3.2 4.0	350 350 400	5.0	
For Vertical Downward Welding					
85 13 35 36	LB -26V	3.2 4.0	400 450	5.0	Low hydrogen type covered electrode for use in vertical downward position for ships.
For Welding of 50kgf/mm2 High Tensile Steel					
85 13 41 42 43	LB-52	2.6 3.2 4.0	350 350 400	5.0	Most widely used low hydrogen type covered electrode for all-position welding.
For Welding of General Mild Steel					
85 13 52 53 54	TB-24	2.6 3.2 4.0	350 350 400	5.0	Lime-titania type electrode, and excellent in all-position welding, particularly in vertical and overhead positions.
For Welding of Mild Steel					
85 13 55 56 57	TBI -24	2.6 3.2 4.0	350 350 400	5.0	Iron powder lime-titania type electrode for mild steel.
For Welding of Cast Iron					
85 13 61 62	CIA-1	3.2 4.0	300 350	2.0	Covered electrode with graphite type coating flux and pure nickel core rod.
85 13 65 66 67	CIA-2	2.6 3.2 4.0	300 300 350	2.0	Covered electrode with graphite type coating flux and 55% Ni-Fe alloy core rod.
For Stainless Steel (SUS-304)					
85 13 71 72	NC-38	2.0 2.6	250 300	2.0	Lime-titania type electrodes, especially excellent with better crack resistibility.
73 74		3.2 4.0	350 350	5.0	
For Stainless Steel (SUS-309S)					
85 13 75 76	NC-39	2.0 2.6	250 300	2.0	Lime-titania type electrodes, providing good corrosion resistibility and good heat resistibility.
77 78		3.2 4.0	350 350	5.0	
For Stainless Steel (SUS-310S)					
85 13 82 83	NC-30	2.6 3.2	250 300	2.0	Excellent in heat resistance, corrosion resistance and mechanical properties due to stable full-austenitic microstructure.
84		4.0	350	5.0	
For Stainless Steel (SUS-316L)					
85 13 85 86	NC -36L	2.0 2.6	250 300	2.0	Lime-titania type electrodes and the intergranular corrosion resistibility is superior due to lower carbon content.
87 88		3.2 4.0	350 350	5.0	
For Welding of 1.25%Cr-0.5%Mo Steel					
85 13 91 92 93	CMA -96	2.6 3.2 4.0	300 350 400	5.0	Low hydrogen type electrodes for all-position welding and the alloy elements are supplied from the core rod.
For Mild Steel and 50 kgf/mm² HT Steel (Tig Welding)					
85 14 01 02 03 04	Familiark TG -S50	1.6 2.0 2.4 3.2	1,000	5.0	For welding of mild steel, 50 kgf/mm² high tensile steel, and alminium-killed steel for low temperature use.
For Stainless Steel (Tig Welding)					
85 14 05 06 07 08	TGS -308	1.6 2.0 2.4 3.2	1,000	5.0	For welding of 18%Cr-8%Ni stainless steel (SUS-304).

Storage Containers

for Welding Rod

Recipientes para guardar varillas para soldadura
溶接棒用筒型コンテナ　焊条保管筒

A waterproof yellow coloured storage containers for welding rods of 350 mm or 450 mm with carrying strap. A diamond shape to prevent the canister from rolling off a work surface. The cap is sealed with a pressure fitted O-ring to prevent intrusion of moisture and contaminants.

Unit Per Pc.

Ovens for Welding Rod

Hornos para varillas para soldadura
溶接棒乾燥用オーブン　焊条烘干箱

Type 2　Type 5

A portable ovens ensure electrodes remain moisture-free in the field and meet welding code requirements. The ovens include a thermostat to adjust oven temperature in line with electrode requirements. The Type 5 is available with wheels and a pull handle or with carry handles.

- Storage capacity for 14" or 18" electrodes.
- Rod elevator for quick removal of electrodes.
- Adjustable thermostat provides temperature (from 38-149°C) control in the field.
- Safety Yellow colour increases field visibility.
- New 120/240V dual volt heating elements.

Electrode Conversion Table

Products from a few manufacturers are listed in the next page for your reference. If there is some question as to what types are most suitable, please ask for further information or brochures from the local manufacturers when ordering.

When ordering electrodes, the following information will be required:

1. The composition on the metals to be connected.
2. The type of joints being welded.
3. The position of welding.
4. The type of welding power source available.
5. The requirements of the welded joint, strength, appearance, corrosion resistance, the way the weld assembly will be used.
6. The types and, to some extent, the sizes of electrodes.
7. CODE NO.
8. Type
9. Manufacturer's name and product type.
10. Required quantity in kg.

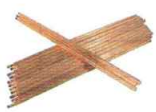
Gouging Electrodes

Electrodos para ahuecar　溝掘り用溶接棒　刨槽用焊条

Made of carbon and have a copper coating. The gouging electrodes are available in a variety of shapes and diameters to meet the various applications.
Power source 380V, DC, compactness 1.57; max. humidity < 0.4%.



Direct Current Pointed Gouging Electrodes

Unit Per Pc.

Direct Current Flat Gouging Electrodes

85 09 83	Electrode, DC, flat gouging, 5 x 15 x 305 mm, 300-400 amp.	Pc.

Gouging Torches

Antorchas para ahuecar　くり抜き用トーチ　刨槽用焊枪

The airflow can be regulated on the torch. The adjustable nozzle and the use of high quality materials ensure optimal electric safety and efficiency and maximum airflow. The mono cable can be mounted easily to the torch and the power source. Recommended air pressure is 7 bar.

Unit Per Pc.

CODE	Ampere	Max. Electrode
85 09 84	600	10 mm (3/8")
85	1,600	19 mm (3/4")

Monocables

for Gouging Torch

Monocables para antorchas de ahuecar
くり抜き用トーチ用ケーブル
刨槽焊枪用电缆

Gouging with the support of a monocable is a very efficient and handy way to operate. Both the power and the air are guided through one cable, which allows the gouger to work. Length: 2.35 mtr.

Unit Per Lgh.

CODE	Ampere	Cable Size
85 09 86	600	35 mm²
87	1,600	95 mm²

Gouging Torch & Monocable Sets

Conjunto de antorcha para ahuecar y monocable
くり抜き用トーチ＆ケーブル一体型セット
刨槽焊枪及电缆一体型组件

Complete sets allow you to start gouging immediately and saves the costs of putting the set together. Total length 2.5 mtr.

Unit Per Lgh.

CODE	Ampere	Cable Size
85 09 88	600	35 mm²
89	1,600	95 mm²

Welding Cables

Butyle Rubber Sheathed 1,000V or less-Single Conductor

Cables para Soldadura　溶接用電線　焊接电缆

Welding cable for general use. Cloth or paper wrapped wire sealed in rubber sheath.

Unit Per Mtr.

CODE	mm²	Strand O.D. mm	Cable O.D. mm	Cable Construction mm	Kg Per mtr
79 41 01	22	7.0	11.8	0.45 × 20 × 7	0.31
02	38	9.1	14.5	0.45 × 34 × 7	0.50
03	60	11.7	17.5	0.45 × 20 × 19	0.75

34	500	2.5 - 8.0	2 screws 9/16"	25-95

Screw-on Closed Head

Cabeza cerrada atornillable
ねじ込み式ホルダー　螺纹支架

A screw-on closed head electrode holder with extreme tight grip on the electrode, wide range of applications and optimal electric safety (class A for Progress 400).
Standards: EN 60974-11.

Unit Per Pc.

CODE	Amp	Electrode Size mm	Connection	Cable mm²
85 10 28	400	1.6 - 6.3	1 screw 9/16"	25-95
29	600	1.6 - 8.0	1 screw 9/16"	25-95

Turnable Head

Cabezal giratorio
回転式ホルダー　旋转支架

A high quality and simple electrode holder with a turnable head. The slim and smooth appearance allows for welding in the most confined areas. The extreme tight grip on the electrode, the wide range of applications and the optimal electric safety (class A for Victory 400).
Standards: EN 60974-11

Unit Per Pc.

CODE	Amp	Electrode Size mm	Connection	Cable mm²
85 10 30	400	1.6 - 6.3	1 screw 9/16"	25-95
36	600	1.6 - 8.0	1 screw 9/16"	25-95

Electrode Holders

Integrated with Welding Cable

Portaelectrodos integrados con cable de soldadura
溶接ケーブル付き溶接棒ホルダー
附带焊接电缆的焊夹

A closed head type electrode holder 300amp connected with welding cable. Welding cable neoprene HO-1/N2-D.

Unit Per Pc.

CODE	Plug	Cable	Length mtr
85 10 37	SK 25 - 13 mm	25 mm²	5

Arc Welders

Grupo Soldadura de Arco 電気溶接機 电弧焊接机

Shielded metal arc welding (Stick electrode welding) is most broadly used in shipboard maintenance and repair welding.

In welding two pieces of metal together, an electric arc is established the end of the coated electrode and the base metal in the joint.

When the electric arc is struck between the tip of the electrode and the work piece (Base metal), molten droplets from the electrode are transferred to and mixed with the molten metal in the joint. As the arc progresses along the joint the molten weld metal cools and solidities forming a strong, integral bond in the joint.

Arc welder converts shipboard power – usually 220, 380 or 440 volts, alternating currents (AC) to an output in the form of AC (Transformer) or DC (Rectifier) current.
Typical welding currents may range from 30 to 400 amperes at voltage of 22 to 32 volts.

Most electrodes used for shipboard maintenance welding operate at less than 200 amperes. So a current output of 400 amperes will suffice for most carbon arc applications.

The output AC/DC type will be more flexible and better suited to a wide range of conditions.

Please specify the following points when ordering:
1. Type of welder required;
   1) Transformer (AC)
   2) Rectifier (DC)
   3) Transformer/Rectifier (AC/DC)
2. Main supply: Voltage and Frequency
3. Maximum output capacity: Current amperes

Tig Welders

Soldadores TGI　TIG 溶接機　TIG 焊接机

Tig (Tungsten Inert Gas) welding is an arc welding process that uses a non-consumable tungsten electrode to produce the arc, and used for critical weld joints, welding metals, such as aluminium, stainless steel, copper, brass, titanium, nickel, even two dissimilar metals, other than common steel, and where precise, small welds are needed.

Tig welding requires a shielding gas to protect the weld area from the air (typically pure Argon gas), and utilizes a constant current welding power supply to generate an electric arc between the tungsten electrode and the workpiece, using the resultant heat to create the weld. The pulse function is used for giving a more stable arc than not pulsing. This allows for welding thinner metals and high heat conductive metals without burning through.

Unit Per Set

Plasma Cutting Machines

Máquinas de corte por plasma
プラズマ切断機　等离子切割机

The plasma cutting process, as the most cost-effective method of cutting a range of materials, is especially recommended for steel, stainless steel, aluminium or other alloys those are electrically conductive, not easily cut by conventional oxy-acetylene process. The combined effect of a high intensity arc and a hot, high velocity plasma gas results in a very clean, high speed cut including piercing, beveling and gouging.

Please specify if air compressor built-in model is required, when ordering.

Cutting Capacity of Plate Thickness

Rated Output Current	Steel / Stainless Steel	Aluminium	Copper
15 amp	13 mm	1 mm	-
35 amp	10 mm	6 mm	-
55 amp	18 mm	12 mm	-
70 amp	25 mm	20 mm	8 mm
80 amp	30 mm	28 mm	10 mm
120 amp	46 mm	46 mm	20 mm

How to order: 85 - 10 - 76
Air plasma cutting machine, Cutting capacity of plate thickness, Rated output current AMP, Power source VOLTAGE, Air Compressor built-in, or not (Set)

Pipe Clamps for Welding

Abrazaderas de tubo para soldadura
溶接作業用パイプクランプ　焊接作业用管夹

For the optimal positioning of pipes for welding. Made of aluminium or steel. Lightweight and has good grip on pipes with an outside diameter up to 76 mm. For pipe-pipe and pipe-fitting welding.

Unit Per Pc.

CODE	**85 10 62**	**85 10 63**
For Pipe Diameter	25 – 64 mm 1.0 – 2.5"	26 – 76 mm 1.0 – 3"
Material	Aluminium	Steel
Weight kg	0.6	0.75

Metal Holding Magnets

Imanes para la sujeción de metales
金属材料固定用磁石　固定金属材料用磁石

Fixed Angle

The fast & easy way to hold metal workpieces at 45° & 90°. Turn the magnet Off when setting up, turn On when you're ready to work. Fast and safe set-up! Ideal for round and square tubing, angle, and flat stock. Easy to clean. Simply turn Off and wipe.

Unit Per Pc.

CODE	**85 10 64**	**85 10 65**
Type	MSA-46HD	MSA-48HD
Description	Adjust-O™ Magnet Squares (45° & 90°)	Heavy duty large magnet, Adjust-O™ Magnet Squares (45° & 90°)
Max. Pull Force	35 kg	80 kg
Size mm	110 × 95 × 29	153 × 130 × 35
Weight grm	700	1,400

(to be continued)

Mini Handy Set

The handy, take-along magnets in a convenient 6-pack. Large centre holes for easier handling. Two riveted holes for linking magnets together. Useful in light duty applications. For 30°, 45°, 60° and 90° angles.

Type: MS346AK
Size : 60 × 50 × 15 mm

85 10 66	Magnet, handy mini, 6's/pack Type : MS346AK	Pkt

Adjustable Angle

The magnet will make positioning easier, and safer to use, and hold all angles between 25°- 275°. Hold flat and round work pieces.
Max. pull force : 40 kg
Size : 115 × 190 x 38 mm
Weight : 2.4 kg

85 10 67	Magnet, metal holding, adjustable angle, Max. pull force 40 kg	Pc.

Welders Guide Scales

Básculas guía para soldadores　溶接用ガイドスケール　焊接指南秤

A special guiding tool for gas welding and cutting work, guiding to move the torch in a straight line while maintaining nozzle height. High performance permanent magnet holds the guide scale firmly onto the steel plate. Made of stainless steel and available in 3 different sizes.

Unit Per Pc.

CODE	Length (mm)	Width (mm)	Height (mm)	Magnet

Safety Spectacles

Anti-scratch & Anti-fog

Gafas protectoras, antirayaduras y antivaho

きず防止・くもり防止安全作業用メガネ　防雾防刮擦安全防护眼镜

Available in white and IR (Infrared) colour 5. Lens made from a single piece of polycarbonate which fits almost all contours of the face. Curved model, ergonomic design with adjustable arms. Comfortable glasses with a high protection factor. Weight: 34 grams

Standard: EN166:2001 FT, EN 175

Unit Per Pr.

CODE	85 11 13	85 11 14
Lens Colour	Clear	IR shade 5

Safety Spectacles

with Interchangeable Lenses

Gafas protectoras con lentes intercambiables

レンズ交換式安全作業用メガネ

可换镜片安全防护眼镜

Safety spectacles with different interchangeable lenses, supplied as a set. Set consists of: glasses frame, lenses: white/smoke/amber, clip cord, lens cloth and storage case. Lenses and frame made from reinforced polycarbonate. Lightweight and very comfortable frame with soft rubbers on the arms. Also comes with rubber nose pads that prevent the glasses from slipping off. Fits all contours of the head and face. Weight: 27 grams.

Standards: EN166:2001 FT

85 11 15	Spectacle, safety, with interchangeable lenses	Set

Welding Helmets

Cascos para soldar　溶接用ヘルメット　电焊帽

Helmet with headgear for general welding use. Made of fibre glass, lightweight, and heat-resistant.

85 11 16	Welding helmet with headgear	Pc.

Arc Flash Protective Visors

for Electricians

Visera protectora contra descargas de arco eléctrico para electricistas

電気溶接火花防災面　电焊火花防护面罩

V-Gard Electrician's Visors provide reliable protection from arc flash effects: high temperature, flying debris and powerful radiation. They are certified to the highest European arc flash protection levels by the standards GS-ET-29 [class 2, 7 kA] and EN166 [8]. The impact and splash resistance is certified to EN 166 [B & 3].

Made from a patented injection molded blend of dyes and nano particles in a polycarbonate matrix. They absorb the arc energy layer by layer. This blend of dyes makes the visor look light green but offers the highest visual light transmission available in GS-ET-29 [VLT Class 0] providing maximum light transmittance and color recognition. As moldings they are optically correct, which ensure the best vision and reduced eye fatigue.

Two versions are available:

- Compatible with helmet mounted earmuffs.
- With extended ear protective shape, covering the ears.

Both feature an anti-fog coating for a clear view in challenging situations.

85 11 17	Visor, arc flash protective, compatible with helmet mounted earmuffs	Pc.
85 11 18	Visor, arc flash protective, with extended ear protective shape, covering the ears	

Name of Mfr: MSA The Safety Company

Electrician Kits Premium

EN166 & GS-ET-29 class 2 (7 kA)

Kits de electricista Premium

電気工事キット・プレミアム　高级电工工具包

Ideal set for applications requiring arc flash protection, especially in confined spaces.

- Helmet, V-Gard 520 white with Fas-Trac III ratchet suspension, replaceable.
- Foam sweatband (EN 397 440 V AC and EN 50365, Part of visor testing GS-ET-29 Class 2).
- V-Gard frame (EN 166: 389 BT; Part of visor testing GS-ET-29 Class 2).
- Electrician visor Premium – V-Gard arc flash visor compatible with earmuffs, retractable chin guard (EN166 & GS-ET-29 Class 2, EN166 2C-1.2 1 B 8 - 2 - 0 3).

Anti Spatter Sprays

Pulverizadores antisalpicaduras
金属粒付着防止スプレー　防止金属颗粒粘着喷雾剂

Prevents welding spatters from sticking to the welding torch or to the workpiece. Contains no harmful or flammable detergents. Offers the perfect solution to stainless steel.
- Resistant up to 1,500°C.
- Ideal for welding torches and automatic machines.

85 11 76	Anti spatter spray, 500 ml	Can

Water-Based Weld Anti-Spatters

Soldadura de base acuosa antisalpicaduras
水性溶接はね防止剤　水焊防飞溅剂

A water-based spatter release agent which gives exceptional results without the use of harmful solvents, silicones or mineral oils.

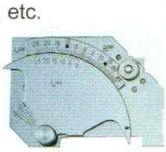
85 11 77	Weld anti-spatter. water based CRC Ambersil, Bioweld, 400 ml	Tin

Aluminium Backing Tapes

Cintas para embalar de aluminio
アルミニウムバッキングテープ　铝箔胶带

An aluminium backing tape with fiberglass center

Benefits:
- Reduces setup time.
- Eliminates/minimizes need for back purging.
- Reduces post-weld grinding.
- Cuts down on post-weld clean up.
- Increases weld productivity, reduces costs.
- Heat resistant (Adhesive 260°C, Aluminium tape 593°C, Fiberglass strip 550°C).
- For application up to 500/600 Amps.



Unit Per Rls.

Main Engine Diagrams

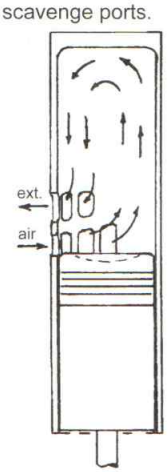
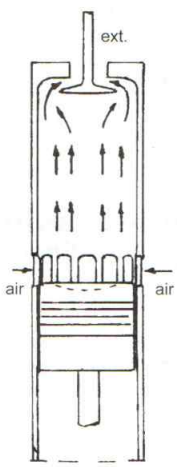
There are various types of main engine with a range of cylinder sizes from various manufacturers in the world. Basically, marine diesel engines can be divided into two main types; Large, slow-running direct drive engines with limited numbers of cylinders (Two-stroke cycle), or Medium to high speed engine driving through reduction gears (Four-stroke cycle).
Below are shown basic cross sections of common two-stroke cycle engines as a reference. Two-stroke engines are commonly used as the main engine for oil tankers, bulk carriers, or container vessels which must carry a large payload. Four-stroke engines are commonly used of car carriers, Ro-Ro vessels and ferries where a low set, medium speed engine is preferable to allow space for additional car deck space or accommodations above the engine room.

MAN – B & W KEF Engine

SULZER RND Engine

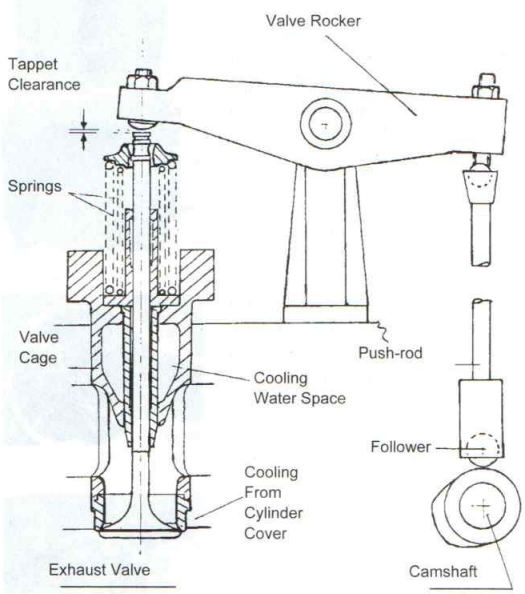


The Basic Method of Scavenging within the Cylinder



Loop Scavenge:

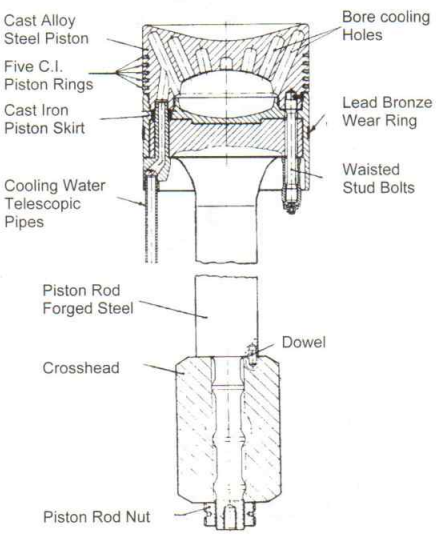
Air passes over the piston crown and rises to form a loop within the cylinder, expelling gas through exhaust ports cut in the same side of the liner above the scavenge ports.



Uniflow Scavenge:

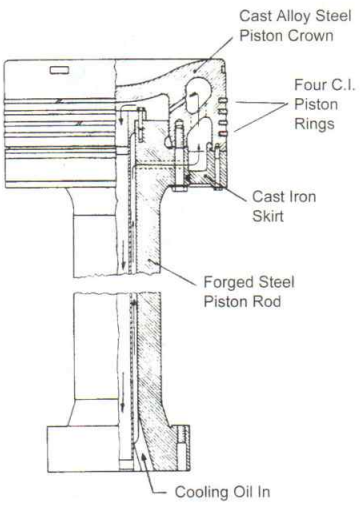
Air passes straight up through the length of the cylinder, forcing the exhaust through ports or valves at the top of the cylinder.

Exhaust Valves and Tappets



Large Two-stroke Engine Pistons

Cooling of pistons is necessary to remove excess heat from combustion and to limit thermal stressing. It also limits thermal expansion to maintain correct clearances between piston and liner and between ring grooves and rings. Cooling may be carried out by circulating either water or oil.



Fresh Water Cooling Piston:

Fresh water cooling has the advantage of greater thermal capacity than oil ; it may also sustain higher outlet temperatures (up to 70°C) improving thermal efficiency. Water cooling has the disadvantage that flexible connections and glands to convey it to and from the piston require maintenance and there is the possibility of crankcase contamination from gland leakage.

Oil Cooling Piston:

Oil cooling has lower thermal capacity and a lower temperature limit (56°C) to prevent carbon or lacquer forming on hot surfaces, with consequent loss in heat transfer or choking of passages.

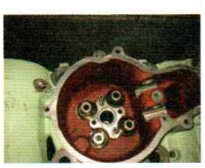
87

Machinery Equipment

Machinery Part Cleaners

Limpiadores de Piezas de Maquinaria
機械部品洗浄装置　机械零件清洗机

The machinery part cleaner designed for maritime use. It saves man hours because of simple operation and fast cleaning without supervision. The machines are able to accommodate and clean the most common auxiliary engine spare parts, filters, pump parts, tools, cylinder cover, etc.



Internal box is made of stainless steel plates and is well isolated in order to reduce the loss of heat and enable the machine to stay heated all day, ready of use. The energy loss at evaporation is reduced considerable as the machine is fitted with a steam reducer in the top, which opens for steam discharge when the machine is started.

Before

The items are placed on the fixed grating which has a carrying capacity up to 1,350 kgs or for smaller items in a special designed basket, made of stainless steel.
The cleaning liquid is heated to the required temperature controlled by the fitted thermostat.

Anti-splashing Tapes
for Ship's Engine Room

Cinta de Anti-Sapicadura para Sala de Máquinas
燃料油用飛散防止テープ　防溅帯

For preventing outbreak of a fire caused by a splash of combustible oil, such as fuel oil, lubricating oil, etc. from oil pipes connected to an engine or a generator in a ship's engine room.

Amended SOLAS Reg.4.2.5.3, 4.2.3 and 4.2.4, Chapter II-2 stipulate that oil fuel line shall be screened or otherwise

suitably protected to avoid as far as practicable oil spray or oil leakage onto the source of ignition, hot surfaces, into machinery air intakes, or other sources of ignition.

Piping, valves, pressure gauges, or any other auxiliary parts become loose due to vibration, fatigue, deterioration of material, excess tension, and tend to be damaged with a pinhole or crack.

Covering with this anti-splashing tape to protect the exhaust pipe and other high temperature equipments from being exposed to splashes of combustible oil and preventing possible occurrence of a fire.

The tape consists of aramid woven cloth superimposed with aluminium foil on both sides, and an adhesive agent is applied to one side and covered by a separator film.

The tape can withstand prominent pressure of 1.5 MPa when applied properly.

Specifications

Tensile Strength	318 N per 10 mm width
Ordinary Joint Strength	7 N per 10 mm width
Shear Joint Strength	196 N per 20 mm x 20 mm
Pressure Resistance	Maximum : 3.0 MPa Approved : 1.5 MPa
Heat Resistance	Maximum : 150°C

M/E Scavenging Drain Analysis (SDA) Onboard Test Kits

"Fe-asy Checker 26"

Equipo de pruebas a bordo M/E para análisis de desagüe de eliminación (SDA)
船上簡易全鉄分分析キット　船用简易总铁含量测试分析套件

A highly accurate analysis test kit on board for total iron content in the scavenging drain of diesel-powered main engines.

The colorimetric method enables crew members to take extremely accurate analysis of total iron content by specific wavelength filter for a photoelectric colorimeter and a special mix of two kinds of Reagents (A & B). The result is displayed in parts per million (PPM) value.

Optimizing scavenging drain oil requires careful monitoring of conditions inside the diesel main engine and recently, many instances of low-temperature sulfuric acid corrosion have been reported due to an increase of design pressure inside the cylinders. This analysis kit can measure not only conventional magnetic iron particles, but also the total iron content including iron ions, which lead to earlier detection of abnormalities inside the cylinder.

Engine Starter Motors

Aparatos de arranque para motores
エンジンスターターモーター　发动机用启动马达

Reliable and powerful starter motors for diesel engines and generators. Their independent, dead-ship or black-start capability is ideal as your primary or secondary method of starting fire pumps, emergency generators and compressors. Starters are available from stock from locations around the world. There are three types: Hydraulic, Air (pneumatic), and Spring (mechanical) type.

The starter motor must be specified to match the engine type and configuration so, when ordering, please specify the maker and model of engine and, if available, the original part number of the old starter motor.

Hydraulic Type

Air (Pneumatic) Type

Spring (Mechanical) Type

How to order: CODE

Engine Starter Motor, Hydraulic or Air or Spring Type, Engine Capacity (litres), Engine maker, model and original part number of old starter etc.

Ultra High Pressure Products for Main Engine

Productos de ultra alta presión para el motor principal
メインエンジン用超高圧製品　用于主机的超高压产品

General Safety and Warnings for High Pressure Products

These products are mainly used for opening the Cylinder Head for main engine maintenance, loosening very tight bolt & nut. During the maintenance work, hose assemblies may fail abruptly and unexpectedly due to a variety of reasons. Hydraulic oil shooting out at high pressure and/or at high speed can cause serious personal injury and severe damage to objects as well as pollution of the environment.

Example of potential hazards
1. Bursting hose components.
2. Whipping hose ends.
3. Oil spray leakage.
4. Coupling blow off .

Make sure for your safety that:
1. The design and operation of tools and machines complies with the existing safety regulations.
2. Inspect hose assemblies for damage and wear at regular Intervals. The inspection of hose kit should be done under zero pressure.
3. Defective or damage hose assemblies must be replaced immediately.
4. A coupling and a nipple should be connected properly and do not connect with other brand even it is interchangeable.
5. When the leakage is confirmed from the high pressure components, stop using and replace immediately.

When ordering these products, please specify the manufacturer & model of Main Engine, as the original couplings are required for Main Engine.

Hydraulic Couplings

Acoplamientos hidráulicos　油圧カップリング
液压联轴器

Compact design, non-drip, quick connect coupling and nipple that stand up to 250MPa for bolt tensioner and jack application. All exposed components are made of zinc chrome plated steel.

Nominal flow diameter: 2.5 mm (3/32")
Temperature range: -20°C - +80°C (0F - + 175 F)

Unit Per Pc.

CODE	Description	Max. Working Pressure	Connection
87 13 01	Coupling	150 MPa	G1/4" Female with valve
87 13 02	Nipple		G1/4" Female with valve
87 13 03	Nipple		G1/4" Male without valve

87 13 05	Nipple		G1/4" Female with valve
87 13 06	Nipple		G1/4" Male without valve
87 13 07	Coupling	250 MPa	G1/4" Female with valve
87 13 08	Nipple		G1/4" Female with valve
87 13 09	Coupling		G1/4" Female 90° Connection with valve

Adapters

Adaptadores
超高圧油圧アダプター　适配器

Made of steel, black zinc plating with durable design adapters, suitable for most couplings and hoses.

Unit Per Pc.

CODE	Description	Max. Working Pressure	Connection
87 13 11	Adapter	150 MPa	G1/4" w/60° internal cone x NPT 3/8"
87 13 12	Adapter		G1/4" w/60° internal cone x R3/8"
87 13 13	Adapter		G1/4" w/120° external cone x R1/4"
87 13 14	Adapter	200 MPa	G1/4" w/120° external cone x G1/4" w/120° external cone
87 13 15	Adapter		G1/4" w/60° internal cone x G1/4" w/120° external cone
87 13 16	Adapter		G1/4" w/120° external cone x 3/4-16 UNF w/60° external cone
87 13 17	Elbow Adapter	250 MPa	G1/4" w/120° internal cone female swivel x G1/4" w/120° external cone fixed male thread

Porting Blocks

Portar bloques
超高圧ポーティング・ブロック　舷側块

Made of steel, black zinc plating or stainless steel with durable design porting blocks. Make it possible to utilize/connect several hydraulic lines from a single pump to numerous tools as well as the possibility of connecting a pressure gauge.

Unit Per Pc.

CODE	Description	Max. Working Pressure	Connection
87 13 21	4 way block steel	300 MPa	G1/4" w/120° internal sealing cone female thread
87 13 22	3 way block steel		G1/4" w/120° internal sealing cone female thread
87 13 23	3 way block stainless steel		G1/4" w/120° internal sealing cone female thread
87 13 24	5 way block steel		G1/4" w/120° internal sealing cone female thread

Ultra High Pressure Hoses

Mangueras de ultra alta presión
超高圧ホース　超高压软管

Ultra-high pressure thermoplastic hoses reinforced with high tensile steel wire that gives you extremely high working pressure up to 2,500 bar with maintained flexibility through entire service life. Its low volumetric expansion gives fast response time in hydraulic systems while the smooth inner bores provide a minimized pressure drop. Various kinds of fittings are available upon request.

Unit Per Mtr.

CODE	**87 13 26**	**87 13 27**
Working Pressure	1,800 Bar	2,500 Bar
Inner Core	Polyoxymethylene (POM)	
Outer Cover	Polymide (PA)	
Construction	4 spiral layers of high tensile steel wire	6 spiral layers of high tensile steel wire
Min. burst pressure	4,500 Bar	6,250 Bar
Min. bend radius	130 mm	175 mm

Pressure Gauges for High Pressure Filled with Glycerine

Stainless steel cover with glycerine filled gauges with accuracy of ±1.6% in 63mm gauges and 0-1% in 100mm to 150mm gauges. Both bottom and panel mounted type is available, range of pressure is up to 5,000 bar.

Unit Per Pc.

CODE	Measuring Range (bar)	Dial Size	Connection

Ultra High Pressure Pumps

Bombas de ultra alta presión　超高圧ポンプ　超高压泵

Air Driven Hydraulic Pumps up to 3,500 Bar

These pumps are air driven explosion-proof type hydraulic pumps that can generate hydraulic pressures up to 3,500 bar. Light weight compact air hydraulic pumps provide easy handling, safe and efficient services with built-in automatic pressure stop function to prevent unexpected accidents. These are suitable for engine maintenance when used with bolt tensioners.

Unit Per Set

CODE	Max. working pressure (Auto stop)	Tank capacity	Displacement per cycle	Weight
87 13 31	1,540Bar (1,060Bar)	3.5 liters	0.43 cc	20 kg
87 13 32	1,540Bar (1,060Bar)	6.5 liters	0.76 cc	24 kg

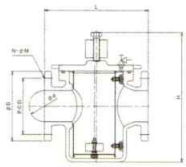
87 13 34	3,500Bar (2,500Bar)	8.0 liters	4.2 cc	40 kg

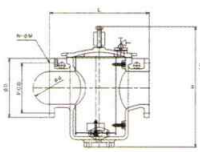
Hand Pumps up to 2,500 Bar

Light weight aluminium body and compact design with two stage hydraulic hand pumps provide easy handling and efficient engine maintenance service. Two stage hydraulic pumps can generate hydraulic pressure up to 2,500 bar.



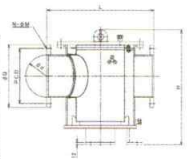
Unit Per Set

CODE	Max. working pressure	Tank capacity	Pump flow capacity	Weight
87 13 36	1,800 Bar	2.2 liters	L 20cc H 0.8cc	8.1 kg (dry)
87 13 37	2,500 Bar	2.2 liters	L 20cc H 0.8cc	8.1 kg (dry)



Marine Can Water Filters

Filtros Marinos de agua　筒型水こし　船用筒型水过滤器



Made of casting steel and used for water pipelines in ship. Complete with inner strainer. Connecting flange size are conform to JIS 5K standard.

Level Gauges for Oil (DIN)

Reflex Type with Push-Button, Spring to Close According to SOLAS Requirements

Indicador de Nivel de Aceite (según DIN) Tipo Reflex con Pulsaor

DIN 型油用水位計

DIN 型油位计

Especially for oil storage tanks and similar applications. The level gauges are also often used on board of ships.

They meet the requirements of the international classification societies, such as Lloyd, BV, ABS, and DNV.

Available length is between 245 mm and 6,000 mm. Please specify required length when ordering.

Also following types are available if required.

* with the same connection on top including push-button or lever and weight.
* all of stainless steel.
* anti-clockwise to close.

Pressure/Temperature rating : 2 bar – 95°C.

Name of Mfr.: Niikura Kogyo Co., Ltd.

DIN PN10 type
Winteb Air Pipe Heads (Vent heads)

Type 1B (DN50-DN125)
Anti Splash water type
Recommended for fuel tanks

WIN2000 Type 1 Air Vent Head, including Screen (mesh 18) with DIN PN10 flange connection.

- Made of seawater resistant Aluminium DIN1725.
- Non corroding(If fitted according to fitting instructions).
- Maintenance free, smallest design available.
- Cost saving.
- High volume metric flow.
- Light weight = less fuel = less CO2 emission.

Available three types:
Type 1 - Standard
Type 1B - Smaller air inlet opening
Type 1B - Small flange connection

Approved by all major classification societies – ABS, BV, DNV, Lloyd's, RINA, RMRS, CCS, and NK.

Please specify the type of air vent heads, flange size to be connected with the type of pipe head when ordering.

Model: WIN2000 Type 1 (with Screen)

Flow Rate & Air Speed

Model	Flow Rate at 0.25 bar (m^3/h)*	Flow Rate at 0.25 bar (m^3/h)**	Max.Inlet Air Speed (m/s)	Inlet air flow rate at max. inlet air speed (m^3/h)
W2T1-PN10-50	23	19	11	72

Emergency Shut-off Valves & Air Reservoirs

Válvulas de cierre de emergencia y depósito de aire

非常遮断弁とエアリザーバー　緊急切断阀和储气罐

Every Pipe to suck in oil from Tank located up in the double bottom such as Fuel-oil Tank, Lubricating-oil Tank and Heat-agent-oil Tank must be equipped with Stop Valve or Cock in the way that it is located direct to Tank wall.

This Stop Valve or Cock has to be of function and structure so that it can shut off oil-flow direct at the installed position and also can be remote-controlled for shut-off from a safe place out of the area. This is a Device fit for such purpose.

Shut-off Operation

Air operating type:

Only open the compressed air supply valve connected from air reservoir. Air reservoir should be kept certain pressure between 0.39 MPa and 0.89 MPa.

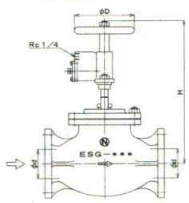
* If there is insufficient pressure in the tank, there is a risk of inadequate air supply causing malfunction.

Wire operating:

Only pull the lever connected with wire. For manual shut, these valves can close with handle wheel by rotating in clockwise direction.

Reset after Shut-off

1. Rotate clockwise until a head of piston is set in the grooving on spindle, and then rotate counterclockwise the handle to set valve in full open condition.
2. In an emergency, the valves can be manually reset by lifting the handle upward.



* Regarding Air operating type, 1 or 2 should be applied after air supply valve is closed.

JIS Flanged End Globe Type

JIS 5K

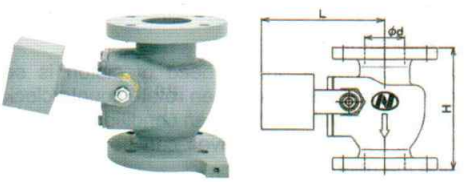
Self-Closing Valves



Válvulas de cierre automático
自動閉鎖弁　自闭阀

Required in the middle of the drainpipe and need to be installed in a handle-operated position when directing the drain water that accumulates at the top of the deep tank to the bilge reservoir.

Regulations also require that a quick-acting self-closing valve be installed in the drainpipe that collects at the top of the deep-water tank. Available in spring type and counter-weight type. Connecting Flange is JIS 5K.

Indoor Spinning Bikes

Bicycle stationary, indoor use
ヘルスサイクル　室内健身脚踏车

The indoor spinning bike is designed to make you feel as if you are cycling outdoors.

It can simulate different terrains for a good cardio workout, which involves interval training with climbs and sprints. The flywheel simulates momentum.

11 01 01	Bicycle stationary, indoor use	Set

Stationary Bicycles
with Ergometer

Bicicleta Estática con Ergómetro
エルゴメーター付きヘルスサイクル
室内健身脚踏车

A stationary bike with an ergometer to measure the results of the workout. Designed for High-performance and heavy use. It has several challenging programs for a full workout. The seat is vertically and horizontally adjustable and the wheels make it easy to transport.

Please specify the power source voltage when ordering.

11 01 02	Bicycle stationary, with ergometer	Set

Treadmills

Cinta Ergométrica　ランニングマシーン
跑步机

Foldable Treadmill

Non-Foldable Treadmill

The treadmill provides a powerful speed and allows variation in intensity of the exercise at any speed. The challenging programs will help you meet your goal. Available in "Foldable" and "Non-Foldable" type.

Foldable Treadmill is "foldable" to save space in your exercise room, whereas Non-foldable treadmill has oversized frame which provides strength, rigidity and endurance during the exercise.

Unit Per Set

CODE	Type	Voltage	CODE	Type	Voltage
11 01 03 04	Foldable	AC 110V AC 220V	11 01 06 07	Non-Foldable	AC 110V AC 220V

Cross Trainers

Bicicleta Líptica　クロストレーナー
交叉训练机

Cross Trainer

The cross trainer or elliptical trainer provides an efficient training. It combines the advantages of walking, running, cross training, stair climbing and push ups in one machine, at the same time.

Elliptical Trainer

Elliptical Trainer has "Frontweel" and "Backwheel", designed for an intensive and realistic workout, so please specify "Front/Back wheel", the power source voltage when ordering.

11 01 08	Cross Trainer	Set
09	Elliptical Trainer	"

Rowing Exercisers

Máquinas de Ejercicio de Remo
ローイングマシーン　划船练习架

The rowing machine incorporates many muscle groups at once, creating a great workout.

・Magnetic rower
The magnetic rower uses a maintenance-free magnetic break system to create resistance. The magnets are incorporated into the flywheel. They adjust resistance in calibration with your pull and are set.

・Air rower
The air rower has a flywheel that creates air resistance as you pull against it and can be calibrated to increase or decrease resistance.

The air resistance also goes against the force being applied, therefore, the faster you pull, the harder the resistance. The design simulates rowing in water, with a fluent and natural motion.

Please specify "Magnetic" or "Air" resistance rower, the power source voltage when ordering.

11 01 34	Rowing exercisers, indoor use, Magnetic rower	Set
10	Rowing exercisers, indoor use, Air rower	"

Multi Gyms

Multigimnasio　マルチジム　多功能健身器

The multi station is a very compact and versatile machine that offers plenty of exercises to train the most important muscle groups: the chest, arms, back and legs. The smart and efficient design makes it easy to switch between exercises and lets you accomplish a divers training, without the use of many different machines.

11 01 11	Multi Gym Station, indoor use	Set

Smith Machine Sets

Conjunto de máquina Smith
スミスマシンセット　史密夫架

The Smith machine is a training machine used for weight training.

It consists of a barbell that is fixed within steel rails allowing vertical movement. The machine can be used for a wide range of exercises however it is most commonly used to perform "Smith machine squats"

11 01 46	Smith Machine Set	Set

Chin & Dipping Multi Stands

Soporte múltiple para dominadas y fondos
チン＆ディッピングマルチスタンド
单双杠多功能训练架

Designed to build and tone your triceps, chest, shoulders and core to develop six pack abs. Thick comfortable back pad, arm supports and rubber hand grips reduce fatigue and discomfort allowing you keep working on your upper body and abs.

11 01 47	Chin & Dipping Multi Stand	Set

Weight Sets, etc.

Equipos de Pesas, etc. ウェート用具セット 重量设备等

There are many kinds of body building equipment available such as barbells, dumbbells, bench presses, and barbell stands.

Barbell Set

Barbell Discs

Barbell Bar

Dumbbell Set

When ordering Barbell or Dumbbell, please specify the weight composition and shaft weight.

26	Gym rack	Pc.

Benches

Bancos ベンチ 長凳

Incline/Decline Bench

A bench that can incline or decline into different positions, which allows you to perform dumbbell or barbell exercises, while supporting the body.

Abdominal Bench

The abdominal bench is a workout bench that makes it easier to perform abdominal exercises. It can incline and decline for a full abdominal workout.

11 01 12	Incline/Decline Bench	Set
13	Abdominal Bench	"

Puzzle Exercise Protection Mats

Colchoneta protectora acoplable para ejercicios
ジョイント式プロテクションマット 拼接式运动保护垫

The puzzle exercise mat creates a comfortable surface for workouts and exercise equipment while protecting your floors.
Dense EVA foam absorbs impact and noise during workouts and provides a soft surface for exercises like Yoga and push-ups.

Lightweight puzzle pieces connect quickly and easily, and can be disassembled just as simply for quick storage.

<Approximate Size>
60 × 60 × 1.2 cm

11 01 48	Puzzle Exercise Protection Mat	Pc.

Exercise Mats

Alfombra para hacer ejercicio ヨガマット 瑜伽垫

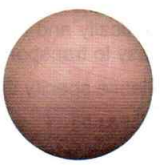
Training mat is for use in stretching, Yoga, and variety of core trainings.

11 01 14	Exercise mat	Pc.

Weight Lifting Belts

Cinturón para levantamiento de pesas
ウェートリフト用ベルト 举重腰带

Weight lifting belt provides superior back and abdominal support during weight training.



< Approximate Size >
S : 61-81 cm M : 74-94 cm L : 86-106 cm

Please specify the size when ordering.

11 01 15	Weight Lifting Belt, Size ----	Pc.

Exercise Balls

Pelota de ejercicios バランスボール 健身球

Made of soft elastic filled with air, and suitable for balancing training, core body training – abdominal muscles and buck muscles, and more.

Standard Sizes available in OD: 55 cm / 65 cm / 75 cm / 90 cm

Please specify the ball size when ordering.

11 01 16	Exercise Ball	Pc.

Medicine Balls

Balón medicinal
メディシンボール 药球（健身实心球）

A medicine ball (also known as an exercise ball) is soft rubber weighted ball used for strength training.

It enhances your daily exercises, and usually available for 1 – 10 kg.

Pease specify the ball weight when ordering.

11 01 49	Medicine Ball, _____ Kg	Pc.

Push-Up Bars

Barras para flexiones de brazos
プッシュアップバー 俯卧撑架

Supporting your push-up exercises, increase chest, shoulder, and triceps strength with push-up bars.

High impact plastic with non-slip end caps for increased stability, and foam handgrips for improved comfort.

11 01 17	Push-Up Bar	Pr.

Exercise Wheels

Rueda abdominal
エクササイズホイール 健身轮

Small sturdy wheel with a rod traversing the center that serves as the handles.

Assist with core-strengthening exercises, such as highest-rated abdominal exercise. Careful technique is required to avoid muscle strain or injury.

11 01 18	Exercise Wheel	Pc.

Hand Grips

Resortes para manos　ハンドグリップ　握力器

Basic and quality pair of handgrips, great as a starter set to train hand grip balance. Durable chrome steel springs are for a long useful life.
Grip strength is available from 15 kg to approx. 70 kg. Please specify the level of strength (kg) when ordering.

11 01 19	Hand Grip, Strength __kg	Pc.

Foam Rollers

Rodillo de espuma　ストレッチローラー　泡沫轴

Designed for stretching your body, increases blood flow for an accelerated muscle recovery before and after working out. It's also perfect for developing core stabilization, lower body balance, and stamina.

Water resist and light weighted. Please specify the size when ordering.

<Approximate Size>
Short : Dia 13.5 cm × Length 32 cm
Long : Dia 15 cm × Length 98 cm

11 01 70	Foam Roller	Pc.

Gym Gloves

Guantes de gimnasia　ジム用グローブ
健身手套

Designed for use during weigh training or other exercises. Providing extra grip, support, and stability to protect your hands from variety of exercises.

Interchangeable Lens Digital Camera

Cámara digital de objetivos intercambiables
レンズ交換式デジタルカメラ
可更换镜头数码相机

A digital camera that you can change lenses on the camera body to take different types of photography, such as portrait, landscape, or sports.

It has two different formats, Digital Single-lens Reflex (DSLR) and mirrorless cameras. DSLR camera has mirror and prism system to reflect light from the lens and preview the picture through viewfinder. Mirrorless camera uses electronic viewfinder or LCD screen on the back of the camera to preview the picture image without mirror and prism system.

Available in various brands and models, so please specify brand name, format and features when ordering.

11 11 26	Interchangeable Lens Digital Camera, DSLR	Pc.
11 11 27	Interchangeable Lens Digital Camera, mirrorless	Pc.

International Shortwave Broadcast Receivable Radios

Radios receptoras de emisiones internacionales de onda corta
小型短波ラジオ 国际短波广播可接收收音机

A short wave (SW) radio which can receive shortwave broadcast in many different locations around the world. It has LCD screen and many other features such as MP3 or Bluetooth playback and various kinds of build in recording systems. Available various types from many different manufacturers, so please specify brand name and model with power source voltage when ordering.

11 11 09	Handy type SW radio	Pc.
10	Portable type SW radio	Pc.

Digital Media Players

Reproductor multimedia digital
デジタルメディアプレイヤー
数字媒体播放器

Portable media players which can serve as data storage devices. Storage capacity varies by model and containing musics, photos, videos, and games etc.
Please specify the type of media player, model number, storage capacity etc. when ordering.

11 11 19	Digital Media Player	Pc.

Tablet Computers (Touch Panel)

Computadora tableta (pantalla táctil)
タブレットコンピューター（タッチパネル）
平板电脑（触摸式平板）

To help you achieve maximum usage across various demanding applications by "touch screen".

Designed for reading books and magazines, watching movies, playing games, and more (view larger) by various applications.

Those applications should be pre-installed or be able to download under the Internet access environment.

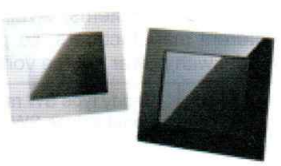
When ordering, please specify the maker name, model, size of storage(GB), size of display, and name of applications for pre-install.

11 11 20	Tablet Computer	Pc.

Headphones / Earphones

Auriculares/Audífonos　ヘッドホン / イヤホン　头戴耳机 / 耳机

A pair of small loudspeaker which let a single user listens to an audio source privately.



Basic functions are as follows;
- Connect to Bluetooth-enabled device.
- Ergonomically designed to fit ears.
- Wireless.
- Noise Canceling technology.

More functions are available in various manufacturers. Please specify the functions or models when ordering.

11 11 24	Headphones, with further details	Set
11 11 25	Earphones, with further details	"

Digital Photo Frames

Marco de fotos digital　デジタルフォトフレーム　数码相框

A picture frame that displays digital photos without the need of a computer or printer. You can create your digital photo gallery and have it displayed with its screen. This stylish digital frame lets you attach a memory card and start the photo slide show right away.

Please specify the flame size, kind of memory you use for. Ex) SD card, USB stick, Memory stick, etc when ordering.

Unit Per Set

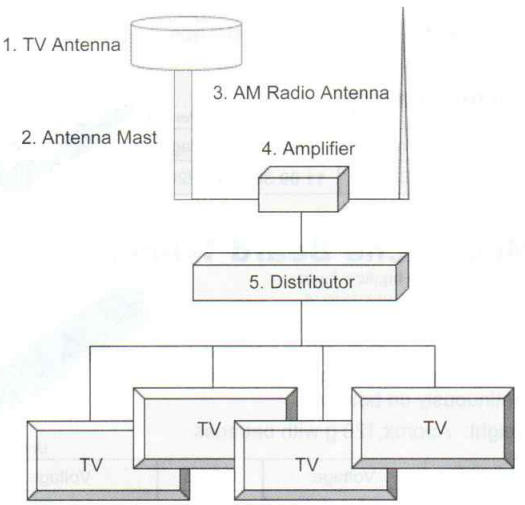
IC Recorders
(Digital Voice Recorders)

Grabadoras IC　IC レコーダー　IC 录音机

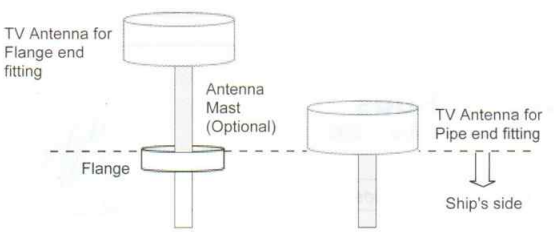


The IC recorder is recording data and storing it on the memory media, such as voice note at a meeting, an interview, music performance, any sounds and so on. And, the recording data files from IC recorder can be copied to your computer to store. Vice versa, MP3 files from your computer can be copied to the IC recorder to play them back.
Please note the computer operating system should be compatible between the IC recorder and your computer.

11 11 23	IC recorder (Digital voice recorder)	Pc.

Marine TV / Radio Antenna Systems

Sistema de antena de TV/radio para barcos
船舶用テレビ・ラジオ受信アンテナシステム
船用广播电视信号接受天线系统



Omni-directional marine TV and radio antenna system assembled by optional component. The system is introduced as reference purpose for ordering the marine TV antenna. If you need more practical information, please contact your local supplier to satisfy your curiosity.

1. TV Antenna

Specification

Frequency Range (for FM and TV)	45 – 880 MHz
Frequency Range (for AM, FM and TV)	0.1 – 880 MHz
Supply Voltage	DC12V from Amp.
Average Gain	30 dB
Material	FRP redome

For 40A flange end ship's pole　For 40A pipe end ship's pole

Unit Per Pc.

CODE	Fitting	Type of Radio Wave		
		AM	FM	TV
11 11 51	For 40A flange end ship's pole	-	O	O
52		O	O	O
11 11 53	For 40A pipe end ship's pole	-	O	O
54		O	O	O

Remark : Antenna mast is optional.

2. Antenna Mast
It is necessary to install the TV antenna at 40A flange end ship's pole. Made of stainless steel.

11 11 55	Mast for TV antenna joint, stainless steel	Pc.

3. AM Radio Antenna (Whip Type)

11 11 56	Antenna, AM radio, whip type, FRP, L:2.6 mtr	Pc.

4. Antenna Amplifier
Automatic gain control type with F-connector. Supply voltage is AC 110V or 220V, and average gain is 40dB.

4-band automatic gain control circuits

Marine TV Antennas
Antenas de Televisión Marina　船舶用アンテナ　船用电视天线

Marine TV antenna systems are omnidirectional, receiving signals in a full 360 degree radius, and require no additional adjustment when properly installed.

Receiving wideband TV–AM–FM signals (Frequency Range 40 – 890 MHz), antenna brings in beautiful colour pictures on both VHF and UHF television and provides for FM stereo reception at sea.

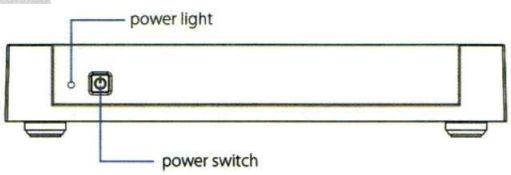
All internal electronic components are environmentally protected with a corrosion resistant coating. Exterior is made of white ABS plastic, which requires no maintenance.

Supplied with a mount for installation. Please specify if you require a straight mount, for parallel mounting on deck or the roof of the wheel house, or a bracket or mast mount, for mounting on a mast or a wall.

Also specify how many television units will be used with the antenna so the dealer can determine if a signal amplifier or booster is necessary.

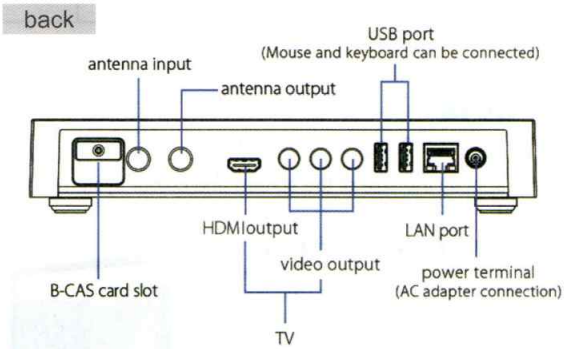
Specification

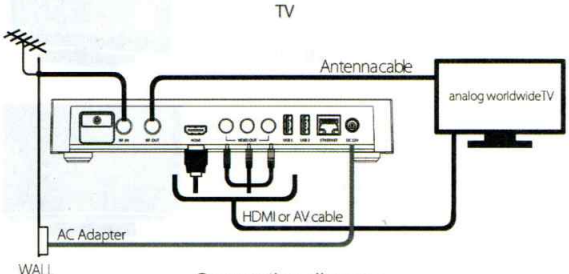
Frequency Range	40 - 890 MHz
Average Gain	20 dB
Supply Voltage	AC 110 / 220 Volt



11 12 05	Marine TV antenna supply voltage AC 110/220V with assembly	Set

Smart Digital Tuner® Worldwide
Sintonizador universal de televisión digital terrestre
地上デジタルテレビチューナー　地面数字电视调谐器





A worldwide digital terrestrial TV (DTT) receiver for ocean going ships. Designed to tune-in to all approved DTT broadcast standards, such as, ATSC, DVB-T/T2, ISDB-T, ISDB-Tb, and DTMB. This enables viewing of terrestrial digital broadcasts, on ships in port or navigating along a coastline, simply by connecting it for ships to an existing TV and antenna. Furthermore, internet browsing function is provided using built-in lightweight browser.

front

back

Connection diagram

Digital Terrestrial TV Broadcasting Standards by region

DVB-T/T2	European countries, Russia, Australia, Taiwan, Singapore, UAE etc.
ATSC	USA, Canada, Korea etc.
ISDB-T	Japan
ISDB-Tb	South America, Philippines etc.
DTMB	China, Hong Kong etc.

* To receive terrestrial digital broadcasts, it is necessary to have the corresponding TV antenna.
* Even if the antenna and this product are set up properly, and correctly connected, reception of terrestrial digital broadcasts will be impossible in countries without terrestrial digital broadcasting.
  In addition, various problems may occur such as blocking of signals by neighboring buildings, inability to receive weak signals, only being able to receive specific broadcasting channels, audio cutting out, and stopping of video, and appearance of block noise.
* Topographic conditions as well as weather conditions have great influence on TV terrestrial reception range.
* Pay broadcasts (scrambled broadcast) cannot be viewed.
* Internet (communication line and Internet service provider contract) is required to enjoy web browsing.

Specifications

Model	KST-2000-W
TV formats supported	ATSC1.0, DVB-T, DVB-T2/T2 HEVC, ISDB-T, ISDB-Tb, DTMB (Not supported AVS China)
Ports	HDMI output, RCA video output, USB×2, LAN, Antenna input/output (RF pass-through output), DC Jack
AC adaptor	100-240V, 50/60Hz
Power consumption	8W
Operating temperature	0 - 40°C
Operating humidity	20-80% No condensation
Dimension	242(W) × 44(H) × 125 mm(D)
Mass (Approx.)	450g
Accessories	AC Adapter, HDMI Cable, Remote controller, Foot plates, mini B-CAS card (for Japan)
